CONTENTS

Foreword		v
Preface		ix
Acknowledgements		xi
About the Authors		xiii
List of Abbreviations		xvii
Chapter 1	Introduction	1
1.1	Lasers for Manufacturing	1
1.2	Lasers for 3D Printing	2
1.3	Current State of the Art	3
1.4	The Book: Major Focus	7
	Problems	10
	References	10
Chapter 2	Lasers and Basic Optics for 3D Printing and Manufacturing	15
2.1	Introduction	15
2.2	Interaction of Light with Materials: Different Aspects	16
2.3	Effect of Different Parameters	20
2.4	Laser: Basic Components	24
2.5	Laser Beam: Characteristics	26
2.6	Laser Beam: Beam Forming Optics	30
2.7	Representative Lasers in 3D Printing and Manufacturing	36
2.8	Summary	43
	Problems	43
	References	44

Chapter 3	Materials for Laser-based 3D Printing and Manufacturing	49
3.1	Introduction	49
3.2	Materials for 3D Printing and Manufacturing	51
3.3	Polymers	55
3.4	Metals	60
3.5	Ceramics	66
3.6	Composites	69
3.7	Other materials	70
3.8	Optical Properties of Materials in Laser-based Processing	72
	Problems	87
	References	88
Chapter 4	One-, Two-, and Three-Dimensional Laser-Assisted Manufacturing	93
4.1	Introduction	93
4.2	Laser Beam Machining (LBM)	94
4.3	Oxy-Laser Cutting	97
4.4	Three-Dimensional Processes	99
4.5	Basic Components of a LM System	100
4.6	Effect of State of Polarisation (SOP) of Laser Beam on Machining	102
4.7	Laser Equipment Characteristics	104
4.8	CW Laser and UV Laser Machining	111
4.9	UV Laser Machining: Salient Features	112
4.10	Laser Machining Applications	116
4.11	Summary	116
	Problems	117
	References	118
Chapter 5	Laser-based 3D Printing	121
5.1	Introduction	121
5.2	Liquid-Based 3D Printing	123
5.3	Powder-Based 3D Printing	143
5.4	Solid-Based 3D Printing	162
	Problems	166
	References	167

Chapter 6	Advanced 3D Manufacturing: Micro and Nanoscale Patterning	175
6.1	Introduction	175
6.2	Interference	176
6.3	Two-Beam Interference	178
6.4	Laser Interference Lithography	179
6.5	Four-Beam Interference	183
6.6	Fabrication System and Methodology	184
6.7	Ultrafast Laser Machining	184
6.8	Summary	193
	Problems	193
	References	194
Chapter 7	Laser Safety and Hazards	197
7.1	Introduction	197
7.2	Basic Hazards from Lasers	198
7.3	Laser Ratings and Safety Standards	213
7.4	Radiation Exposure and Laser Goggle Selection	221
7.5	Precautions and Exemplary Hazardous Cases	229
	Problems	232
	References	233
Chapter 8	Future Prospects	237
8.1	Introduction	237
8.2	Trends in Next-Generation 3D Printing	238
8.3	Future Prospects for Each Technical Chapter	244
8.4	Future Applications of Laser-based 3D Printing	248
8.5	Summary	250
	Problems	251
	References	252
