2014 IEEE 9th International Conference on Global Software Engineering

(ICGSE 2014)

Shanghai, China
18-21 August 2014
2014 IEEE 9th International Conference on Global Software Engineering

ICGSE 2014

Table of Contents

Message from the General Chair ................................................................. viii
Message from the Program Chairs .............................................................. ix
Message from the Poster and Panel Chairs ............................................... x
Message from the Tutorial Chairs .............................................................. xi
Organizing Committee .............................................................................. xiii
Program Committee .................................................................................. xv
Steering Committee .................................................................................. xvii
Keynotes ..................................................................................................... xviii

Agile and GSE

Experiences from the Design of an Artifact Model for Distributed Agile Project Management ........................................................................................................... 1

Henning Femmer, Marco Kuhrmann, Jörg Stimmer, and Jörg Junge

Scrum Master Activities: Process Tailoring in Large Enterprise Projects ................................................................................................. 6

Julian M. Bass

Towards Rapid Releases in Large-Scale XaaS Development at Ericsson: A Case Study ........................................................................................................ 16

Maria Paasivaara, Benjamin Behm, Casper Lassenius, and Minna Hallikainen

Collaboration and Coordination

Awareness and Merge Conflicts in Distributed Software Development ......................................................................................................................... 26

H. Christian Estler, Martin Nordio, Carlo A. Furia, and Bertrand Meyer

Exploring the Impact of API Complexity on Failure-Proneness ................................................................................................................................. 36

Marcelo Cataldo and Cleidson R.B. de Souza

The Interplay among Trust, Risk, and Reliance in Global Systems Engineering Teams ......................................................................................................... 46

Sabrina Marczak, Ban Al-Ani, David Redmiles, and Rafael Prikladnicki
Cool Tools and Approaches for GSE

The Effects of Continuous Awareness on Distributed Software Development ......................................................... 56
  Cong Chen and Kang Zhang

A Participant Recruitment Framework for Crowdsourcing Based Software Requirement Acquisition .......................... 65
  Hao Wang, Yasha Wang, and Jiangtao Wang

Spreadsheets as Collaborative Technologies in Global Requirements Change Management ........................................... 74
  Waqar Hussain and Tony Clear

Frontier Tales: Experience Reports

Reporting and Assessment of Static Analysis Policies in a Globally Distributed Organization ........................................... 84
  Alpana Dubey, Koushik Saha, and John Hudepohl

Software Documentation in a Globally Distributed Environment .................................................................................. 90
  Jaya Choudhury and B. Thushara

Lean Transformation: How Lean Helped to Achieve Quality, Cost and Schedule: Case Study in a Multi Location Product Development Team ....................................................... 95
  Uma Viswanath

Modeling for GSE

Survivability Models for Global Software Engineering ................................................................................................. 100
  Alberto Avritzer, Sarah Beecham, Josiane Kroll, Daniel Sadoc Menasché, John Noll, and Maria Paasivaara

Patternizing GSD Research: Maintainable Decision Support for Global Software Development ........................................... 110
  John Noll, Ita Richardson, and Sarah Beecham

An Initial Framework for Researching Follow-the-Sun Software Development ............................................................... 116
  Josiane Kroll, Bernardo José da Silva Estácio, Jorge L.N. Audy, and Rafael Prikladnicki

GSE Methodology

On the Role of Boundary Spanners as Team Coordination Mechanisms in Organizationally Distributed Projects ............ 125
  Anh Nguyen-Duc, Daniela S. Cruzes, and Reidar Conradi

Effort Estimation in Global Software Development: A Systematic Literature Review .................................................... 135
  Ricardo Britto, Vitor Freitas, Emilia Mendes, and Muhammad Usman

Mobile Speech Translation for Multilingual Requirements Meetings: A Preliminary Study ........................................... 145
  Fabio Calefato, Filippo Lanubile, Damiano Romita, Rafael Prikladnicki, and João Henrique Stocker Pinto
Global Software Engineering State-of-the-Art and Education

Critical Success Factors for Software Outsourcing Partnership (SOP): A Systematic Literature Review ................................................................. 153
  Sikandar Ali and Sifat Ullah Khan

Teaching Global Software Engineering: Interactive Exercises for the Classroom ................................................................. 163
  Christian Lescher, Yang Li, and Bernd Bruegge

Global Software Development Education: A Commercial Perspective from a Case Study ................................................................................ 173
  Miguel J. Monasor, Jonny Parkes, John Noll, Aurora Vizcaino, Mario Piattini, and Sarah Beecham

Author Index .............................................................................................................................................................................................. 183
