CONTENTS

INVITED SPEAKERS

KEYNOTE SPEAKERS

Formation Control and Vision based Localization of System of Mobile Robots
Krzysztof Kozlowski
IS-5

Controlled Magnetic Bearings for Smart Machines
Gerhard Schweitzer
IS-7

Mobile Manipulation - Why Are Humans so Much Better? And How Can We Change That?
Oliver Brock
IS-9

Rough Terrain Mobile Robotics - From Design to Motion Control and Planning
Faiz Ben Amar
IS-11

ROBOTICS AND AUTOMATION

FULL PAPERS

3D Positioning Algorithm for Low Cost Mobile Robots
Rafael Socas, Sebastian Dormido, Raquel Dormido and Ernesto Fabregas
5

Safe Predictive Mobile Robot Navigation in Aware Environments
Michael Arndt and Karsten Berns
15

Kinematic Analysis and Simulation of a Hybrid Biped Climbing Robot
Adrian Peidro, Arturo Gil, Jose Maria Marin, Yerai Berenguer and Oscar Reinoso
24

Assistive Robot for Standing with Physical Activity Estimation based on Muscle Arrangements of Human Legs
Daisuke Chugo, Takahiro Yamada, Satoshi Muramatsu, Sho Yokota and Hiroshi Hashimoto
35

Visual Servoing-based Registration of Multimodal Images
M. Ourak, B. Tamadazte, N. Andreff and E. Marchand
44

Guaranteed Control of a Robotic Excavator During Digging Process
Alexander Gurko, Oleg Sergiyenko, Juan Ivan Nieto Hipólito, Igor Kirichenko, Vera Tyrsa and Juan de Dios Sanchez Lopez
52

Analysis of Shapes to Measure Surfaces - An Approach for Detection of Deformations
C. M. Mateo, P. Gil, D. Mira and F. Torres
60

RCON: Dynamic Mobile Interfaces for Command and Control of ROS-enabled Robots
Robert Codd-Downey and Michael Jenkin
66

A Taxonomy of Distribution for Cooperative Mobile Manipulators
Andreas Schierl, Andreas Angerer, Alwin Hoffmann, Michael Vistein and Wolfgang Reif
74

A Robust Temperature Controller Design for an Innovative Hyperthermic Intraperitoneal Chemotherapy Equipment
Iulia Clitan, Corneliu Lungoci, Vlad Muresan, Daniel Moga and Valentin Sita
84

Using Tablets in the Vision-based Control of a Ball and Beam Test-bed
Jared A. Frank, José Antonio De Gracia Gómez and Vikram Kapila
92

XV
A Depth-based Approach for 3D Dynamic Gesture Recognition

Hajar Hiyadi, Fakhreddine Ababsa, Christophe Montagne, El Houssine Bouyakhf and Fakhita Regragui

Robots Avoid Potential Failures through Experience-based Probabilistic Planning

Melis Kapotoglu, Cagatay Koc and Sanem Sariel

Continuous Pre-Calculation of Human Tracking with Time-delayed Ground-truth - A Hybrid Approach to Minimising Tracking Latency by Combination of Different 3D Cameras

Philip Nicolai, Jörg Raczkowsky and Heinz Wörn

Fast and Robust Keypoint Detection in Unstructured 3-D Point Clouds

Jens Garstka and Gabriele Peters

Toward a Human-like Locomotion: Modelling Dynamically Stable Locomotion of an Anthropomorphic Robot in Simulink Environment

Ramil Khusainov, Ilya Shimchik, Ilya Afanasyev and Evgeni Magid

Short Papers

A Model Predictive Sliding Mode Control with Integral Action for Slip Suppression of Electric Vehicles

Tohru Kawabe

Data Fusion Between a 2D Laser Profile Sensor and a Camera

M. Wagner, P. Heß, S. Reitelshöfer and J. Franke

A Complete Sensor-based System to Navigate through a Cluttered Environment

A. Durand-Petiteville, V. Cadenat and N. Ouadah

Flatness based Feed-forward Control of a Flexible Robot Arm under Gravity and Joint Friction

Elisha Didam Markus

Filling Accuracy Analysis of the Rocket Propellant based on the Flowmeter Measuring Model

Xiang Youhuan, Zhang Ping, Liu Weidong and Cui Benting

Comparison of Controllable Transmission Ratio Type Variable Stiffness Actuator with Antagonistic and Pre-tension Type Actuators for the Joints Exoskeleton Robots

Hasbi Kizilhan, Ozgur Baser, Ergin Kilic and Necati Ulusoy

Feasibility Study of a Pair of 2-DOF Step-climbing Units for a Manual Wheelchair User

Yoshikazu Mori, Kaoru Katsumura and Katsuya Nagase

Relative Height Estimation using Omnidirectional Images and a Global Appearance Approach

Yerai Berenguer, Luis Payá, Adrian Peidro and Oscar Reinoso

Rotation-Invariant Image Description from Independent Component Analysis for Classification Purposes

Rodrigo D. C. da Silva, George A. P. Thé and Fátima N. S. de Medeiros

New Approach to the Artificial Force Concept for Skid-steering Mobile Platform

Alicja Mazur, Wojciech Domski, Mirela Kaczmarek and Mateusz Cholewinski

Detection and Implementation Autonomous Target Tracking with a Quadrotor AR.Drone

K. Boudjit and C. Larbes

Next Generation Networks for Telecommunications Operators Providing Services to Transnational Smart Grid Operators

Gurkan Tuna, George C. Kiokes, Erietta I. Zountouridou and V. Cagri Gungor

XVI
An Adaptive Sliding Mode Controller for Synchronized Joint Position Tracking Control of Robot Manipulators
Youmin Hu, Jie Liu, Bo Wu, Kaibo Zhou and Mingfeng Ge

Feature and Decision Level Audio-visual Data Fusion in Emotion Recognition Problem
Maxim Sidorov, Evgenii Sopov, Ilia Ivanov and Wolfgang Minker

Design of Mobile Microrobots with Thermomechanical Actuators
N. N. Bolotnik, V. G. Chashchukhin, V. G. Gradetsky, D. V. Kozlov, I. P. Smirnov, A. N. Sukhanov and A. A. Zhukov

A Physics-based Optimization Approach for Path Planning on Rough Terrains
Diogo Amorim and Rodrigo Ventura

HybridSLAM: A Robust Algorithm for Simultaneous Localization and Mapping
Amir Hossein Monjazeb, Jurek Sasiadek and Dan Necsulescu

A Formation Control Algorithm by Modified Next-state Approximation to Reduce Communication Requirements in Multirobot Systems
Roshin Jacob Johnson and Asokan Thondiyath

Control Algorithm for a Cooperative Robotic System in Fault Conditions
Viorel Stoian and Eugen Bobasu

Socio-cyberphysical System for Proactive Driver Support - Approach and Case Study
Alexander Smirnov, Nikolay Shilov and Oleg Gusikhin

Fast Moving Object Detection from Overlapping Cameras
Mikael A. Mousse, Cina Motamed and Eugene C. Ezin

Human-like Humanoid Robot Posture Control
M. Zebenay, V. Lippi and T. Mergener

A Relative Measurement based Leader-follower Formation Control of Mobile Robots

A Vision-based Line Following Strategy for an Autonomous UAV
Alexandre Brandão, Felipe Martins and Higor Soneguetti

Y-Pod Formation of Swarm Robots using Amber Force Fields
Purushotham Muniganti and Albert Oller Pujol

Exploring the Role of a Smartphone as a Motion Sensing and Control Device in the Wireless Networked Control of a Motor Test-bed
Jared A. Frank, Anthony Brill, Jonghyun Bae and Vikram Kapila

Bio-inspired Morphing Caudal Fin using Shape Memory Alloy Composites for a Fish-like Robot - Design, Fabrication and Analysis
William Coral, Claudio Rossi and Irene Perrino Martin

Comparison of Robust Control Techniques for Use in Flight Simulator Motion Bases
Mauricio Becerra-Vargas

Three-Layered Software Architecture and Its Variability for Teleoperated System
Yasuhiro Kunii, Yoshiki Matsui and Masaru Furukawa

Comparative Analysis of Methods for the Log Boundaries Isolation
Artem Kruglov and Yurii V. Chiryshev
Progressive Co-adaptation in Human-Machine Interaction
Paolo Gallina, Nicola Bellotto and Massimiliano Di Luca

A Tactile-based Grasping Strategy for Deformable Objects' Manipulation and Deformability Estimation
A. Delgado, C. A. Jara, D. Mira and F. Torres

A Trajectory Tracking Control of a Skid Steered Mobile Cleaning Robot
Seungwoo Jeon, Jeon, Wootae Jeong, Soon-Bark Kwon, Cheulkyu Lee and Duckshin Park

Adaptive 3-D Object Classification with Reinforcement Learning
Jens Garstka and Gabriele Peters

Impedance Control based Force-tracking Algorithm for Interaction Robotics Tasks: An Analytically Force Overshoots-free Approach
Loris Roveda, Federico Vicentini, Nicola Pedrocchi and Lorenzo Molinari Tosatti

Issues and Challenges in Robotic Trimming of CFRP
Mohamed Slamani and Jean Francois Chatelain

Motion Curved Surface Analysis and Composite for Skill Succession using RGBD Camera
Kaoru Mitsuhashi, Hiroshi Hashimoto and Yasuhiro Ohyama

Dynamic Obstacle Avoidance using Online Trajectory Time-scaling and Local Replanning
Ran Zhao and Daniel Sidobre

Visual based Navigation of a Free Floating Robot by Means of a Lab Star Tracker
Marco Sabatini, Giovanni B. Palmerini and Paolo Gasbarri

Towards Multi-functional Robot-based Automation Systems
Andreas Angerer, Michael Vistein, Alwin Hoffmann, Wolfgang Reif, Florian Krebs and Manfred Schönheits

Range Data Fusion for Accurate Surface Generation from Heterogeneous Range Scanners
Mahesh Kr. Singh, K. S. Venkatesh and Ashish Dutta

Reactive Planning on a Collaborative Robot for Industrial Applications
Gautier Dumonteil, Guido Manfredi, Michel Devy, Ambroise Confetti and Daniel Sidobre

INDUSTRIAL INFORMATICS

Short Papers

Geographic Information Science and Technology as Key Approach to unveil the Potential of Industry 4.0 - How Location and Time Can Support Smart Manufacturing
Stefan Schabus and Johannes Scholz

Towards the Quality Evaluation of Software of Control Systems of Nuclear Power Plants: Theoretical Grounds, Main Trends and Problems
Elena Jharko

Analysis of Thermographic Patterns using Open CV - Case Study: A Clinker Kiln
Villie Morocho, Eliexer Colina, Sebastian Bautista, Alfredo Mora and Mara Falconi
