Proceedings of the ASME
INTERNATIONAL MECHANICAL ENGINEERING
CONGRESS AND EXPOSITION
– 2014 –

VOLUME 7
FLUIDS ENGINEERING
SYSTEMS AND TECHNOLOGIES

presented at
ASME 2014 INTERNATIONAL MECHANICAL ENGINEERING CONGRESS AND EXPOSITION
NOVEMBER 14–20, 2014
MONTREAL, QUEBEC, CANADA
CONTENTS

FLUIDS ENGINEERING SYSTEMS AND TECHNOLOGIES

10TH FORUM ON RECENT DEVELOPMENTS IN MULTIPHASE FLOW
IMECE2014-36896 ......................................................................................... V007T09A001
Simulation of Viscous Fingering Phenomenon Using CFD Tools
Diana González and Miguel Asuaje

IMECE2014-36922 ......................................................................................... V007T09A002
Numerical Study of Drag Forces in Gravity-Induced Separation for Water Dominated
Dispersed Oil-Water
Elionora A. Caldera and Miguel Asuaje

IMECE2014-36928 ......................................................................................... V007T09A003
Transient Two-Phase Flow Model for High Viscous Liquids Over Hilly Terrain
Abraham Parra and Miguel Asuaje

IMECE2014-36952 ......................................................................................... V007T09A004
A Study on the Multiphase Flow Characteristics Inside Subsea Separation System
Nam-Sub Woo, Young-Ju Kim, Sang-Mok Han, Jae-Ki Kwon, Sang-Shik Kim, and
Hee-Hak Ahn

IMECE2014-37281 ......................................................................................... V007T09A005
The Effect of Non-Continuous Inlet Air on Increasing the Segregation of Binary Particles in a
Fluidized Bed
Maysam Saidi, Hassan Basirat Tabrizi, Sina Chaichi, and Majid Dehghani

IMECE2014-37284 ......................................................................................... V007T09A006
Humidity Effect on the Separation Efficiency of Cylindrical Cyclone Separator
Alireza Moallemi, Maysam Saidi, and Hassan Basirat Tabrizi

IMECE2014-37456 ......................................................................................... V007T09A007
Genetic Algorithms Applied to Flow Estimation in a Two-Phase Flow With a Venturi Meter
Manuel A. Borregales, Gilberto Nuñez, Jose Cappelletto, and Miguel Asuaje

IMECE2014-38009 ......................................................................................... V007T09A008
Development of Water Treatment Systems Using Interaction of Pressure Waves, Cavitation
Bubbles and Micro Bubbles
Masaaki Tamagawa

IMECE2014-38665 ......................................................................................... V007T09A009
Shear Driven Rivulet Dynamics on Surfaces With Various Wettabilities
Sara Moghtadernejad, Mehdi Jadidi, Nabil Esmail, and Ali Dolatabadi

IMECE2014-39844 ......................................................................................... V007T09A010
Numerical Modeling of Aerated Cavitation Using a Penalization Approach for Air Bubble
Modeling Coupled to Homogeneous Equilibrium Model
Petar Tomov, Sofiane Khelladi, Christophe Sarraf, and Farid Bakir
# 12th Symposium on Electric, Magnetic and Thermal Phenomena in Micro and Nano-Scale Systems

**IMECE2014-37547**
Using Shear and DC Electric Fields to Manipulate and Self-Assemble Dielectric Particles on Microchannel Walls
*Minami Yoda and Necmettin Cevheri*

**IMECE2014-38256**
Aggregation and Effective Thermal Conductivity of Nanofluids: Dependence on Cluster Size and Morphology
*Miguel Reyes-Mata, Jerzy Blawzdziewicz, Eligiusz Wajnryb, and Mauricio Zurita-Gotor*

# 14th International Symposium on Measurement and Modeling of Environmental Flows

**IMECE2014-36148**
The Influence of Internal Structure on the Performance of Ejector
*Taide Tan, Han Chen, Wei Lu, and Jiyun Liu*

**IMECE2014-37205**
Surface Texture Effect on Momentum Transfer Behavior in Ultimate Taylor-Couette Flow
*Yabo Xue, Zhenqiang Yao, De Cheng, Hong Shen, and Shengde Wang*

**IMECE2014-37585**
CFD Simulation of Boiling Heat Transfer Using OpenFOAM
*Mehrdad Shademan, Ram Balachandar, and Ron Barron*

**IMECE2014-38013**
Numerical Simulation of Solid-Phase Split at Junctions in Particle Laden Pipe Flow
*N. Kharoua, M. AlShehhi, and L. Khezzar*

**IMECE2014-38054**
An Eddy-Resolving Reynolds Stress Model for the Turbulent Bubbly Flow in a Square Cross-Sectioned Bubble Column
*Matthias Ullrich, Benjamin Krumbein, Robert Maduta, and Suad Jakirlić*

**IMECE2014-40419**
Stable Moving Particle Semi Implicit Method for Modeling Waves Generated by Submarine Landslides
*Mohammad Amin Nabian and Leila Farhadi*

# 15th Symposium on Fundamental Issues and Perspectives in Fluid Mechanics

**IMECE2014-36355**
*Yu. V. Nuzhnov*
Pressure Drop Testing of Corrugated Stainless Steel Pliable Gas Tubing (PLT)
Bharadwaj Srinivasan and Stephen A. Idem

Wavelet Analysis of Finite Height Grid Turbulence Over a Flat Plate
F. Fouladi, P. Henshaw, and D. S-K. Ting

Relation Between Sound Sources and Vortical Structures in Isotropic Compressible Turbulence
Daiki Terakado, Taku Nonomura, Makoto Sato, and Kozo Fujii

Large Eddy Simulation of Round Impinging Jets With Large Stand-Off Distance
Mehrdad Shademan, Vesselina Roussinova, Ron Barron, and Ram Balachandar

Computational Modeling and Simulations of Isothermal Plane (Linear) Air Jet Velocity Profile for Slot Diffusers
Deify Law and Agustin Valdez

Numerical Simulation of Using Combined Active and Passive Stall Control Techniques in Centrifugal Compressors
Taher Halawa, Mohamed Alqaradawi, Osama Badr, and Mohamed S. Gadala

The Development of the Turbulent Three-Dimensional Wall Jet With and Without a Grid Placed Over the Outlet
Sébastien Després and Joseph W. Hall

A Comparison of Classic and Snapshot Proper Orthogonal Decomposition on the Three Dimensional Wall Jet Flow Field
Mahdi Hosseinali, Stephen Wilkins, Lhendup Namgyal, and Joseph Hall

Analysis of Turbulent Flow Past Bar-Racks
Samuel S. Paul and Muyiwa S. Adaramola

A New Parameter in Vortex Identification and Visualization: Symmetry of Vortical Flow
Katsuyuki Nakayama, Yasumasa Ohira, and Shoko Yamada

Characteristics of Shallow Wakes in an Open Channel
G. Nasif, R. Balachandar, and R. M. Barron
A Solution of the Graetz Problem in Tubes of Arbitrary Cross-Section Shape for Viscoelastic Fluids
Cristian Barrera H., Mario F. Letelier, and Dennis A. Siginer

Velocity Field and Energy Dissipation in Viscoplastic Flow in Tubes of Non-Circular Cross-Section
Mario F. Letelier, Dennis A. Siginer, and Felipe Godoy

Flow and Decay Characteristics of Submerged Yield-Pseudoplastic Jets
Khaled J. Hammad

Viscoelastic Rotating Flow With Viscous Dissipation
A. Hazbavi, N. Ashrafi, and M. Najafi

N-Heptane Pool Fire Behavior in a Controlled Oxygen and Low-Pressure Environment
Quanyi Liu, Kewei Chen, Nan Wu, Jiusheng Yin, Rui Yang, and Hui Zhang

Analysis of the Process-Structure-Behaviour Interaction in Bio-Sourced Polymers: Role of the Crystallization Kinetics
Mhamed Boutaous, Zakariaa Refaa, Matthieu Zinet, Shihe Xin, and Patrick Bourgin

Airflow Distribution in the Longitudinal Plan of a Boeing 767 Mockup Cabin
Maher Shehadi, Mohammad Hosni, and Byron W. Jones

Leveling of a Line of Paint Droplets on a Surface
J. Esmaeelpahan, A. Dalili, S. Chandra, and J. Mostaghimi

Numerical Study of Internal Flow Structures Within Hydrocyclones With Parabolic and Hyperbolic Swirl Chambers
Abdul Motin, Volodymyr V. Tarabara, and André Bénard

Gas Separation Using a Membrane
Nawaf Alkhamis, Ali Anqi, Dennis E. Oztekin, Abdulmohsen Alsaiari, and Alparslan Oztekin

A Universal Semi-Analytic Model for Axial Mixing in a Straight Pipe
Heng Luo, Yun Li, and Hai Wang
IMECE2014-37395 ........................................................................................................... V007T09A043
Large Eddy Simulation of Forced and Unforced Plane Jets Impinging on a Convex Surface
N. Kharoua, L. Khezzar, Z. Nemouchi, and M. AlShehhi

IMECE2014-37482 ........................................................................................................... V007T09A044
Theoretical and Experimental Study of Hydrocyclone Performance and Equivalent Settling Area
Reza Sabbagh, Michael G. Lipsett, Charles R. Koch, and David S. Nobes

IMECE2014-37696 ........................................................................................................... V007T09A045
A Self-Contained Architecture for Energy Recovery in Hydraulic Elevators
Oscar Pena and Michael J. Leamy

IMECE2014-37999 ........................................................................................................... V007T09A046
Discrete Phase Modeling of Oil Droplets in the Gas Compartment of a Production Separator
Y. F. Qaroot, N. Kharoua, and L. Khezzar

IMECE2014-38039 ........................................................................................................... V007T09A047
Numerical Investigations on the Aerodynamic Performance of Last Stage Bucket
With Part-Span Connector
Bin Li and Jun Li

IMECE2014-38383 ........................................................................................................... V007T09A048
Validation of URANS Simulation of Truck Cooling Fan Performance
Sassan Etemad and Peter Gullberg

IMECE2014-39561 ........................................................................................................... V007T09A049
Numerical Study of the Fluid Flow in a Cylindrical Hydrocyclone Separator
Hans E. Maldonado Ninahuanca, Henrique Stel, and Rigoberto E. M. Morales

FORUM ON EXPERIMENTAL VALIDATION OF CFD MODELING IN HEAT EXCHANGERS
IMECE2014-36818 ........................................................................................................... V007T09A050
Planar PIV Experiments Inside a Transparent Shell-and-Tube Exchanger
Siddharth Talapatra and Kevin Farrell

IMECE2014-36902 ........................................................................................................... V007T09A051
Turbulent Flow in a No-Tube-in-Window Shell-and-Tube Heat Exchanger: CFD vs PIV
Salem Bouhairie, Siddharth Talapatra, and Kevin Farrell

IMECE2014-37926 ........................................................................................................... V007T09A052
CFD-Simulation of Oscillatory Flow Around the Heat Exchangers of Thermoacoustic Devices
Olusegun M. Ilori, Xiaoan Mao, and Artur J. Jaworski

IMECE2014-38030 ........................................................................................................... V007T09A053
Thermal Structure and Flow Field Characteristics of a Modified Inverse Jet Diffusion Flame Burner
Sherif Amin, Ahmed Emara, Adel Hussien, and Ibrahim Shabaka

IMECE2014-38812 ........................................................................................................... V007T09A054
Experimental Validation of Numerical Simulations of a Closed-Loop Thermosyphon Operating With Slurries of a Microencapsulated Phase-Change Material
Alexandre Lamoureux and Bantwal R. (Rabi) Baliga
Relevant Influencing Factors on Droplet Characteristics for a Piezoelectrically Driven Drop-on-Demand Printhead
Markus Kagerer, Arne Meeuw, Jan Berger, Dominik Rumschoettel, Tim C. Lueth, and Franz Irlinger

Model Calculations on Micropump Using Reciprocating Motion of Magnetic Material Ball
Hiroshige Kumamaru, Hayata Fujiwara, Yoshihisa Nomura, and Kazuhiro Itoh

Effect of Surface Modification on Protein Deposition in Desiccated Droplets
Michael J. Schertzer, Peter Lea, Ridha Ben-Mrad, and Pierre E. Sullivan

Detection of Selected Pharmaceutical Contaminants and Removal Efficiency of Emerging Contaminants by Application of Membrane Filtration Technology
Yanghe Liu, Chenguang Sheng, and George Agbai Nnanna

Boundary Element Simulations of Free and Forced Bubble Oscillations in Potential Flow
Yulia A. Itkulova, Olga A. Abramova, Nail A. Gumerov, and Iskander S. Akhatov

Molecular Dynamics Simulations of Nanobubbles Formation Near the Substrate in a Liquid With Dissolved Gas
Elena F. Moiseeva, Victor L. Malyshev, Dmitriy F. Marin, Nail A. Gumerov, and Iskander Sh. Akhatov

Dynamics of a Micro-Bubble Between Two Spherical Particles
Mainul Hasan

Dynamics of Thin Liquid Bilayers Subjected to an External Electric Field
Hadi Nazaripoor, Charles R. Koch, and Subir Bhattacharjee

Free Flow Isoelectric Focusing in a Microfluidic Device
Kisoo Yoo, Prashanta Dutta, and Jin Liu

An Effective Viscosity Equation for the CFD Analysis of the Micro Flows in the Confinement Ring
Yuanhao Wu, Ling Tian, and Wenbin Han

Particulate and Emulsion Sorting Using Microfluidics
Li Lu, Rebecca M. Irwin, Jeffrey W. Schertzer, and Paul R. Chiarot
IMECE2014-38875 .................................................................................................V007T09A066
Method for Characterization of Passive Mechanical Filtration of Particles in
Digital Microfluidic Devices
Peter D. Dunning, Pierre E. Sullivan, and Michael J. Schertzer

POSTERS
IMECE2014-37277 .................................................................................................V007T09A067
Fiber Supplemented Droplet Diving Into Two Liquid Layers
Alyssa Harris and Tsung-chow Su

IMECE2014-37831 .................................................................................................V007T09A068
LBM Simulation of Electro-Osmotic Flow (EOF) in Nano/Micro Scales Porous Media With an
Inclusive Parameters Study
Ramin Zakeri, Eon Soo Lee, and Mohammad Reza Salimi

IMECE2014-37836 .................................................................................................V007T09A069
Similar Region in Electroosmotic Flow Rate for Newtonian and Non-Newtonian Fluids Using
Dissipative Particle Dynamics (DPD)
Ramin Zakeri and Eon Soo Lee

IMECE2014-37840 .................................................................................................V007T09A070
Simulation of Nano Polymer Chain Sensor in Electroosmotic Flow Using Dissipative Particle
Dynamics (DPD) Method
Ramin Zakeri and Eon Soo Lee

IMECE2014-38022 .................................................................................................V007T09A071
Testing the ASMTurb Method on the Example Modelling of the Budget Equation of
Turbulent Kinetic Energy
Yu V. Nuzhnov

SYMPOSIUM ON CFD APPLICATIONS FOR OPTIMIZATION AND CONTROLS
IMECE2014-36209 .................................................................................................V007T09A072
Hydraulic Design of Inlet Guide Vane and its Full Flow Passage Numerical Simulation on
Centrifugal Pump
Hucan Hou, Yongxue Zhang, Zhenlin Li, Xin Zhou, and Zizhe Wang

IMECE2014-36401 .................................................................................................V007T09A073
Multi-Objective Optimization for Francis Turbine Runner Using Genetic Algorithm
Koma Sato, Yuta Tamura, and Kiyohito Tani

IMECE2014-36617 .................................................................................................V007T09A074
Numerical Simulation of Flow Fields and Head Losses of Trash-Barriering in Pumping Station
Based on VOF Model
Shuquan He, Baoyun Qiu, Shiji Chu, and Xiaoli Feng

IMECE2014-36681 .................................................................................................V007T09A075
CFD Multi-Phase Flow Analysis Across Diverging Manifolds: Application in the Oil-Gas Industry
Sergio Croquer, Joaquin Vieiro, Carlos Chacon, and Miguel Asuaje
Experimental Measurements and Flow Visualization of Water Cavitation Through a Nozzle

Jeffrey Wilms, Terry Beck, Christopher M. Sorensen, Mohammad H. Hosni, Steven J. Eckels, and Don Tomasi

Development and Application of an Alternating-Color Micro-PIV System

Shenq-Yuh Jaw, Jyh-Jong Sheen, and Robert Hwang

SYMPOSIUM ON WIND TURBINES: AERODYNAMICS AND CONTROL

Yawed Effect on Wind Turbine Near Wake

Yuntian Ge and Xiuling Wang

Computational Study of Savonius Wind Turbines

Majid Rashidi, Jaikrishnan R. Kadambi, and Asmita Chinchore

YOUNG ENGINEER PAPER (YEP) CONTEST

Numeric Investigation of an Axi-Symmetric Turbulent Jet

Mohammad A. Hossain and Sarzina Hossain

Wake Alleviating Devices for Offshore Wind Turbines

Vera Klimchenko

Pumping Speed Measurement of the Rotary Vane Vacuum Pump by Using Numerical and Experimental Approaches

M. Nadeem Azam, M. Umar, M. Maqsood, Imran Akhtar, and Imran Aziz

Separated Turbulent Boundary Layer Under Unsteady Adverse Pressure Gradients: DNS and RANS

Junshin Park
