CONTENTS

INVITED SPEAKERS

KEYNOTE SPEAKERS

Cloud Computing - State-of-the-Art and Future Research Trends
Eleni Karatza

Connecting Services to the Web of Data
John Domingue

What Do We Know and How Well Do We Know It? Current Knowledge about Software Engineering Practices
David Budgen

ENTERPRISE SOFTWARE TECHNOLOGIES

FULL PAPERS

Towards Outsource-ability Enabled BPMN
Mouna Rekik, Khouloud Boukadi and Hanene Ben-Abdallah

A Review of Detecting and Correcting Deviations on Software Processes
Manel Smatti, Mourad Oussalah and Mohamed Ahmed Nacer

Cloud Description Ontology for Service Discovery and Selection
Molka Rekik, Khouloud Boukadi and Hanene Ben-abdallah

SHORT PAPERS

How does Oracle Database In-Memory Scale out?
Niloy Mukherjee, Kartik Kulkarni, Hui Jin, Jesse Kamp and Tirthankar Lahiri

ROCL: New Extensions to OCL for Useful Verification of Flexible Software Systems
Hanen Grichi, Olfa Mosbah and Mohamed Khalgui

Design and Implementation of Multiple Fiber Online Monitoring of and Fault Automatic Detecting System
Wanchang Jiang, Liang Zhao and Shengda Wang

Towards a Unified Platform for Agent-based Cloud Robotics
Francisca Rosique, Pedro Sánchez, Diego Alonso and Juan Antonio López

QS Mapper: A Transparent Data Aggregator for the Quantified Self - Freedom from Particularity Using Two-way Mappings
Rasmus Rosenqvist Petersen, Adriana Lukas and Uffe Kock Will

Analyzing Taiwan Bridge Management System for Decision Making in Bridge Maintenance - A Big Data Approach
Nie-Jia Yau and Yu-Han Chuang

Semantic and Structural Performer Clustering in BPMN Models Transformed into Social Network Models
Wiem Khlif and Hanène Ben-abdallah
How Trajectory Data Modeling Improves Decision Making?  
Noura Azaiez and Jalel Akaichi  

Formalization of Secure Service Oriented Product Line  
Ines Achour, Lamia Labed and Henda Ben Ghezala

SOFTWARE PROJECT MANAGEMENT

FULL PAPER

Defining and Evaluating Software Project Success Indicators - A GQM-based Case Study  
Luigi Lavazza, Enrico Frimento and Riccardo Mazza

SHORT PAPERS

Using Property Rights Theory to Overcome Success Barriers to Software Development Project: Protection of Contractors’ Knowledge  
Cornelia Gaebert

Who Are the Rational Actors in Software Development Projects?  
Cornelia Gaebert and Jörg Friedrich

Establishing Construction Scheduling Progress Curve based on Buidling Information Modeling Quantity Takeoffs  
Kun-Chi Wang, Wei-Hao Wu, Pei-Yuan Hsu, Abdoul-Aziz Gansonre, Wei-Chih Wang and Cheng-Ju Kung

Optimizing Construction Sequences for Secant Pile Walls  
Rong-Yau Huang, Ping-Fu Chen and Jieh-Haur Chen

Critical Success Factors and Barriers for Lightweight Software Process Improvement in Agile Development - A Literature Review  
Elia Kouzari, Vassilis C. Gerogiannis, Ioannis Stamelos and George Kakarontzas

A Framework to Evaluate Software Developer’s Productivity - The VALORTIA Project  

Understanding Approval Rating of Agile Project Management Tools using Twitter  
Martina Matta and Michele Marchesi

Certification and Legislation - An Italian Experience of Fiscal Software Certification  
Isabella Biscoglio, Giuseppe Lami, Eda Marchetti and Gianluca Trentanni

SOFTWARE ENGINEERING METHODS AND TECHNIQUES

FULL PAPERS

Multi-dimensional Goal Refinement in Goal-Oriented Requirements Engineering  
Wataru Inoue, Shinpei Hayashi, Haruhiro Kiiya and Motoshi Saeki

Design for Excellence in the Context of Very Large-Scale Requirements Engineering  
Sanja Aaramaa, Samuli Saukonen, Jarkko Hyysalo, Jouni Similä, Pasi Kuvaja and Markku Oivo

Integrating and Applying Architectural Design Patterns in Space Flight Software Product Lines  
Julie Street Fant, Hassan Gomaa and Robert G. Pettit
A Method for Model Checking Feature Interactions
Thomas Pedersen, Thibaut Le Guilly, Anders P. Ravn and Arne Skou

An Approach for the Semi-automated Derivation of UML Interaction Models from Scenario-based Runtime Tests
Thorsten Haendler, Stefan Sobernig and Mark Strembeck

An Approach for Automated Scenario-based Testing of Distributed and Heterogeneous Systems
Bruno Lima and João Pascoal Faria

SHORT PAPERS

Reactivity and Social Cooperation in a Multi-Robot System
Atef Gharbi, Nadhir Ben Halima and Hamza Gharsellaoui

Reverse Engineering an iPhone Applications using Dynamic Analysis
Philippe Dugerdil and Roland Sako

Business Modeling of a Measurement-based Context: A Methodological Process
Giulio D’Emilia, Gaetanino Paolone, Emanuela Natale, Antonella Gaspari and Denis Del Villano

Automatic Generation of Test Data for XML Schema-based Testing of Web Services
Dessislava Petrova-Antonova, Kunka Kuncheva and Sylvia Ilieva

Towards Knowledge-intensive Software Engineering
Samuel R. Cauvin, Derek Sleeman and Wamberto W. Vasconcelos

A Visualization Tool for Scenario-based Software Development
Eiji Shiota and Atsushi Ohnishi

Change Effort Estimation based on UML Diagrams Application in UCP and COCOMOII
Dhikra Kchaou, Nadia Bouassida and Hanene Ben-Abdallah

A Domain Specific Platform for Engineering Well Founded Measurement Applications
Florent Bourgeois, Philippe Studer, Bernard Thirion and Jean-Marc Perronne

A Path-based Equivalence Checking Method for Petri Net based Models of Programs
Soumyadip Bandypadhyay, Dipankar Sarkar, Kunal Banerjee and Chittaranjan Mandal

New Schedulability Analysis for Real-Time Systems based on MDE and Petri Nets Model at Early Design Stages
Mohamed Naija, Samir Ben Ahmed and Jean-Michel Bruel

Extending Causal Semantics of UML2.0 Sequence Diagram for Distributed Systems
Fatma Dhaou, Ines Mouakher, Christian Attigbé and Khaled Bsaies

Analysing the Reliability of Open Source Software Projects
Lerina Aversano and Maria Tortorella

Modeling Traceability for Heterogeneous Systems
Nasser Mustafa and Yvan Labiche

Extracting Knowledge for Searching for and Identifying Hazards on Construction Site
Ren-Jye Dzeng and Yi-Cho Fang

GR-TNCES: New Extensions of R-TNCES for Modelling and Verification of Flexible Systems under Energy and Memory Constraints
Oussama Khliﬁ, Olfa Mosbah, Mohamed Khalgui and Georg Frey
Towards More Relational Feature Models
*Arnaud Gotlieb, Dusica Marijan and Sagar Sen*

Using Aspect-Oriented Approach for Software Product Line Development
*Lei Tan and Yuqing Lin*

Towards Gamification in Software Traceability: Between Test and Code Artifacts
*Reza Meimandi Parizi, Asem Kasem and Azween Abdullah*

Designing and Describing QVTo Model Transformations
*Ulyana Tikhonova and Tim Willemse*

Using GDT4MAS as a Formal Support for Engineering Multi-Agents Systems
*Bruno Mermet and Gaëlle Simon*

Design of Adaptive Domain-Specific Modeling Languages for Model-Driven Mobile Application Development
*Xiaoping Jia and Christopher Jones*

Usability Evaluation Methods for Spatial Information Visualisation - Case Study: Evaluation of Tourist Maps
*Pavel Sedlák, Jitka Komárková, Miloslav Hub, Stanislav Struška and Miroslav Pásler*

Opportunistic Software Composition: Benefits and Requirements
*Charles Triboulot, Sylvie Trouilhet, Jean-Paul Arcangeli and Fabrice Robert*

A UML KPI Profile for Energy Aware Design and Monitoring of Cloud Services
*Christophe Ponsard and Jean-Christophe Deprez*

**DISTRIBUTED AND MOBILE SOFTWARE SYSTEMS**

**SHORT PAPERS**

Parallel Applications and On-chip Traffic Distributions: Observation, Implication and Modelling
*Thomas Canhao Xu, Jonne Pohjankukka, Paavo Nevalainen, Ville Leppänen and Tapio Pahikkala*

A Proposal of Web Data Mining Application for Mapping Crime Areas in the Czech Republic
*Martin Lněnička, Jan Hovad, Jitka Komárková and Miroslav Pásler*

Iterative Mapreduce MPI Oil Reservoir Simulator
*Madina Mansurova, Darkhan Akhmed-Zaki, Adai Shomanov, Bazargul Maktirim and Ermek Alimzhanov*

Spatio-Temporal Normalization of Data from Heterogeneous Sensors
*Alessio Fanelli, Daniela Micucci, Marco Mobilio and Francesco Tisato*

Wise Objects for Calm Technology
*Ilham Alloui, David Esale and Flavien Vernier*

**AUTHOR INDEX**
