COMPUTER-AIDED CHEMICAL ENGINEERING, 37

12TH INTERNATIONAL SYMPOSIUM ON PROCESS SYSTEMS ENGINEERING AND 25TH EUROPEAN SYMPOSIUM ON COMPUTER AIDED PROCESS ENGINEERING

PART A

Edited by

Krist V. Gernaey, Jakob K. Huusom and Rafiqul Gani

Department of Chemical and Biochemical Engineering
Technical University of Denmark
DK-2800 Lyngby, Denmark
## Comments

**Preface**  
**Committees**  
**Local Organising Committee**  
**Sponsors**

## Plenary Papers

**Recent advances in mathematical programming techniques for the optimization of process systems under uncertainty**  
*Ignacio E. Grossmann, Robert M. Apap, Bruno A. Calfa, Pablo Garcia-Herreros, Qi Zhang*

**A multidisciplinary hierarchical framework for the design of consumer centered chemical products**  
*Ka M. Ng*

**Multi-Level design of process systems for efficient chemicals production and energy conversion**  
*Kai Sundmacher*

## Keynote Papers

**PSE tools for process intensification**  
*Philip Lutze*

**Towards the integration of process design, control and scheduling: Are we getting closer?**  
*Efstratios N. Pistikopoulos, Nikolaos A. Diangelakis, Amit M. Manthanwar*

**Industrially applied PSE for problem solving excellence**  
*Antoon J. B. ten Kate*

**Sustainable production of liquid fuels**  
*Jonathan P. Raftery, M. N. Karim*

**Industrial perspectives on the deployment of scheduling solutions**  
*Iiro Harjunkoski*

**Overview of smart factory studies in petrochemical industry**  
*Defang Li, Baihua Jiang, Hansheng Suo, Ya Guo*

**A PSE approach to patient-individualized physiologically-based pharmacokinetic modeling**  
*Roberto Andrea. Abbiati, Gaetano Lamberti, Anna Angela. Barba, Mario Grassi, Davide Manca*

**Modeling and optimization of continuous pharmaceutical manufacturing processes**  
*Amanda Rogers, Marianthi Ierapetritou*

Contributed Papers

T-1: Modelling, Numerical Analysis and Simulation

Optimization of chemical processes using surrogate models based on a kriging interpolation

*Natalia Quirante, Juan Javaloyes, Rubén Ruiz-Femenia, José A. Caballero*

Global sensitivity analysis for a model of B-Cell chronic lymphocytic leukemia disease trajectories

*Symeon V. Savvopoulos, Ruth Misener, Nicki Panoskaltsis, Efstratios N. Pistikopoulos, Athanasios Mantalaris*

Modelling and simulation of complex nonlinear dynamic processes using data based models: application to photo-fenton process

*Ahmed Shokry, Francesca Audino, Patricia Vicente, Gerard Escudero, Montserrat Perez Moya, Moises Graells, Antonio Espuña*

A meshfree maximum entropy method for the solution of the population balance equation

*Menwer Attarakih, Abdelmalek Hasseine, Hans-Jörg Bart*

Modelling the hydrodynamics of bubble columns using coupled OPOSPM-maximum entropy method

*Menwer Attarakih, Ferdaous Al-Slaihat, Mark W. Hlawitschka, Hans-Jörg Bart*

Process simulation of a 420MW gas-fired power plant using Aspen Plus

*Bao-Hong Li, Nan Zhang, Robin Smith*

Optimal blending study for the commercial gasoline

*Cristian Patrascioiu, Bogdan Doicin, Grigore Stamatescu*

Population balance model for enzymatic depolymerization of branched starch

*Christoph Kirse, Heiko Briesen*

Analysis of the transfer of radical co-polymerization systems from semi-batch to continuous plants

*Thilo Goerke, Sebastian Engell*

Thermodynamic calculations for systems biocatalysis

*Rohana Abu, Maria T. Gundersen, John M. Woodley*

Parallel computation method for solving large scale equation-oriented models

*Yannan Ma, Jinzu Weng, Zhijiang Shao, Xi Chen, Lingyu Zhu, Yuhong Zhao*

Dynamic investment appraisal: Economic analysis of mobile production concepts in the process industry

*G. Bas, T. E. Van der Lei*
Prediction of heat capacity of ionic liquids based on COSMO-RS Sα-profile
Yongsheng Zhao, Ying Huang, Xiangping Zhang, Suojiang Zhang 251

OPOSSIM: A population balance-SIMULINK module for modelling coupled hydrodynamics and mass transfer in liquid extraction equipment
Menwer Attarakih, Samer Al-Zyod, Mark Hlawitschke, Hans-Jörg Bart 257

CFD-DEM simulation of a fluidized bed crystallization reactor
Kristin Kerst, Luis Medeiros de Souza, Antje Bartz, Andreas Seidel-Morgenstern, Gábor Janiga 263

A modelling, simulation, and validation framework for the distributed management of large-scale processing systems
Shaghayegh Nazari, Christian Sonntag, Goran Stojanovski, Sebastian Engell 269

Performance analysis and optimization of the biomass gasification and Fischer-Tropsch integrated process for green fuel Productions
Karittha Im-orb, Lida Simasatitkul, Amornchai Arpornwichanop 275

Dynamic behavior adjustment of 1, 3-propanediol fermentation process
Hao Jiang, Nan Zhang, Jinsong Zhao, Tong Qiu, Bingzhen Chen 281

Modelling and simulation of pressure swing adsorption (PSA) processes for post-combustion carbon dioxide (CO₂) capture from flue gas
George N. Nikolaidis, Eustathios S. Kikkinides, Michael C. Georgiadis 287

Validation of a functional model for integration of safety into process system design
Wu, J., Lind, M., Zhang, X., Jørgensen, S. B., Sin, G 293

A dynamic method for computing thermodynamic equilibria in process simulation
Alexander Zinser, Kongmeng Ye, Liisa Rihko-Struckmann, Kai Sundmacher 299

Dynamics and operation analysis of the PHB (polyhydroxybutyrate) fermentation
Moises González-Contreras, Omar Anaya-Reza, Mauricio Sales-Cruz, Teresa Lopez-Arenas 305

Retrofitting of concentration plants using global sensitivity analysis
Freddy Lucay, Luis A. Cisternas, Edelmira D. Galvèz 311

Differential-algebraic approach to solve steady-state two-phase flow drift-flux model with phase change
Rodrigo G. D. Teixeira, Argimiro R. Secchi, Evaristo C. Biscaia Jr. 317

</tbody>
</table>
A new strategy for the simulation of gas pipeline network based on system topology identification
Zengzhi Du, Chunxi Li, Wei Sun, Jianhong Wang 395

Modelling and optimization of a heat integrated gasification process
Yi Zhu, Adetoyese Olajire Oyedun, Maojian Wang, Ergys Pahija, Chi Wai Hui 401

Analyzing and modeling ethylene cracking process with complex networks approach
Zhou Fang, Tong Qiu, Bingzhen Chen 407

Optimization and economic evaluation of bioethanol recovery and purification processes involving extractive distillation and pressure swing adsorption
Y. Y. Loy, X. L. Lee, G. P. Rangaiah 413

Data reconciliation in reaction systems using the concept of extents
Sriniketh Srinivasan, Julien Billeter, Shankar Narasimhan, Dominique Bonvin 419

Development of a generic model of a Ruthenium reactor
Norbertin Nkoghe Eyeghe, Carl Sandrock, Carel Van Dam 425

Dynamic modelling and experimental validation of a pilot-scale tubular continuous reactor for the autohydrolysis of lignocellulosic materials
C. González-Figueroedo, A. Sánchez, G. Díaz, F. Rodríguez, R. Flores, M. A. Ceballos, R. Puente, H. A. Ruiz 431

First-principles model diagnosis in batch systems by multivariate statistical modeling
Natascia Meneghetti, Pierantonio Facco, Sean Bermingham, David Slade, Fabrizio Bezzo, Massimiliano Barolo 437

Integrated analysis of an evaporation and distillation bioethanol industrial system using direct and indirect heating
Rodrigo O. Silva, Vandré C. Tiski, Rafael O. Defendi, Lucas B. Rocha, Oswaldo C. M. Lima, Laureano Jiménez, Luiz Mario M. Jorge 443

Reformulating the minimum eigenvalue maximization in optimal experiment design of nonlinear dynamic biosystems
Dries Telen, Nick Van Riet, Filip Logist, Jan Van Impe 449

A framework for modular modeling of the diesel engine exhaust gas cleaning system
An approximate modelling method for industrial L-lysine fermentation process  
*Hangzhou Wang, Faisal Khan, Bo Chen, Zongmei Lu*  
461

Model-based prediction and experimental validation of viscosities of soap emulsions  
*Daniel M. Macías-Pelayo, Pedro A. Alonso-Dávila, Alfonso Martínez-Villalobos, Alicia Román-Martínez*  
467

A novel quantisation-based integration method for ODEs  
*Vassilios S. Vassiliadis, Fabio Fiorelli, Harvey Arellano-Garcia*  
473

Modelling and parameter estimation of enzymatic biodiesel synthesis  
*Priscila S. Sabaini, Thais Fabiana C. Salum, Rossano Gambetta, Fabricio Machado*  
479

Analysis of two alternatives to produce ethylene from shale gas  
*Andrea P. Ortiz-Espinoza, Mahmoud M. El-Halwagi, Arturo Jiménez-Gutiérrez*  
485

A crude oil econometric model for PSE applications  
*Davide Manca, Valentina Depetri, Clément Boisard*  
491

Simulation study of temperature distribution in the thermal drying oven for a lacquer coating process  
*Paisan Kittisupakorn, Patsarawan Lipikanjanakul*  
497

Outlier treatment for improving parameter estimation of group contribution based models for upper flammability limit  
*Jérôme Frutiger, Jens Abildskov, Gürkan Sin*  
503

Integration and optimization of an air separation unit (ASU) in an IGCC plant  
*Maojian Wang, Adetoyese Olajire Oyedun, Ergys Pahića, Yi Zhu, Guilian Liu, Chi Wai Hui*  
509

Mathematical modeling of an industrial delayed coking unit  
*Claudio N. Borges, Maria A. Mendes, Rita M. B. Alves*  
515

Post-combustion CO₂ capture with sulfolane based activated alkanolamine solvent  
*Sukanta K. Dash, Bikash K. Mondal, Amar N. Samanta, Syamalendu S. Bandyopadhyay*  
521

Modeling and sensitivity analysis of a medium-temperature gas cleaning process of biogenous synthesis gas  
*Michaela Fraubaum, Heimo Walter*  
527

Exergy analysis of monoethylene glycol (MEG) recovery systems  
*Alexandre M. Teixeira, José Luiz de Medeiros, Ofélia Q. F. Araújo*  
533

Production of biodiesel via enzymatic palm oil ethanolysis: Kinetic study  
*Shayane P. Magalhães, Fernando L. P. Pessoa, Tito L. M. Alves*  
539
Integration of retrofitted coal-fired power plant with CCS: Power derate minimization  
Jinjoo An, Ung Lee, Jaeheum Jung, Chonghun Han  
545

CUDA-optimized cellular automata for diffusion limited processes  
Andrey Kolnoochenko, Natalia Menshutina  
551

Effect of ship motion on amine absorber with structured-packing for CO₂ removal from natural gas: An approach based on porous medium CFD model  
Dung A. Pham, Young-Il Lim, Hyunwoo Jee, Euisub Ahn, Youngwon Jung  
557

Model-based analysis and efficient operation of a glucose isomerization reactor plant  
Emmanouil Papadakis, Ulrich Madsen, Sven Pedersen, Krist V. Gernaey, John M. Woodley, Rafiqul Gani  
563

pylDEAS: An open-source python package for model analysis  
Timothy Van Daele, Stijn Van Hoey, Ingmar Nopens  
569

A numerical procedure for model identifiability analysis applied to enzyme kinetics  
Timothy Van Daele, Stijn Van Hoey, Krist V. Gernaey, Ulrich Krühne, Ingmar Nopens  
575

Integrated simulation platform of chemical processes based on virtual reality and dynamic model  
Na Luo, Xiaoqiang Wang, Feng Van, Zhen-Cheng Ye, Feng Qian  
581

OsmoseLua - An integrated approach to energy systems integration with LCIA and GIS  
Min-Jung Yoo, Lindsay Lessard, Maziar Kermani, François Maréchal  
587

Incremental kinetic identification based on experimental data from steady-state plug flow reactors  
Nirav Bhatt, Srividhya Visvanathan  
593

Nonlinear fuzzy identification of batch polymerization processes  
Nádson N. M. Lima, Lamia Zuniga Linan, Delba N. C. Melo, Flavio Manenti, Rubens Maciel Filho, Marcelo Embiruçu, Maria R. Wolf Maciel  
599

Modeling dissolution of solids based on cellular automata with changing sizes of cells  
Sviatoslav I. Ivanov, Irina A. Tiptsova, Natalia V. Menshutina  
605

Data analysis and modelling of a fluid catalytic cracking unit (FCCU) for an implementation of real time optimization  
Juan D. Reyes, Adriana L. Rodriguez, Carlos A. M. Riascos  
611
A hybrid discrete/continuous dynamic model of trayed tower hydraulics
David Pinilla-García, Santos Galán 617

Application of the lagrangian cfd approach to modelling of crystallization in stirred batch reactors using the smoothed particle hydrodynamics method
Dragan D. Nikolic, Brian P. de Souza, Patrick J. Frawley 623

Model reduction in visual modelling
Heinz A. Preisig 629

Automatic reconstruction and generation of structured hexahedral mesh for non-planar bifurcations in vascular network
Mahsa Ghaffari, Chih-Yang Hsu, Andreas A. Linninger 635

Systematic development of kinetic models for systems described by linear reaction schemes
Carolina S. Vertis, Nuno M. C. Oliveira, Fernando P. M. Bernardo 641

Systematic development of kinetic models for systems described by linear reaction schemes
Carolina S. Vertis, Nuno M. C. Oliveira, Fernando P. M. Bernardo 647

Rigorous modeling, simulation and optimization of a dividing wall batch reactive distillation column: A comparative study
Edna Soraya Lopez-Saucedo, Juan Gabriel Segovia-Hernandez, Ignacio E. Grossmann and Salvador Hernandez-Castro 653

Theoretical modeling of (non) reactive residue curve maps for TAME synthesis system using MATLAB – SIMULIS thermodynamics communication facilitie’s
M. M. Ceausuescu, Jordi Bonet-Ruiz, V. Pleșu P. Iancu, A. E. Bonet-Ruiz 659

Alternative prediction models for data scarce environment
Ali Al-Shanini, Arshad Ahmad, Faisal Khan, Olagoke Oladokum, Shadia Husna Mohd Nor 665

Multi-objective optimisation of atmospheric crude distillation system operations based on bootstrap aggregated neural network models
Funmilayo N. Osuolale, Jie Zhang 671

Optimization studies through simulation of a methanol/water/glycerol distillation column
José Palmeira, João M. Silva, Henrique A. Matos 677

Simulation of a 3D bioprinted human vascular segment
Nogueira JA., Lara VF., Marques TS., Oliveira DS., Mironov V., da Silva JV., Rezende RA. 683
Modeling fixed-bed multicomponent adsorption as a step to achieve ultra-low sulfur diesel
Tristán Esparza-Isunza, Felipe López-Isunza 689

Experimental and CFD simulation studies of circulating fluidized bed riser in the fast fluidization regime
Mukesh Upadhyay, Myung Won Seo, Nam Sun Nho, Jong-Ho Park 695

Application of new electrolyte model to phase transfer catalyst (PTC) systems
Sun Hyung Kim, Amata Anantpinijwatna, Jeong-Won Kang, Mauricio Sales-Cruz, Rafiqul Gani 701

A novel rigorous mathematical programming approach to construct phenomenological models
Vassilios S. Vassiliadis, Yian Wang, Harvey Arellano-Garcia, Ye Yuan 707

Dynamic simulation of a batch aqueous two-phase extraction process for α-amylase
Nehal Patel, Daniel Bracewell, Eva Sorensen 713

Contributed Papers
T-2: Mathematical Programming (Optimization)

A framework for hybrid multi-parametric model-predictive control with application to intravenous anaesthesia
Ioana Nascu, Richard Oberdieck, Efstratios N. Pistikopoulos 719

Dynamic chance-constrained optimization under uncertainty on reduced parameter sets
David Müller, Erik Esche, Sebastian Werk, Günter Wozny 725

Optimal design of thermal membrane distillation networks
Ramon González-Bravo, Fabricio Nápoles-Rivera, José María Ponce-Ortega, Medardo Serna-Gonzalez, Mahmoud M. El-Halwagi 731

Multicolumn-multicut cross decomposition for stochastic mixed-integer linear programming
Emmanuel Ogbe, Xiang Li 737

Efficient ant colony optimization (EACO) for solvent selection using computer aided molecular design
Berhane H. Gebreslassie, Urmila M. Diwekar 743

Optimisation of process parameters with simultaneous consideration of energy efficiency measures
Timo Bohnenstaedt, Kristina Zimmermann, Georg Fieg 749

Optimization of split fractions and cleaning schedule management in heat exchanger networks
Jian Du, Jie Fan, Linlin Liu, Jilong Li, Yu Zhuang, Quinwei Meng 755
A cost targeting method for studying investment on heat exchanger networks for collection of industrial excess heat
Matteo Morandin, Lina Eriksson 761

Ellipsoidal arithmetic for multivariate systems
M. E. Villanueva, J. Rajyaguru, B. Houška, B. Chachuat 767

Reduced model trust region methods for embedding complex simulations in optimization problems
John P. Eason, Lorenz T. Biegler 773

Optimization of LNG supply chain
Alice Bittante, Raine Jokinen, Frank Pettersson, Henrik Saxén 779

Metaheuristic techniques for the optimal design of NGL pipelining
Paola P. Oteiza, Martín C. De Meio Reggiani, Diego A. Rodríguez, Valentina Viegó, Nélida B. Brignole 785

Deterministic global dynamic optimisation using interval analysis
Carlos Perez-Galvan, I. David L. Bogle 791

Separation process optimization under uncertainty by chance constraint programming with recourse
Li Sun, Huajie Zhang 797

Optimal operating policies for synthesizing tailor made gradient copolymers
Cecilia Fortunatti, Bruno Mato, Adriana Brandolin, Claudia Sarmoria, Mariano Asteasuain 803

Degeneracy hunter: An algorithm for determining irreducible sets of degenerate constraints in mathematical programs
Alexander W. Dowling, Lorenz T. Biegler 809

Dynamic multi-objective optimization of batch chromatographic separation processes
A. Holmqvist, F. Magnusson, B. Nilsson 815

An adaptive multi-objective differential evolution algorithm for solving chemical dynamic optimization problems
Xu Chen, Wenli Du, Feng Qian 821

Optimal operation of a pyrolysis reactor
Aysar T. Jarullah, Sheemaa A. Hameed, Zina A. Hameed, I.M. Mujtaba 827

Representation of the convex envelope of bilinear terms in a reformulation framework for global optimisation
Andreas Lundell, Tapio Westerlund 833

Interactive multi-objective decision-support for the optimization of nonlinear dynamic (bio)chemical processes with uncertainty
Mattia Vallerio, Jan Hufkens, Jan Van Impe, Filip Logist 839
Superstructure optimisation of a water minimization network with an embedded multi-contaminant electrodialysis model
*Chiedza D. Nezungai, Thokozani Majozi* 845

Deterministic global optimization and transition states
*Dimitrios Nerantzis, Claire S. Adjiman* 851

A metaheuristic for solving large-scale two-stage stochastic mixed 0-1 programs with a time stochastic dominance risk averse strategy
*Susana Baptista, Ana P. Barbosa-Póvoa, Laureano Escudero, Maria I. Gomes, Celeste Pizarro* 857

Optimized production of multilayered monodisperse polymer nanoparticles
*Brahim Benyahia, M. A. Latifi, C. Fonteix, F. Pla* 863

Systematic design of chemical reactors with multiple stages via multi-objective optimization approach
*Mohd Nazri Mohd Fuad, Mohd Azlan Hussain* 869

Synthesis and design of integrated process and water networks
*Zainatul B. Handani, Alberto Quaglia, Rafiqul Gani* 875

Optimization of high-density polyethylene process based on molecular weight distribution and chemical composition distribution under uncertainty
*Jiayuan Kang, Xi Chen, Zhijiang Shao* 881

A systematic approach for targeting zero liquid discharge in industrial parks
*Zakarya A. Othman, Patrick Linke, Mahmoud El-Halwagi* 887

Decomposition techniques for the real-time optimization of a propylene production unit
*A. M. Acevedo P., J.E.A. Graciano, Fabio D.S. Liporace, A.S. Vianna Jr., Galo A.C. Le Roux* 893

An approach to deal with non-convex models in real-time optimization with modifier adaptation
*Maximiliano Garcia, Juan Pablo Ruiz, Marta Basualdo* 899

A robust minimax Semidefinite Programming formulation for optimal design of experiments for model parameterisation
*Belmiro P.M. Duarte, Guillaume Sagnol, Nuno M.C. Oliveira* 905

Design of a multi-contaminant water allocation network using multi-objective optimization
*Sofía De-León Almaraz, Marianne Boix, Catherine Azzaro-Pantel, Ludovic Montastruc, Serge Domenech* 911
Simulation and optimization of the ethane cracking process to produce ethylene
*Daison Y. Caballero, Lorenz T. Biegler, Reginaldo Guirardello* 917

Study of performance of a novel stochastic algorithm based on Boltzmann distribution (BUMDA) coupled with self-adaptive handling constraints technique to optimize chemical engineering process

Dynamic modelling and optimal design of the solid-phase reactive chromatographic separation system for biomass saccharification via acid hydrolysis
*Pakkapol Kanchanalai, Matthew J Realf, Yoshiaki Kawajiri* 929
