 ix Authors
 xiii Conference Committee

KEYNOTE SESSION

9426 02 Optical lithography with and without NGL for single-digit nanometer nodes (Keynote Paper) [9426-1]

PUSHING OPTICAL LIMIT

9426 04 Evolving optical lithography without EUV (Invited Paper) [9426-3]
9426 05 Mask 3D induced phase and the mitigation by absorber optimization (Invited Paper) [9426-4]
9426 06 Patterning process exploration of metal 1 layer in 7nm node with 3D patterning flow simulations [9426-5]

IMAGE AND PROCESS CONTROL

9426 07 Impact of bandwidth on contrast sensitive structures for low k1 lithography [9426-6]
9426 08 Solution for high-order distortion on extreme illumination condition using computational prediction method [9426-7]
9426 09 Optimum ArF light source bandwidth for 10nm node logic imaging performance [9426-8]
9426 0B Single lithography exposure edge placement model [9426-10]

NON-IC APPLICATIONS

9426 0C Multicolor, visible-light nanolithography (Invited Paper) [9426-11]
9426 0D Progresses in 300nm DUV photolithography for the development of advanced silicon photonic devices (Invited Paper) [9426-12]
9426 0E Double-sided diffractive photo-mask for sub-500nm resolution proximity i-line mask-aligner lithography [9426-13]
9426 0F Optimization methods for 3D lithography process utilizing DMD-based maskless grayscale photolithography system [9426-14]
9426 OH  Mask-induced best-focus-shifts in DUV and EUV lithography [9426-16]

9426 0I  Intensity and phase fields behind phase shifting masks studied with high resolution interference microscopy [9426-17]

MULTIPLE PATTERNING AND SMO

9426 0J  Study of cut mask lithography options for sub-20nm metal routing [9426-18]

9426 0K  Inverse lithography using sparse mask representations [9426-19]

9426 0L  RET selection on state-of-the-art NAND flash [9426-20]

9426 0M  Pixel-based ant colony algorithm for source mask optimization [9426-21]

9426 0N  Low-contrast photoresist development model for OPC applications at 10nm node [9426-22]

MASK AND WAFER TOPOGRAPHY MODELING

9426 0O  Characterizing the dependence of thick-mask edge effects on illumination angle using AIMS images (CYMER Best Student Paper Award in Microlithography) [9426-23]

9426 0P  Accurate, full chip 3D electromagnetic field model for non-Manhattan mask corners [9426-24]

9426 0Q  A pattern- and optics-independent compact model of Mask3D under off-axis illumination with significant efficiency and accuracy improvements [9426-25]

9426 0R  Printing circuits with 4nm feature size: similarities and differences between EUV and optical lithographies [9426-26]

9426 0S  Rigorous wafer topography simulation for investigating wafer alignment quality and robustness [9426-27]

OPC AND MODELING

9426 0T  Investigating deprotection-induced shrinkage and retro-grade sidewalls in NTD resists [9426-29]

9426 0U  Alternative to ILT method for high-quality full-chip SRAF insertion [9426-30]

9426 0V  Uncertainty aware site selection method for OPC model calibration [9426-31]

9426 0W  Experiments using automated sample plan selection for OPC modeling [9426-32]
9426 OX  Optical proximity correction with hierarchical Bayes model [9426-33]

9426 OY  Application of SEM-based contours for OPC model weighting and sample plan reduction [9426-34]

DFM (DESIGN AND LITHO OPTIMIZATION): JOINT SESSION WITH CONFERENCES 9426 AND 9427

9426 10  Hot spots prediction after etching process based on defect rate [9426-36]

9426 11  Hybrid OPC flow with pattern search and replacement [9426-37]

OVERLAY OPTIMIZATION: JOINT SESSION WITH CONFERENCES 9424 AND 9426

9426 12  Overlay improvement methods with diffraction based overlay and integrated metrology [9426-38]

9426 13  Intra-field overlay correction for illumination based distortion [9426-39]

9426 14  Wafer to wafer overlay control algorithm implementation based on statistics [9426-40]

TOOLINGS

9426 16  Immersion and dry scanner extensions for sub-10nm production nodes [9426-46]

9426 17  Latest performance of ArF immersion scanner NSR-S630D for high-volume manufacturing for 7nm node [9426-42]

9426 18  New ArF immersion light source introduces technologies for high-volume 14nm manufacturing and beyond [9426-43]

9426 19  Total lithography system based on a new application software platform enabling smart scanner management [9426-44]

9426 1A  Green solution: 120W ArF immersion light source supporting the next-generation multiple-patterning lithography [9426-45]

POSTERS: IMAGE AND PROCESS CONTROL

9426 1C  Comparing the experimental resist pattern width with aerial image intensity in high-NA projection lens [9426-48]

9426 1D  Advanced process characterization using light source performance modulation and monitoring [9426-49]

9426 1E  Analytical analysis for impact of polarization aberration of projection lens on lithographic imaging quality [9426-80]
### POSTERS: MASK AND WAFER TOPOGRAPHY

<table>
<thead>
<tr>
<th>9426 1F</th>
<th>Reducing the substrate dependent scanner leveling effect in low-k1 contact printing [9426-50]</th>
</tr>
</thead>
<tbody>
<tr>
<td>9426 1G</td>
<td>A fast and flexible library-based thick-mask near-field calculation method [9426-51]</td>
</tr>
<tr>
<td>9426 1H</td>
<td>Focus shift impacted by mask 3D and comparison between Att. PSM and OMOG [9426-52]</td>
</tr>
</tbody>
</table>

### POSTERS: MULTIPLE PATTERNING AND SMO

<table>
<thead>
<tr>
<th>9426 1J</th>
<th>120W ArF laser with high-wavelength stability and efficiency for the next-generation multiple-patterning immersion lithography [9426-54]</th>
</tr>
</thead>
<tbody>
<tr>
<td>9426 1K</td>
<td>Forbidden pitches: causes, source optimization, and their role in design rules [9426-55]</td>
</tr>
<tr>
<td>9426 1L</td>
<td>Source optimization using particle swarm optimization algorithm in photolithography [9426-79]</td>
</tr>
</tbody>
</table>

### POSTERS: NON-IC APPLICATIONS

| 9426 1M | Advanced Mask Aligner Lithography (AMALITH) [9426-56] |

### POSTERS: OPC MODEL

<table>
<thead>
<tr>
<th>9426 1O</th>
<th>An improved virtual aberration model to simulate mask 3D and resist effects [9426-58]</th>
</tr>
</thead>
<tbody>
<tr>
<td>9426 1P</td>
<td>Evaluation of compact models for negative-tone development layers at 20/14nm nodes [9426-59]</td>
</tr>
<tr>
<td>9426 1Q</td>
<td>Photoresist 3D profile related etch process simulation and its application to full chip etch compact modeling [9426-60]</td>
</tr>
<tr>
<td>9426 1R</td>
<td>Resist profile modeling with compact resist model [9426-61]</td>
</tr>
<tr>
<td>9426 1S</td>
<td>Impacts of post OPC shapes on pattern [9426-62]</td>
</tr>
<tr>
<td>9426 1T</td>
<td>Calibrating etch model with SEM contours [9426-78]</td>
</tr>
</tbody>
</table>

### POSTERS: OPTICAL PROXIMITY CORRECTION

<table>
<thead>
<tr>
<th>9426 1U</th>
<th>7nm logic optical lithography with OPC-Lite [9426-63]</th>
</tr>
</thead>
<tbody>
<tr>
<td>9426 1V</td>
<td>OPC solution by implementing fast converging methodology [9426-64]</td>
</tr>
</tbody>
</table>
The comparison of various strategies of setting up an OPC repair flow with respect to process window constraints [9426-65]

Model-based Hot Spot Fixing (HSF) by using target point control function [9426-66]

Sub-Resolution Assist Feature (SRAF) printing prediction using logistic regression [9426-67]

Accurate and fast computation of transmission cross coefficients [9426-68]

The study of lithography conditions to use advanced resist performance properly [9426-70]

POSTERS: TOOLINGS

Modeling and simulation of the beam steering unit [9426-72]

DUV ArF light source automated gas optimization for enhanced repeatability and availability [9426-73]

Performance of ETC controller in high-volume production [9426-74]

Enabling CoO improvement thru green initiatives [9426-75]

New robust and highly customizable light source management system [9426-76]

Extending green technology innovations to enable greener fabs [9426-77]
