2015 IEEE Eighth International Conference on Software Testing, Verification and Validation Workshops

(ICSTW 2015)

Graz, Austria
13-17 April 2015

IEEE Catalog Number: CFP1502F-POD
ISBN: 978-1-4799-1886-7
2015 IEEE Eighth International Conference on Software Testing, Verification and Validation Workshops (ICSTW)

Table of Contents

11th Workshop on Advances in Model Based Testing (A-MOST)

- Message from the chairs  1
  Mike Papadakis, Levi Lucio and Gilles Perrouin
- A Test Automation Language Framework for Behavioral Models  3
  Nan Li and Jeff Offutt
- On Model-Based Testing Advanced GUIs  13
  Valria Lelli, Arnaud Blouin, Benoit Baudry and Fabien Coulon
- Test Generation from Timed Pushdown Automata with Inputs and Outputs  23
  Hana MHemdi, Jacques Julliand, Pierre-Alain Masson and Riadh Robbana
- Model-based Approach for Automated Test Case Generation from Visual Requirement Specifications  33
  Kapil Singi, Dipin Era and Vikrant Kaulgud
- Covering both Stack and States while Testing Push-down Systems  39
  Pierre-Cyrille Ham and Hana MHemdi
- A Model-Based Testing Technique for Component-Based Real-Time Embedded Systems  46
  Jing Guan and Jeff Offutt
- State Machine Flattening, a Mapping Study and Tools Assessment  56
  Xavier Devroey, Maxime Cordy, Pierre-Yves Schobbens, Axel Legay and Patrick Heymans
- Towards Generation of Adaptive Test Cases from Partial Models of Determinized Timed Automata  64
  Bernhard K. Aichernig and Florian Lorber

13th User Symposium on Software Quality, Test and Innovation (ASQT)

- Message from the chairs  70
  Dietmar Wuksch and Bernhard Peischl
- Scaled Agile Framework - Presentation and Real World Example  72
  Richard Brenner and Stefan Wunder
- A Guide to Lean Software Development in Action  74
  Andrea Janes
- PMBOK vs. Agile Methods - How cultural change can become transparent  76
  Wolfgang Richter
- Test Automation for NFC ICs using Jenkins and NUnit  78
  Stephan Puri-Jobi
Designing sustainable information systems for organizations operating in safety critical environments  
Wolfgang Vorraber, Gerald Lichtenegger, Dietmar Neubacher, Siegfried Voessner

Security Tests for Mobile Applications - Why using TLS/SSL is not enough.  
Peter Kieseberg, Peter Frühwirt, Sebastian Schrittweiser and Edgar Weippl

A Survey On Mobile Users Software Quality Perceptions and Expectations  
Andr Nitze, Andreas Schmietendorf

Implementing Tool Support for Analyzing Stakeholder Communications in Software Development  
Vladimir A. Shekhovtsov, Heinrich C. Mayr, Matija Kucko

Automated Testing in the Cloud - Test Infrastructure Management with SaaS  
Georg Hansbauer

From Agile Software Development to the Sharing Economy and the Collaborative Commons - Social Apps for Enterprises  
Herbert Wagger

Scaling a running agile fix-bid project with near shoring - Theory vs. reality and (best) practice  
Violetta J. Wawryk, Christian Krenn and Thomas Dietinger

nCanto - An agile software development case study  
Wolfgang Richter

Automated Testing in the Continuous Delivery Pipeline: A Case Study of an Online Company  
Johannes Gmeiner, Rudolf Ramler and Julian Haslinger

Testing Big Data (Assuring the Quality of Large Databases)  
Harry M. Sneed and Katalin Erdoes

2nd International Workshop on Software Test Architecture (InSTA)

Test Driven Development for Device Drivers and Rapid Hardware Prototyping  
Dominic Eschweiler and Volker Lindenstruth

Design principles in Test Suite Architecture  
Yasuharu Nishi

Automated Compatibility Testing Method for Software Logic by Using Symbolic Execution  
Keiji Uetsuki, Tohru Matsuodani and Kazuhiko Tsuda

Mining process models and architectural components from test cases  
Vipul Shah, Chetan Khadke and Sunjit Rana

A Study on an Approach for Analysing Test Basis Using I/O Test Data Patterns  
Tsuyoshi Yumoto, Tohru Matsuodani and Kazuhiko Tsuda

Semantic Analysis Technique of Logics Retrieval for Software Testing from Specification Documents  
Satoshi Masuda, Futoshi Iwama, Nobuhiro Hosokawa, Tohru Matsuodani and Kazuhiko Tsuda
4th International Workshop on Combinatorial Testing (IWCT)

- Message from the chairs 166
  Angelo Gargantini, Jacek Czerwonka, Raghu Kacker, Richard Kuhn, Yu Lei and Itai Segall

- Embedded Functions in Combinatorial Test Designs 168
  George B. Sherwood

- Introducing Combinatorial Testing in the Organization a Report on a First Attempt 178
  Douglas Hillmer

- Combining Minimization and Generation for Combinatorial Testing 187
  Itai Segall, Rachel Tzoref-Brill and Aviad Zlotnick

- A First Systematic Mapping Study on Combinatorial Interaction Testing for Software Product Lines 196
  Roberto E. Lopez-Herrejon, Stefan Fischer, Rudolf Ramler and Alexander Egyed

  Josip Bozic, Bernhard Garn, Dimitris E. Simos and Franz Wotawa

- A process for nonfunctional combinatorial testing - Selection of parameter values from a nondiscrete domain space 216
  Siegmard Züße and Venkataraman Krishnamoorthy

- Combinatorial Interaction Testing of Tangled Configuration Options 220
  Arsalan Javeed and Cemal Yilmaz

- Relationship between Pair-wise and MC/DC Testing: Initial Experimental Results 224
  Sergiy Vilkomir and David Anderson

- Why Combinatorial Testing Works - Analyzing Minimal Failure-Causing Schemas in Logic Expressions 228
  Ziyuan Wang and Yuanchao Qi

- Constraint Handling In Combinatorial Test Generation Using Forbidden Tuples 233
  Linbin Yu, Feng Duan, Yu Lei, Raghu N. Kacker and D. Richard Kuhn

- Using Decision Trees to aid Algorithm Selection in Combinatorial Interaction Test Generation 242
  Angelo Gargantini and Paolo Vavassori

- Flattening or Not of the Combinatorial Interaction Testing Models? 252
  Christopher Henard, Mike Papadakis and Yves Le Traon

- Improving IPOGs Vertical Growth Based on a Graph Coloring Scheme 256
  Feng Duan, Yu Lei, Linbin Yu, Raghu N. Kacker and D. Richard Kuhn

- Equivalence Class Verification and Oracle-free Testing Using Two-layer Covering Arrays 264
  D. Richard Kuhn, Raghu N. Kacker, Yu Lei and Jose Torres-Jimenez

- BEN: A Combinatorial Testing-Based Fault Localization Tool 268
  Laleh Sh. Ghandehari, Jaganmohan Chandrasekaran, Yu Lei, Raghu Kacker and D. Richard Kuhn
10th International Workshop on Mutation Analysis (Mutation)

- Message from the chairs 272
  Mike Papadakis and Ren Just

- Faster Mutation-based Fault Localization With A Novel Mutation Execution Strategy 274
  Pei Gong, Ruilian Zhao and Zheng Li

- Mutation Testing of Memory-Related Operators 284
  Jay Nanavati, Fan Wu, Mark Harman, Yue Jia and Jens Krinke

- Towards Mutation Analysis of Android Apps 294
  Lin Deng, Nariman Mirzaei, Paul Ammann, and Jeff Offutt

- Kernel Density Adaptive Random Testing 304
  Matthew Patrick and Yue Jia

- Rehabilitating equivalent mutants as static anomaly detectors in software artifacts 314
  Paolo Arcaini, Angelo Gargantini, Elvira Riccobene and Paolo Vavassori

- Mutation Testing in Practice using Ruby 320
  Nan Li, Michael West, Anthony Escalona and Vinicius H. S. Durelli

- Static Analysis of Mutant Subsumption 326
  Bob Kurtz, Paul Ammann and Jeff Offutt

- Towards Systematic Mutations for and with ATL Model Transformations 336
  Javier Troya, Alexander Bergmayr, Loli Burgueño and Manuel Wimmer

- Mutating Aspect-Oriented Models to Test Cross-Cutting Concerns 346
  Birgitta Lindström, Sten F. Andler, Jeff Offutt, Paul Pettersson, and Daniel Sundmark

- Definition and Evaluation of Mutation Operators for GUI-level Mutation Analysis 356
  Rafael A.P. Oliveira, Emil Algroth, Zebao Gao and Atif Memon

6th International Workshop on Security Testing (SECTEST)

- Dynamic Phishing Content Using Generative Grammars 366
  Sean Palka and Damon McCoy

- Security Testing for Android mHealth Apps 374
  Konstantin Knorr and David Aspinall

- A Novel Simulation Approach for Fault Injection Resistance Evaluation on Smart cards 382
  Lionel Rivire, Julien Bringer, Thanh-Ha Le and Herv Chabanne

- Automated Testing of IDS Rules 390
  Zeeshan Afzal and Stefan Lindskog

- Tool Support for Secure Programming by Security Testing 392
  Keqin Li, Cédric Hebert, Jan Lindemann, Michael Sauter, Holger Mack, Tom Schröer, Abhay Tiple
10th Testing: Academic and Industrial Conference - Practice and Research Techniques (TAIC PART)

  Nadia Alshahwan, Michael Felderer and Rudolf Ramler

- Combining Model-Based and Risk-Based Testing for Effective Test Case Generation 398
  Ceren Şahin Gebizli, Duygu Metin and Hasan Szer

- Requirements Document Based Test Scenario Generation for Web Application Scenario Testing 402
  Xiaojing Zhang and Haruto Tanno

- Testing AUTOSAR software with QuickCheck 405
  Thomas Arts, John Hughes, Ulf Norell, Hans Svensson

- Testing of a telecommunication protocol using constraint programming 409
  Olga Grinchtein, Mats Carlsson and Justin Pearson

- Test Automation for Multi-touch User Interfaces of Industrial Applications 412
  Thomas Wetzlmaier and Mario Winterer

- Writing Unit Tests: Its Now or Never! 415
  Claus Klammer and Albin Kern

- Mapping software testing practice with software testing research - SERP-test taxonomy 419
  Emelie Engström, Kai Petersen

- A Process to Increase the Model Quality in the Context of Model-Based Testing 423
  Vladimir Entin, Mathias Winder, Bo Zhang and Andreas Claus

- Lessons learnt from using DSLs for Automated Software Testing 430
  Mark Micallef and Christian Colombo

- Graphical editing support for QuickCheck models 436
  Thomas Arts, Kirill Bogdanov, Alex Gerdes and John Hughes

- Automotive System Testing by Independent Guarded Assertions 442
  Thomas Gustafsson, Mats Skoglund, Avenir Kobetski and Daniel Sundmark

- Software Quality Research - from Processes to Model-based Techniques 449
  Bernhard Peischl

- Beyond Code Coverage an Approach for Test Suite Assessment and Improvement 455
  Dvid Tengeri, rpd Beszdes, Tams Gergely, Lszl Vides, Dvid Havas, Tibor Gymphthy

- A Learning-Based Method for Detecting Defective Classes in Object-Oriented Systems 462
  Çagil Biray and Feza Buzluca

- Supporting Software Product Line Testing by Optimizing Code Configuration Coverage 470
  Lszl Vides, Ferenc Horveth, Jozef Mihalicza, Bla Vancsics and rpd Beszdes
