Contents

Stable Models for Temporal Theories: — Invited Talk — .......................... 1
Pedro Cabalar

Algorithmic Decision Theory Meets Logic: — Invited Talk — .................. 14
Jérôme Lang

Relational and Semantic Data Mining: — Invited Talk — ....................... 20
Nada Lavrač and Anže Vavpetič

Shift Design with Answer Set Programming ......................................... 32
Michael Abseher, Martin Gebser, Nysret Musliu, Torsten Schaub, and Stefan Woltran

Advances in WASP ................................................................. 40
Mario Alviano, Carmine Dodaro, Nicola Leone, and Francesco Ricca

Improving Coordinated SMT-Based System Synthesis by Utilizing
Domain-Specific Heuristics .......................................................... 55
Benjamin Andres, Alexander Biewer, Javier Romero, Christian Haubelt, and Torsten Schaub

Integrating ASP into ROS for Reasoning in Robots ............................ 69
Benjamin Andres, David Rajaratnam, Orkunt Sabuncu, and Torsten Schaub

Automated Inference of Rules with Exception from Past Legal Cases
Using ASP ................................................................. 83
Duangtida Athakravi, Ken Satoh, Mark Law, Krysia Broda, and Alessandra Russo

Online Action Language oBC+ ...................................................... 97
Joseph Babb and Joohyung Lee

aspartame: Solving Constraint Satisfaction Problems with Answer Set
Programming ................................................................. 112
Mutsunori Banbara, Martin Gebser, Katsumi Inoue, Max Ostrowski, Andrea Peano, Torsten Schaub, Takehide Soh, Naoyuki Tamura, and Matthias Weise

“Add Another Blue Stack of the Same Height!”: ASP Based Planning
and Plan Failure Analysis .......................................................... 127
Chitta Baral and Tran Cao Son
A Theory of Intentions for Intelligent Agents: (Extended Abstract) ........ 134
  Justin Blount, Michael Gelfond, and Marcello Balduccini

Answer Set Programming Modulo Acyclicity ............................. 143
  Jori Bomanson, Martin Gebser, Tomi Janhunen, Benjamin Kaufmann,
  and Torsten Schaub

A Framework for Goal-Directed Query Evaluation with Negation ........... 151
  Stefan Brass

Implementing Preferences with asprin .................................... 158
  Gerhard Brewka, James Delgrande, Javier Romero, and Torsten Schaub

Diagnosing Automatic Whitelisting for Dynamic Remarketing Ads
Using Hybrid ASP .......................................................... 173
  Alex Brik and Jeffrey Remmel

Performance Tuning in Answer Set Programming .......................... 186
  Matthew Buddenhagen and Yuliya Lierler

Enablers and Inhibitors in Causal Justifications of Logic Programs ....... 199
  Pedro Cabalar and Jorge Fandinno

Efficient Problem Solving on Tree Decompositions Using Binary Decision
Diagrams ........................................................................... 213
  Günther Charwat and Stefan Woltran

Knowledge Acquisition via Non-monotonic Reasoning in Distributed
Heterogeneous Environments ................................................ 228
  Stefania Costantini

Digital Forensics Evidence Analysis: An Answer Set Programming
Approach for Generating Investigation Hypotheses ........................ 242
  Stefania Costantini, Giovanni De Gasperis, and Raffaele Olivieri

A Formal Theory of Justifications ........................................... 250
  Marc Denecker, Gerhard Brewka, and Hannes Strass

A New Computational Logic Approach to Reason with Conditionals ...... 265
  Emmanuelle-Anna Dietz and Steffen Hölldobler

Interactive Debugging of Non-ground ASP Programs ....................... 279
  Carmine Dodaro, Philip Gasteiger, Benjamin Musitsch,
  Francesco Ricca, and Kostyantyn Shchekotykhin

Linking Open-World Knowledge Bases Using Nonmonotonic Rules ........ 294
  Thomas Eiter and Mantas Šimkus
Contents

ASP, Amalgamation, and the Conceptual Blending Workflow .................................................. 309
Manfred Eppe, Ewen Maclean, Roberto Confalonieri, Oliver Kutz, Marco Schorlemmer, and Enric Plaza

Diagnostic Reasoning for Robotics Using Action Languages ................................................. 317
Esra Erdem, Volkan Patoglu, and Zeynep Gozen Saribatur

OOASP: Connecting Object-Oriented and Logic Programming .............................................. 332
Andreas Falkner, Anna Ryabokon, Gottfried Schenner, and Kostyantyn Shchekotykhin

Reasoning with Forest Logic Programs Using Fully Enriched Automata .............................. 346
Cristina Feier and Thomas Eiter

ASP Solving for Expanding Universes. ..................................................................................... 354
Martin Gebser, Tomi Janhunen, Holger Jost, Roland Kaminski, and Torsten Schaub

Progress in clasp Series 3 ........................................................................................................ 368
Martin Gebser, Roland Kaminski, Benjamin Kaufmann, Javier Romero, and Torsten Schaub

Combining Heuristics for Configuration Problems Using Answer Set Programming ............ 384
Martin Gebser, Anna Ryabokon, and Gottfried Schenner

Infinitary Equilibrium Logic and Strong Equivalence .......................................................... 398
Amelia Harrison, Vladimir Lifschitz, David Pearce, and Agustín Valverde

On the Relationship Between Two Modular Action Languages: A Translation from MAD into ACM ................................................................................................................................. 411
Daniela Inclezan

Compacting Boolean Formulae for Inference in Probabilistic Logic Programming ................ 425
Theofrastos Mantadelis, Dimitar Shterionov, and Gerda Janssens

Multi-level Algorithm Selection for ASP ................................................................................ 439
Marco Maratea, Luca Pulina, and Francesco Ricca

Clause-Learning for Modular Systems .................................................................................... 446
David Mitchell and Eugenia Ternovska

Solving Disjunctive Fuzzy Answer Set Programs .................................................................... 453
Mushthofa Mushthofa, Steven Schockaert, and Martine De Cock

Characterising and Explaining Inconsistency in Logic Programs ........................................ 467
Claudia Schulz, Ken Satoh, and Francesca Toni
An Implementation of Consistency-Based Multi-agent Belief Change Using ASP

Paul Vicol, James Delgrande, and Torsten Schaub

ASPMT(QS): Non-Monotonic Spatial Reasoning with Answer Set Programming Modulo Theories

Przemysław Andrzej Wałęga, Mehul Bhatt, and Carl Schultz

Mobile Robot Planning Using Action Language BC with an Abstraction Hierarchy

Shiqi Zhang, Fangkai Yang, Piyush Khandelwal, and Peter Stone

Logic Programming with Graded Modality

Zhizheng Zhang and Shutao Zhang

The Design of the Sixth Answer Set Programming Competition: – Report –

Martin Gebser, Marco Maratea, and Francesco Ricca

Doctoral Consortium Extended Abstract: Planning with Concurrent Transaction Logic

Reza Basseda

Doctoral Consortium Extended Abstract: Multi-context Systems with Preferences

Tiep Le

Doctoral Consortium Extended Abstract: Default Mappings in Ontology-Based Data Access

Daniel P. Lupp

Doctoral Consortium Extended Abstract: Nonmonotonic Qualitative Spatial Reasoning

Przemysław Andrzej Wałęga
