2015 International Conference on Smart Cities and Green ICT Systems (SMARTGREENS 2015)

Lisbon, Portugal
20-22 May 2015
CONTENTS

INVITED SPEAKERS

KEYNOTE SPEAKERS

Constructing Human Smart Cities
Álvaro Oliveira

Change Alone is Unchanging - Continuous Context-aware Adaptation of Service-based Systems for Smart Cities and Communities
Paolo Traverso

Smart City Concepts - Chances and Risks of Energy Efficient Urban Development
Rudolf Giffinger

Smart Cities Concept and Challenges - Bases for the Assessment of Smart City Projects
Andrés Monzón

Vision-based Perception for Intelligent Vehicles
Alberto Broggi

SMART CITIES

FULL PAPERS

Smart City Technologies and Architectures - A Literature Review
Christiana Kyriazopoulou

In the Heart of Intelligent Buildings - Occupants Practices Facing Automation
Amelie Coulbaut-Lazzarini and Guillaume Bailly

Renewable Energy-aware Data Centre Operations for Smart Cities - The DC4Cities Approach
Sonja Klingert, Florian Niedermeier, Corentin Dupont, Giovanni Giuliani, Thomas Schulze and Hermann de Meer

Guideline for Crowd Evacuation Simulation - Validation of a Pedestrian Simulator with RiMEA Test Scenarios
Yayun Zhou, Wolfram Klein and Hermann Georg Mayer

Faster, Cheaper, Cleaner - Assessing Urban Mobility
Gonçalo Salazar, João Pedro Silva and Bernardo Ribeiro

SHORT PAPERS

A Data Model for Energy Decision Support Systems for Smart Cities - The Case of BESOS Common Information Model
G. Anadiotis, E. Hatzoplaki, K. Tsatsakis and T. Tsitsanis

Social Acceptance and Its Role for Planning Technology Infrastructure - A Position Paper, Taking Wind Power Plants as an Example
Barbara S. Zaunbrecher and Martina Ziefle

Electricity and Heat Sector Coupling for Domestic Energy Systems - Benefits of Integrated Energy System Modelling
Akhila Jambagi, Michael Kramer and Vicky Cheng

XI
Methodology for Energy Efficiency Assessment in the Transport Sector for Smart Cities
M. Fernanda Mantilla R., Angelica Nieto L., Jose L. Martinez Lastra and Elli Kotakorpi

Definition of Key Performance Indicators for Energy Efficient Assessment in the Transport Sector
R. M. Fernanda Mantilla, L. Angelica Nieto and Jose L. Martinez Lastra

Parameters Affecting the Energy Performance of the Transport Sector in Smart Cities
M. Fernanda Mantilla R., Angelica Nieto L. and Jose L. Martinez Lastra

Energy Book for Buildings - Occupants Incorporation in Energy Efficiency of Buildings
Nastaran Asadi Zanjani, Georgios Lilis, Gilbert Conus and Maher Kayal

A Probabilistic Approach to Parking - Benefits of Routing Instead of Spotting
Gabor Feher, Balazs Andras Lajtha and Akos Lovasz

Towards a Sustainable Smart Cities Integration in Teaching and Research
Darya Bululukova and Harald Wahl

Multi-resource Optimized Smart Management of Urban Energy Infrastructures for Improving Smart City Energy Efficiency
Massimo Bertoncini

ENERGY-AWARE SYSTEMS AND TECHNOLOGIES

FULL PAPERS

Optimization of Coil Parameters for a Nonlinear Two Degree-of-Freedom (2DOF) Velocity-amplified Electromagnetic Vibrational Energy Harvester
Elisabetta Boco, Valeria Nico, Declan O’Donoghue, Ronan Frizzell, Gerard Kelly and Jeff Punch

Bottom-up Analysis of the Solar Photovoltaic Potential for a City in the Netherlands - A Working Model for Calculating the Potential using High Resolution LiDAR Data
B. B. Kausika, O. Dolla, W. Folkerts, B. Siebenga, P. Hermans and W. G. J. H. M. van Sark

Central Model Predictive Control of a Group of Domestic Heat Pumps - Case Study for a Small District
R. P. van Leeuwen, J. Fink and G. J. M. Smit

DeLi2P - A User Centric, Scalable Demand Side Management Strategy for Smart Grids
Syed Muhammad Ali, Mohammad Naveed, Fahad Javed, Naveed Arshad and Jahangir Ikram

Comfort-constrained Demand Flexibility Management for Building Aggregations using a Decentralized Approach
L. A. Hurtado, E. Mocanu, P. H. Nguyen, M. Gibescu and W. L. Kling

Voltage Control with Local Decisions in Low Voltage Distribution Grids with DER Penetration
Antonio Grilo and Mario Nunes

Seasonally Aware Routing for Thermoelectric Energy Harvesting Wireless Sensor Networks
Aristotelis Kollias and Ioannis Nikolaidis

A Sensitivity Study of PMU-based Fault Detection on Smart Grid
Richard Barella, Duc Nguyen, Ryan Winter, Kuei-Ti Lu, Scott Wallace, Xinghui Zhao and Eduardo Cotilla-Sanchez
Short Papers

Modeling of Nonlinear Dynamics of Active Components in Intelligent Electric Power Systems

Konstantin Suslov, Svetlana Solodusha and Dmitry Gerasimov

An Empirical Study of Real-time Feedback and Dynamic Pricing Effects on Electric Power Consumption - Field Experiment on a Remote Island in Japan

Koji Shimada, Yuki Ochi, Takuya Matsumoto, Hiroshi Matsugi and Takao Awata

High Frequency Non-intrusive Electric Device Detection and Diagnosis

Roman Jonetzko, Matthias Detzler, Klaus-Uwe Gollmer, Achim Guldner, Marcel Huber, Rainer Michels and Stefan Naumann

Price based Unit Commitment with Wind Generation and Market Clearing Price Variations

Vaidyanath Ramachandran, Junbiao Han, Sarika Khushalani Solanki and Jignesh Solanki

Power Capping of CPU-GPU Heterogeneous Systems using Power and Performance Models

Kazuaki Tsuzuku and Toshio Endo

Fine-tuning Genetic Algorithm for Photovoltaic-Proton Exchange Membrane Fuel Cell Hybrid System Optimization

Mustapha Hatti and Hachemi Rahmani

Analyzing Multi-microgrid with Stochastic Uncertainties Including Optimal PV Allocation

H. Keshkhar, J. Solanki and S. Khushalani Solanki

Micro Grid Architecture for Line Fault Detection and Isolation

Maneesha Vinodini Ramesh, Neethu Mohan and Aryadevi Remanidevi Devidas

Enhanced LZMA and BZIP2 for Improved Energy Data Compression

Zaid Bin Tariq, Naveed Arshad and Muhammad Nabeel

Combined Visual Comfort and Energy Efficiency through True Personalization of Automated Lighting Control

C. Malavazos, A. Papanikolaou, K. Tsatsakis and E. Hatzoplaki

Overview of Socio-Economic Issues for Smart Grids Development

Simona Bigerna, Carlo Andrea Bollino and Silvia Micheli

Test of New Control Strategies for Room Temperature Control Systems - Fully Controllable Surroundings for a Heating System with Radiators

Nina Kopmann, Rita Streblow and Dirk Müller

A New Approach to Power Consumption Reduction of Street Lighting

Adam S?dzivy and Leszek Kotulski

multiFLEX: Flexible Multi-utility, Multi-service Smart Metering Architecture for Energy Vectors with Active Prosumers

Edoardo Patti, Enrico Pons, Dario Martellacci, Federico Boni Castagnetti, Andrea Acquaviva and Enrico Macii

Secondary Control in AC Microgrids - Challenges and Solutions

Omid Palizban and Kimmo Kauhaniemi

Citizens Collaboration to Minimize Power Costs in Smart Grids - A Game Theoretic Approach

Tarek AlSkaif, Manel Guerrero Zapata and Boris Bellalta

Commercial Buildings Energy Performance within Context - Occupants in Spotlight

Sanja Lazarova-Molnar, Mikkel Baun Kjergaard, Hamid Reza Shaker and Bo Nørregaard Jørgensen
FULL PAPERS

Agent-based Transportation Demand Management - Demand Effects of Reserved Parking Space and Priority Lanes in Comparison and Combination
Markus C. Beutel, Sebastian Addicks, Barbara S. Zaunbrecher, Simon Himmel, Karl-Heinz Krempels and Martina Ziefle

Using Flexibility Information for Energy Demand Optimization in the Low Voltage Grid
Sandford Bessler, Domagoj Drenjanac, Eduard Hasenleithner, Suhail Ahmed-Khan and Nuno Silva

SHORT PAPERS

A Context-free Smart Grid Model using Pretopologic Structure
Guillaume Guérard, Soufian Ben Amor and Alain Bui

Power Theft Detection in Microgrids
Aryadevi Remanidevi Devidas and Maneesha Vinodini Ramesh

Sustainable Computing and Communications - Internet Broadband Network of Things Applied to Intelligent Education
Y. Iano, I. T. Lima, H. J. Loschi, T. C. Lustosa, O. S. Mesquita and A. Moretti

A System for Energy Conservation Through Personalized Learning Mechanism
Aryadevi Remanidevi Devidas, Sweatha Rachel George and Maneesha Vinodini Ramesh

C.A.N.A.P.A. - Coltiviamo Azioni per Nutrire, Abitare, Pulire l'Aria (Cropping up Actions for Feeding, for Living and for Cleaning Air)
Marcello Colao, Marcello Mastrorilli, Vincenzo Fornaro, Claudio Natile and Elvira Tarsitano

Integrating Building Automation Technologies with Smart Cities - An Assessment Study of past, Current and Future Interroperable Technologies
Georgios Lilis, Gilbert Conus, Nastaran Asadi and Maher Kayal

Interconnecting Smart Grids and Clouds to save Energy
Anne-Cécile Orgerie

Connecting Smart Grid Protocol Standards - A Mapping Model Between Commonly-used Demand-response Protocols OpenADR and MIRABEL
Sevket Gökay, Markus C. Beutel, Houran Ketabdar and Karl-Heinz Krempels

The EPOC Project - Energy Proportional and Opportunistic Computing System
Nicolas Beldiceanu, Barbara Dumas Feres, Philippe Gravey, Sabbir Hasan, Claude Jard, Thomas Ledoux, Yunbo Li, Didier Lime, Gilles Madi-Wamba, Jean-Marc Menaud, Pascal Morel, Michel Morvan, Marie-Laure Moulinard, Anne-Cécile Orgerie, Jean-Louis Pazat, Olivier Roux and Ammar Sharaiha

Prospective Products and Benefits of the Green AGH Campus Project - Providing Scaled-down Future Smart Grid Experience
Igor Wojnicki, Sebastian Ernst and Leszek Kotulski

AUTHOR INDEX
