</table>
Full-Scale Treatment of a Coke Oven Wastewater Using Immersed Membrane Biological Reactor Technology ................................................................. 132
Art Kuljian, Jeff Penny, Joshua Harrison

Prolongation of the Life of a Coke Oven Battery — How to Protect the Asset

The Latest Developments on the EnviBAT™ Pressure Regulation System .................. 147
Frank Krebber, Joanna Kühn-Gajdzik, Kerstin Überschär, F. Hegner, M. Diephaus

Laboratory Method for Coking Pressure Determination .................................................. 154
Aleksander Sobolewski, Marek Sciazko, Bartosz Mertas

Development and Production of High-Density Silica for Coke Ovens .................. 161
Stanislav Dvorak, Karel Lang, Leopold Vasica

Coke Oven Life Prolongation — A Multi-Disciplinary Approach ................................ 164
Jorge Madias, Mariano de Cordova

Predictive Model for Blending Coking Coals — Part 2: U.S. Coals ................................ 176
William Ross Leeder, Louis Giroux, Ted Todoschuk, Cameron Howey, Ka Wing Ng, Tony MacPhee

Industrial Study on Coal Handling Bulk Density Control ............................................. 187
Ted Todoschuk, Ka Wing Ng, Louis Giroux, Tony MacPhee

Replacement of Equipment & Improvements at Existing Cokemaking Facilities

#1 Battery Collecting Main Replacement and Roof Repair Project .................................. 198
Nagendra Singh, Tim Candiano, Dale Heinz

Improvements in the Operation of Coke Plants Through Alignment Process Optimization .......... 215
Fernando Marsonet, Edgardo La Bruna, Scott Wassell

IRONMAKING/ICSTI

Ironmaking Modeling I — Prediction & Control

Stable Blast Furnace Operation by the Application of Predictive Process Models .............. 225
Jan van der Stel, Hans Jak, Trevor Bell, James Raleigh, Tim Peeters, Kirill Andreev

Analysis of Transient Processes in Blast Furnace .................................................. 237
Yakov Gordon, Nikolai Spirin, Vladimir Shvidkii, Yuriy Yaroshenko, Boris Bokovikov, Vitaliy Moikin, V.V. Lavrov

Development of Visualizing System of Blast Furnace Operation and Application to Operation .......... 245
Atsushi Inayoshi, Shinroku Matsuzaki, Masahiro Ito

Improvement of Blast Furnace Performance by Applying a High-Efficiency Expert System .......... 254
Xuegong Bi, Peng Li, Jindong Zhou, Wei Peng, Kuangnian He, S. Zhong, X. Zhong, D. Bai, W. Pan, K. Liu

General Mathematical Model of Adjusting Blast Volume of Blast Furnace Tuyeres .............. 261
Yanglong Li, Shusen Cheng, Chuan Chen
Blast Furnace Operations I — Campaign Life & Productivity

ArcelorMittal Tubarão Blast Furnace #1 First Campaign: Historical Results, Main Issues on Its Reline, Technological Updates, First Results of Second Campaign and Perspectives ........................................ 270
Claudio Cesar da Costa, Ernandes de Souza Belonia Filho, Luiz Wasem, Emerson Ribeiro, Salustiano Pinto Jr.

Cleveland No. 6 Blast Furnace Hearth Campaign Extension .................................................................. 284
D. (Frank) Huang, Marcelo Andrade, John Ricketts, Osama Hassen, Phillip Pergi, Dennis Cronin, Bruce Stackhouse

Longevity Technology Research and Practice of Baosteel No. 3 BF .................................................. 298
Renliang Zhu, Guo Jun Sun, Chengcheng Lin

Operating Experiences at JSPL, BF-II (India) — Achieving Higher Performance Indicators With Inferior Raw Materials ............................................................ 308
Hemant Upadhyay, Arvind Kumar Bhagat

Sintering I

Chemistry, Structure and Quality of Iron Ore Sinter ............................................................................. 322
Liming Lu, Natalie Ware, Sarath Hapugoda, Tirsha Raynlyn

Direct Reduction Ironmaking I — Use & Value of DRI

Economics and Value-in-Use of DRI in the USA ................................................................................. 333
Angelo Manenti

Strategies for Implementing Direct Reduction Technologies in an Integrated Steel Plant .................. 345
Nishit Patel, Ian Cameron, Yakov Gordon

High-Carbon Hot DRI Production and Use: ENERGIRON Results and Performances in Operating Plants ................................................................. 356
Alessandro Martinis, Daniela Dalle Nogare, Annamaria Volpatti, Pablo Duarte

Ironmaking Raw Materials I

Trends in Ironmaking Given the New Reality of Iron Ore and Coal Resources .................................. 366
Jose Henrique Noldin Jr., Peter Schmölé, Hans Bodo Lüngen

Fundamentals of Iron Ore Concentrate Agglomeration Using Alternative Binders ......................... 376
Joseph Halt, S. Komar Kawatra

Effect of Olivine Fineness and Thermal Profile on Oxidation-Sintering of Magnetite Concentrate Pellets ........................................................................................................ 379
Hesham Ahmed, Charlotte Andersson, Bo Björkman

Effects of Gangue Minerals and Temperature on Reduction Behavior of Fe₂O₃ Using Coke as a Reductant ......................................................................................... 389
Peng Gao, Guofeng Li, Yuexin Han, Yongsheng Sun

Innovation and Application on Pelletizing Technology of Large Traveling Grate Induration Machine....402
Fuming Zhang, Qusheng Wang, Zhiguo Han
Blast Furnace Operations II

Managing a Blast Furnace Operation During Abnormally Cold Weather ................................................................. 413
Stuart J. Street

Innovative and Safety-Oriented Approach to Blast Furnace Revival From Chilled Hearth ........................................ 426
Fabio Cravino, Cristiano Cristiano, Claudio Di Pietro, Maurizio Bastieri

Blast Furnace Banking and Blowdown: A Theoretical and Practical Approach to Preparing for an Extended Outage and Start-Up ................................................................. 435
Michael Alter, Charles McGovern, Douglas White, Mateusz Kus

Consequences of Heat Loss in the Lower Furnace ........................................................................................................ 445
Roman Vaynshteyn, Victor van Straaten

Sintering II

Replacement and Start-Up of New Third Hot Stove for Kokura No. 2 Blast Furnace ................................................. 450
Toshiaki Kojima, Takeshi Taniguchi, Akihiro Ishikawa, Takayuki Umesaki

Assimilation Behavior of CaO Source in the Sintering Process .................................................................................... 457
Chishiro Funada, Jun Okazaki, Daisuke Ikehuchi

On-Line Conveyor Belt Elemental Analyzer for Sinter Feed Chemistry Control .......................................................... 465
Kevin Gordon, Garry Noble, Mick Stuckings

Evaluation of Hydration Characteristics of the Lime Used for Iron Ore Sintering Based on the Constant-Temperature Calorimetric Method ................................................................. 471
Shengli Wu, Li Zhang, Yongzhong Zhang, Maojun Zhou

Characterization of Wetting Behavior Between Calcium Ferrite Series Melts and Al₂O₃, MgO Substrate ................. 481
Xuewei Lv, Bin Yu, Shenglin Xiang, Chenguang Bai, Jiaqing Yin

Direct Reduction Ironmaking II — Gas-Based DRI

Developing the MIDREX® Direct Reduction Process — Technological Innovations and Process Enhancements ................................................................. 493
Henry Gaines, Vincent Chevrier, Christopher Ravenscroft

The Effect of High Operating Pressure in ENERGIRON Reactor Design on Performance and in Reactor Productivity ........................................................................................................ 504
Jorge Martinez, Joel Morales, Pablo Duarte, Alessandro Martinis

Status and Start-Up of United Steel Co. (SULB) MIDREX® Combination CDRI/HDRI Plant ................................ 514
L. Ames, Henry Gaines, Christopher Ravenscroft

Performance of the New Alloys in Direct Reduction Processes .................................................................................. 521
Luis Humberto Quaranta, Pedro Imizcoz, Pablo Cardin

A Novel Test of Catalyst Activity ......................................................................................................................... 528
Elaine Chen, George Tsvik

Blast Furnace Slags

Primary Slags Formation Behaviors of Pellets in Cohesive Zone of Blast Furnace
Shengli Wu, Xinliang Liu, Mingyin Kou, Jinming Zhu, Kaifa Zhang, Wei Huang

Influence of MgO, Al₂O₃ and CaO/SiO₂ on Viscosity of Blast Furnace-Type Slag
Xuewei Lv, Jie Zhang, Zhiming Yan, Chenguang Bai

Research on Blast Furnace Operation With High-Alumina Slag in Meishan Steel
Hong Song Han, Fengman Shen, Zhenghao Zhang, Xin Jiang, Liaosha Li

Theoretical Analysis of Al₂O₃ Behaviors in Blast Furnace Ironmaking and Proper MgO/Al₂O₃ Ratio in Slag
Haiyan Zheng, Fengman Shen, Xin Jiang, Guo Wei, Yansong Shen, Xiulin Wen

Blast Furnace Cohesive Zone

Experimental Analysis of the Interfacial Wetting Phenomena Between Slag and Coke Surface Under Simulated Conditions of the Bosh Region of Blast Furnace
Anrin Bhattacharyya, Johannes Schenk, Gregor Arth, Hugo Stocker, Christoph Thaler

Influence of Burden Softening and Melting Properties on Cohesive Zone Shape and Gas Flow in Blast Furnace
Guolei Zhao, Shusen Cheng, Jun Zhao, Yanglong Li, Chao Li

Wettability of Graphite Substrates Against Molten CaO-SiO₂-Al₂O₃-MgO Slags
Noritaka Saito, Kosuke Yasutake, Sohei Sukenaga, Kunihiko Nakashima

Direct Reduction Ironmaking III — DRI Raw Materials

Characterization of DR Pellets for DRI Applications
Bodil Elisabeth Monsen, Edith Thomassen, Irene Bragstad, Eli Ringdalen, Per Helge Hoegaas

DR Grade Pellet Quality and Supply
Joseph J. Poveromo

Simultaneous Metallization and DRI Carburization Kinetics in DR Shaft Furnaces
Jose Carlos D’Abreu, Helio Marques Kohler, Mauricio Marcos Otaviano, Edelink Efrain Tinoco Falero

Economical Flux Addition in the Pellet Plant, DR and EAF Production Stream
Marka Okrutny, Janice Bolen

Blast Furnace Equipment & Maintenance I — Staves

ArcelorMittal IH-7 Blast Furnace Stave Circuit Failure Remediation Techniques
James Bobek, Sergey Trenkinshu, Donald Zuke, Travis Langdon

Thermal Deformation and Stress Analysis of Blast Furnace Copper Stave
Qi Liu, Shusen Cheng, Yanglong Li, Jianping Niu, Dongdong Liu

Thermal and Mechanical Parametric Study for Copper Staves in the Blast Furnace
Ho Jun Yoon, Won Seok Choi
Reduction Phenomena

Effects of CaO/CaCO₃ on the Carbothermic Reduction of Titanomagnetite Ores .............................................. 812
Sungmo Jung, Eungsso Choi

Effect of Hydrogen-Enriched Gas on Reduction-Disintegration and Reducibility of Sinter ................................. 819
Xin Jiang, Fengman Shen, Lin Wang, Chengyu Yang, Haiyan Zheng, Guo Wei, Qingfeng Tan

Density Functional Theory Study on the Interaction Mechanism of CO and FeO Surface .................................... 828
Hong Zhong, Liangying Wen, Chong Zou, Jian Xu, Jiajia Tu

Kinetics of Phosphorus Migration During Coal-Based Reduction of Phosphorus-Containing Oolitic Iron Ore ........ 838
Yuexin Han, Zhihang Li, Peng Gao, Yongsheng Sun

Blast Furnace Hearth

The End of Carbonaceous Blast Furnace Hearth Working Linings? ................................................................. 850
Albert J. Dzermejko

A CFD Model for Estimating Refractory Erosion and Skull Buildup in the Blast Furnace Hearth .................... 864
Lei Shao, Seppo Louhenkilpi, Zong-shu Zou, Henrik Saxén, Shan Yu

Research of Comprehensive Regulation Technology for Hearth Protective Layer of Blast Furnace Longevity ................................................................. 878
Zhang Jianliang, Kexin Jiao, Liu Zhengjian, Yang Tianjun, Ning Xiaojun, Liang Lisheng

Research and Application on Temperature Distribution Control Technology of Blast Furnace Hearth and Bottom ................................................................. 888
Fuming Zhang, Shusen Cheng, Hongbo Zhao

Migration of Erosion and Relationship Between Bottom and Hearth Temperature of Blast Furnace ................ 899
Yanglong Li, Peng Zhang, Shusen Cheng, Jiannin Gao

Blast Furnace Injection

Coal-Gas Co-Injection in Blast Furnaces: Are There Hidden Benefits? ......................................................... 908
Maarten Geerdes

Transport Behavior Characterization of Pulverized Coal for Blast Furnace ...................................................... 917
Pramod Kumar Gupta, Herve Pierret, Eric Hess, Jean-Louis Eymond, Guillaume Lesoin, Alain Daelman, Sami Alex Zaimi, Jean Louis Lebonvallet, Denis Vogt

Evaluation of PCI Coals in New Injection Facility at CanmetENERGY-Ottawa ........................................ 926
Shamik Ray, Ka Wing Ng, Louis Giroux, Tony MacPhee, Ted Todoschuk

Combined Blast and Supplemental Fuel Injection Is the Major Way to Improve the Energy Efficiency of Blast Furnace ................................................................. 938
Yakov Gordon, Nikolai Spirin, Vladimir Shvidkii, Yuui Yaroshenko

Analysis of Pulverized Coal and Natural Gas Injection in 5,500-m³ Blast Furnace in Shougang Jingtang ............ 946
Xianglong Meng, Fuming Zhang, Weiqiao Wang, Lin Li, Jianhua Dai
Direct Reduction Ironmaking IV — Coal-Based DRI

Coal Gasification-Based DRI Production: Start-Up and Operation of JSPL's Angul I MXCOL®
DRI Plant ..............................................................................................................................................959
Thomas Wieslaw, G Hughes

DRI Production Using Coke Oven Gas (COG): Results of the MIDREX® Thermal Reactor System™
(TRS®) Testing and Future Commercial Application ..............................................................................966
Gary Metius, Henry Gaines, Michael Riley, Lawrence E. Bool III, Bradley Damstedt

The Physics Simulation Research for Baosteel Corex Reduction Shaft .................................................976
Mingyin Kou, Xiaoming Mao, Haiifa Xu, Jinming Zhu, Wanren Xu

Investigation Into the Reduction Behavior of Iron Ore Fines in Multi-Stages Fluidized Bed Reactor ......983
Hyun-Soo Kim, Chang Kuk Ko, Min Young Cho

Ironmaking Raw Materials III — Flux

Proper Methods of Adding MgO-Bearing Flux in Blast Furnace Process .............................................988
Fengman Shen, Qiulin Wen, Xin Jiang, Haiyan Zheng, Qiangqian Gao, Yupen Hu, Guo Wei, Yansong Shen, Lin Wang

Increasing the Value-in-Use of Magnesium Silicate Fluxes: Tailor-Made MgO/SiO₂ Ratio for Each Application .........................................................................................................................1001
Enrique Somolinos, Esteban Ruisanchez, Cristina Escudero, Javier Martinez

Effect of Flux Addition From Furnace Top on Blast Furnace Operation in Meishan Steel ..................1011
Hong Song Han, Fengman Shen, Zhenghao Zhang, Xin Jiang

Study on the Modification and Crystallization Behaviors of Blast Furnace Smelt Slag for Mineral Fiber Material ......................................................................................................................................1017
Jie Li, Kai Zhao, Yu-zhu Zhang, Weixing Liu, Jun Guo Li

Ironmaking Modeling II — Process Studies

Use of Artificial Neural Network in Determination of Bed Permeability During Drying Stage of Iron Ore Pellets ..............................................................................................................................................1029
Marcelo Chagas, Marcelo Lucas Pereira Machado, João Batista Conti, Eduardo Frigini Frigini

Fundamental Analysis of Passing Behavior of Powder Particle Through Packed Bed by DEM ..............1037
Hiroshi Nogami, Masahiro Fukuda, Takafumi Honda, Jun Suzuki, H Kawai

The Effect of Burden Distribution Modes on Gas Distributions Inside COREX Shaft Furnace by Numerical Simulation .........................................................................................................................1045
Mingyin Kou, Shengli Wu, Wei Shen, Kaiping Du, Zhekai Zhang, Feng Chang, Jinming Zhu

DEM Simulation of Particle Size Segregation of Binary Particle Mixtures in a Quasi-2D Model .........1054
Zhaowen Hu, Dongdong Wang, Fuliang Guo, Chen Chen, Jian Xu, Chenguang Bai

CFD Analysis of Lining Erosion Phenomenon at the Outlet of Top Combustion Hot Blast Stove ..........1061
Dongling Wu, Ping Zhou, Zhiqiang Sun, Chenn Zhou
Blast Furnace Equipment & Maintenance II — Burden Distribution

Improvement of a Bell-Less-Type Charging System for Lower Coke Ratio, CR, Operation at the Blast Furnace ................................................................. 1069
Takafumi Otomo

Effect of Conveyor Angle on Particle Size Segregation in Parallel-Hopper Bell-Less Top by Discrete Element Method ..................................................... 1079
Chao Li, Shusen Cheng, Guolei Zhao, Yanglong Li, Jun Zhao

Innovations in Blast Furnace Charging................................................................ 1089
Peter Whitfield, Joseph Saxiner, Al Colucci

On-Line Laser Detector for BF Burden Surface Profile Measurement .................. 1097
Zhengkai Gao, Jianhua Dai, Jianliang Zhang, Jiyi Luan, Jianguang Lu, Tai Gao, Xin Yang

Investments Facilitating Ironmaking at Reduced Cost ........................................ 1107
David Berdusco, Lionel Hausemer, Philippe Bermes, Fabrice Hansen, Paul Tockert, Steffen Köhler, Ben Muller

Alternate Ironmaking & Resource Recovery

HIsarna — Highly Energy-Efficient Ironmaking .................................................. 1116
Koen Meijer, Jean Borlée, Michael Skorianz, Christoph Feilmayr, Paul Goedert, Rod Dry

A New Process of Oxidation Roasting-Gas-Based Direct Reduction/Electric Furnace Smelting Separation for High-Chromium Vanadium-Titanium Magnetite ............. 1123
Mansheng Chu, Jue Tang, Zhenggen Liu, Cong Feng, Y.T. Tang, X.X. Xue

Application on HIsmelt Smelting Reduction Process in China .......................... 1135
Xianglong Meng, Lin Li, Fuming Zhang, Chaozhen Cao

Reduction Roasting of Boron-Bearing Iron Concentrate for Boron and Iron Recovery .......................... 1146
Peng Gao, Jianwen Yu, Yuexin Han, Xinchao Wei, Yongsheng Sun

Electrowinning of Iron From Waste Solutions .................................................. 1162
Timothy Eisele

Ironmaking Raw Materials IV — Composite Pellets

Effect of Heating Condition on Carbothermic Reduction Behavior of Coal-Containing Composite Pellets Packed in Tall Bed ............................................. 1166
Tsung-Yen Huang, Shih-Hsien Liu, Gang-Herng Shiau

Melting Acceleration of Iron Ore Composite Using Two Kinds of Carbonaceous Materials ......................... 1174
Taichi Murakami, Kanae Owaki, Eiki Kasai

Effects of Coke Mixed Charging Ratio on Softening-Dripping Performance of Vanadium-Titanium Mixed Burden Smelted in Blast Furnace .......................... 1182
Mansheng Chu, Zhenggen Liu, Jue Tang, Siyuan Wang, X.J. Fu, Z. Wang

Comprehensive Utilization of Boron-Bearing Iron Concentrate Based on Carbon Composite Pellet Iron Nugget Technology ................................. 1193
Guang Wang, Jingsong Wang, Xuefeng She, Gingguo Xue
Research on After-Reduction Compressive Strength of Preheated Carbon-Bearing Pellets With Different Coal Size .................................................................1201
Jialong Yang, Chengcheng Xie, Jiaxin Li, Qingming Meng, Chen Liang

Blast Furnace Operating Improvements

Perspective and Challenges of Ironmaking in China .................................................................................1207
Yongzhi Sha, Jun Cao

A Numerical Study of Oxygen Blast Furnace Operation .............................................................................1218
Mikko Helle, Henrik Saxen

The Pilot Expert System to Control Blast Furnace Operation .......................................................................1225
Yakov Gordon, Nikolai Spirin, Vladislav Lavrov, Larisa Gileva, Yu. Yaroshenko

Technological Progress and Prospect of 5,500-m³ Blast Furnace in Shougang Group .................................1233
Hui Chen, Wei-dong Zhang, Jian-long Wu, Bo-cheng Ren Yi, He-shun Zhang, Li-jun Ren

The Cause and Countermeasures of BF Blowpipe Burnout at Tangsteel of HBIS ........................................1248
Zhengkai Gao, Jun Zhao, Yonglong Jin, Jianliang Zhang, Yong Gao, Xin Yang

Ironmaking Poster Session

Technological Improvements to Increase Intensity of Operation of Titania-Magnetite Blast Furnace ....1253
Yakov Gordon, Sergei Filatov, Sergei Zagainov, Valentin Filippov, L. Gileva

Numerical Study on Combustion Process of Top Combustion Hot Blast Stove ...........................................1265
Kuan Yang, Shusen Cheng, Chuan Chen

Crushing and Grinding: How to Turn the Iron Ore Processing More Economic and Efficient .................1274
Gabriela Gois

Preparation of Wustite by Decomposition of Hydrous Ferrous Oxalate or Redox Between Ferric Oxide and Iron ..................................................................................1277
Chenguang Bai, Jian Xu, Dongdong Wang, Zhaowen Hu, Wei He, Liangying Wen

Origin and Migration Behavior of Zinc in Blast Furnace Hearth Brittle Layer ............................................1282
Jianliang Zhang, Kexin Jiao, Zhengjian Liu, Tianjun Yang, Yongan Zhao, Tao Xu

Theory and Practice of Carbon Composite Brick Applied in Blast Furnace Hearth and Bottom ...............1288
Jianliang Zhang, Kexin Jiao, Zhengjian Liu, Tianjun Yang, Tao Xu, Yongan Zhao

Liquid Absorbability of Limonite and Its Influence on the Sinter Indexes .....................................................1300
Shengli Wu, Hatlong Xue, Bo Su, Guoliang Zhang, Tiankai Song, Zhigang Que

Mineralization of Iron Ore Fines in the Process of CAP ............................................................................1309
Guanghui Li, Tao Jiang, Zhengwei Yu, Yuanbo Zhang, Qian Li

Numerical Analysis on Operation Parameters Optimization of Shaft Furnace With Different Areal Gas Distribution Pipe Arrangement ..........................................................1330
Mingyin Kou, Kaiping Du, Shengli Wu, Zhekai Zhang, Feng Chang, Xinliang Liu

Reaction Characteristics of Carbothermic Reduction With Tall Pellets Bed ................................................1342
Research on Metallurgical Properties of Different Types of Titanium Resources ................................. 1355
Jian long Wu, Hui Chen, Ze-jun Ma, Jian Sun, Hai-long Liang

Effect of SiO₂ on the Compressive Strength and Hot Abrasion Resistance of Self-Reducing Pellets Bonded With Portland Cement ................................................................. 1364
Alberto Eloy Anduze Nogueira, Cyro Takano, Marcelo Breda Mourão, Adolfo Pillihuaman Zambrano

Research on Gas-Solid Reduction Reaction Characteristics of Packed Bed in COREX Melter Gasifier ................................................................. 1373
Shengli Wu, Zhekai Zhang, Mingyin Kou, Hua Lu, Liyuan Chen, Kaiping Du

Effect of Coke Breeze Distribution on Coke Combustion Rate of the Quasi-Particle ........................................ 1382
Hiroshi Ogi, Takayuki Maeda, Ko-ichiro Ohno, Kazuya Kunitomo

Analysis of the Carbon-Saving Potential for Blast Furnace With the Injection of the Gas Made From Coal ................................................................. 1394
Qing Lyu, Yana Qie, Shuhui Zhang, Xinyuan Zhang, Xiaojie Liu

Effect of Mill Scale Adding Methods on NOx Emission of Coke Combustion During Iron Ore Sintering ......................... 1406
Bo Su, Zhigang Que, Shengli Wu, Guoliang Zhang, Chaogang Hou

Influence of Chemical Compositions on Liquid Fluidity of Ferrite ................................................................. 1415
Bo Su, Shengli Wu, Wei Huang, Ji-Cheng Bei, Juan Zhu

Research on Pelletizing Dynamics of Iron and Steel Plant Metallurgical Dust ................................................................. 1424
Mingyin Kou, Shengli Wu, Hua Lu, Feng Chang, Kaiping Du, Hong Li

Analysis of Influencing Factors on Silicon Content in Hot Metal From COREX Process ................................................................. 1433
Mingyin Kou, Shengli Wu, Yao Jiang, Wei Shen, Kaiping Du

Ironmaking Across the Globe

Ironmaking in North America ........................................................................................................ 1443
Louis W. Lherbier Jr., John A. Ricketts

Developments in Ironmaking in South America .................................................................................. 1452
Jorge Luiz Ribeiro de Oliveira, Francisco Coutinho Dornelas, Erick Torres Bispo dos Santos, Jorge Adelino de Faria, Edson Luiz Massonori Harano

Current Status and Future Perspective of Japanese Ironmaking Technology for Environmental Solution ................................................................. 1463
Koji Saito, S. Nomura

The Past, the Present and the Prospects of Ironmaking in China ........................................................................ 1472
Xuegong Bi, Shourong Zhang

Ironmaking in Western Europe — Status Quo and Future Trends ........................................................................ 1481
Hans Bodo Luengen, Michael Peters, Peter Schmöle

Ironmaking in South Korea — Beyond the Blast Furnace ........................................................................ 1491
Hoo-Guen Lee, Sang-Ho Yi
Ironmaking Environmental Developments I

Effect of Lime Coating Coke on Decreasing NOx Emission From Sintering Process .......................... 1499
Masaru Matsumura, Kazuaki Katayama, Shunji Kasama, Kenji Sato

Influence of Iron Ores on the NOx Emission of Coke Combustion in the Sintering Process ............. 1511
Yongzhong Zhang, Shengli Wu, Guoliang Zhang, Zhigang Que, Li Zhang

The Design and Operation of a Dust Tower for Studying the Dustiness of Raw Materials for Ironmaking ............................................................. 1521
Joseph Halt, S. Komar Kawatra

Injecting Different Types of Biomass to the Blast Furnace and Their Impacts on the CO2 Emission Reduction .......................................................... 1525
Jan-Olov Wikström, Chuan Wang, Pelle Mellin, Leif Nilsson, Jonas Lövgren, Mikael Larsson

Ironmaking/Computer Modeling

Investigation of High Rate Natural Gas Injection Through Various Lance Designs in a Blast Furnace ................................................................................. 1536
Armin Silaen, Tyamo Okosun, Yan Chen, Bin Wu, Jiaqi Zhao, Yongfu Zhao, John D'Alessio, Jerry Capo, Chenn Q. Zhou

Multi-Phase Flow Simulation in Blast Furnace by MPS-SMAC Coupling Model ........................................ 1550
Tatsuya Kon, Shigeru Ueda, Nobuhiro Maruoka, Hiroshi Nagami

Optimized Blast Furnaces Operation With Integrated Burden Control .............................................. 1558
Martin Schaler, Harald Fritschek, Thomas Kronberger, Bernhard Schürz

Numerical Analysis of Injection of Liquid Hydrocarbons, Processed Waste Plastics and Pulverized Coal Into Blast Furnace Raceways ......................................................... 1569
Christian Maier, Christian Jordan, Christoph Feilmayr, Christoph Thaler, Michael Harasek

Investigation of Co-Injection of Natural Gas and Pulverized Coal in a Blast Furnace ..................... 1581
Tyamo Okosun, Stuart J. Street, Yan Chen, Jiaqi Zhao, Bin Wu, Chenn Q. Zhou

Drain Rate and Liquid Level Simulation in Blast Furnace Hearth ...................................................... 1595
Hemant Upadhyay, Tarun Kumar Kundu
