*Fares Kayali, Konrad Peters, Jens Kuczwar, Andrea Reithofer,*  
*Daniel Martinek, Rebecca Wölfle, Ruth Mateus-Berr,*  
*Zsuzsanna Lehner, Marisa Silbernagl, Manuel Sprung,*  
*Anita Lawitschka, and Helmut Hlavacs*

Design and Development of Sur-Face: An Interactive Mobile App for Educating Patients Regarding Corrective Surgery of Facial Deformities ... 26  
*Yeshwanth Pulijala, Minhua Ma, and Ashraf Ayoub*

ALFRED Back Trainer: Conceptualization of a Serious Game-Based Training System for Low Back Pain Rehabilitation Exercises ............ 36  
*Sandro Hardy, Florian Feldwieser, Tim Dutz, Stefan Göbel,*  
*Ralf Steinmetz, and Elisabeth Steinhagen-Thiessen*

### Games for Learning

From Game Characteristics to Effective Learning Games: 
Evaluation of a Component-Based Quiz Game ........................................ 51  
*Philip Mildner, Nicolas Stamer, and Wolfgang Effelsberg*

Educational Opportunities of a Social Network Game: 
A Review of Possible Learning Outcomes .............................................. 63  
*Heinrich Söbke and Jörg Londong*

Blitzmerker: Learning Idioms with a Mobile Game ................................. 77  
*Laila Shoukry, Polona Caserman, Stefan Göbel, and Ralf Steinmetz*
Games for Other Purposes

Bringing Biome Exploration into the Classroom Through Interactive Tablet Experiences ................................................. 91
  Michael G. Christel, Jessica Trybus, Siddhant D. Shah,
  Bo Hsuan Chang, Roma Dave, Adarshkumar Pavani, Ojas D. Sawant,
  Jemin Song, James Inglis, Sai Shashank Kairamkonda, Christian Karrs,
  Xuyan Ke, Eric Kron, and Xinghu Lu

A Hypothesis of Brain-to-Brain Coupling in Interactive New Media Art and Games Using Brain-Computer Interfaces ............................................. 103
  Polina Zioga, Paul Chapman, Minhua Ma, and Frank Pollick

Literary Play: Locative Game Mechanics and Narrative Techniques for Cultural Heritage .................................................. 114
  Mads Haahr

Game Design and Development

Casanova: A Simple, High-Performance Language for Game Development ................................................................. 123
  Mohamed Abbadi, Francesco Di Giacomo, Agostino Cortesi,
  Pieter Spronck, Giulia Costantini, and Giuseppe Maggiore

iATTAC: A System for Autonomous Agents and Dynamic Social Interactions – The Architecture ............................................. 135
  Edgar Cebolledo and Olga De Troyer

Why Is This So Hard? Insights from the State Space of a Simple Board Game .......................................................... 147
  Mareike Bockholt and Katharina Anna Zweig

Social Network Analysis and Gaming: Survey of the Current State of Art ................................................................. 158
  Wolfgang Eugen Schlauch and Katharina Anna Zweig

Poster and Demo Papers

Prevention in Addiction: Using Serious Games to (re)train Cognition in Dutch Adolescents ............................................. 173
  Wouter J. Boendermaker, Pier J.M. Prins, and Reinout W. Wiers

“How to Fail Your Research Degree”: A Serious Game for Research Students in Higher Education ..................................... 179
  Daisy Abbott
LiverDefense: An Educational Tower Defense Game as an Evaluation Platform .................................................. 186
  Julia Brich, Julian Frommel, Katja Rogers, Adrian Brückner,
  Martin Weidhaas, Tamara Dorn, Sarah Mirabile, Valentin Riemer,
  Claudia Schrader, and Michael Weber

Combining the Virtual and Physical Interaction Environment ............ 191
  Stephen Hibbert

Author Index ................................................................. 195
