CONTENTS

HEAT TRANSFER: FILM COOLING

GT2015-42092 .................................................................................................................V05BT12A001
Analysis of Turbulent Scalar Flux Models for a Discrete Hole Film Cooling Flow
Julia Ling, Kevin J. Ryan, Julien Bodart, and John K. Eaton

GT2015-42103 .................................................................................................................V05BT12A002
A Wall-Function Based Model for Multi-Perforated Walls
G. Arroyo Callejo, E. Laroche, P. Millan, and F. Leglaye

GT2015-42128 .................................................................................................................V05BT12A003
Turbine Blade Surface Phantom Cooling From Upstream Nozzle Trailing Edge Ejection
Shiou-Jiuan Li, Shang-Feng Yang, Je-Chin Han, Luzeng Zhang, and Hee-Koo Moon

GT2015-42180 .................................................................................................................V05BT12A004
A Three-Regime Based Method for Correlating Film Cooling Effectiveness for Cylindrical and Shaped Holes
Lieke Wang, Mats Kinell, Hossein N. Najafabadi, and Mats Karlsson

GT2015-42184 .................................................................................................................V05BT12A005
Film Cooling Effectiveness of Transonic Turbine Vane Suction Side With Compound-Angle Shaped Hole Configuration
Shang-Feng Yang, Je-Chin Han, Alexander Mirza Moghadam, and Ardeshir Riahi

GT2015-42188 .................................................................................................................V05BT12A006
Experimental Study of Sister Hole Film Cooling Performance in a Rotating Flat Plate Model
Hong Wu, Huichuan Cheng, Yulong Li, and Shuiting Ding

GT2015-42206 .................................................................................................................V05BT12A007
Full-Scale Turbine Vane End-Wall Film-Cooling Effectiveness Distribution Using PSP Technique
Chao-Cheng Shiau, Andrew F. Chen, Je-Chin Han, Salam Azad, and Ching-Pang Lee

GT2015-42233 .................................................................................................................V05BT12A008
Full Coverage Shaped Hole Film Cooling in an Accelerating Boundary Layer With High Free-Stream Turbulence
J. E. Kingery and F. E. Ames

GT2015-42243 .................................................................................................................V05BT12A009
Film Cooling Effectiveness Improvements Using a Non-Diffusing Oval Hole
Emin Issakhanian, Christopher J. Elkins, and John K. Eaton

GT2015-42249 .................................................................................................................V05BT12A010
Multi-Objective CFD Optimisation of Shaped Hole Film Cooling With Mesh Morphing

GT2015-42263 .................................................................................................................V05BT12A011
Turbine Platform Cooling and Blade Suction Surface Phantom Cooling From Simulated Swirl Purge Flow
Shiou-Jiuan Li, Jiyeon Lee, Je-Chin Han, Luzeng Zhang, and Hee-Koo Moon
Heat Transfer Measurements Downstream of Trenched Film Cooling Holes Using a Novel Optical Two-Layer Measurement Technique
Peter Schreivogel and Michael Pfitzner

Combined Experimental and Numerical Study of Showerhead Film Cooling in a Linear Nozzle Vane Cascade
G. Barigozzi and S. Ravelli

A Superposition Technique for Multiple-Row Film-Cooling for Calculation of 2-D Effectiveness and Heat Transfer Coefficients
Peter T. Ingram and Savas Yavuzkurt

A New Test Facility to Investigate Film Cooling on a Non-Axisymmetric Contoured Turbine Endwall: Part II — Heat Transfer and Film Cooling Measurements
Johannes Kneer, Franz Puetz, Achmed Schulz, and Hans-Jörg Bauer

Effect of Hole Diameter on Nozzle Endwall Film Cooling and Associated Phantom Cooling
Luzeng Zhang, Juan Yin, Kevin Liu, and Moon Hee-Koo

Turbine Blade Tip Film Cooling With Blade Rotation: Part I — Tip and Pressure Side Coolant Injection
Onieluan Tamunobere and Sumanta Acharya

Turbine Blade Tip Cooling With Blade Rotation: Part II — Shroud Coolant Injection
Onieluan Tamunobere and Sumanta Acharya

Predicting Adiabatic Film Effectiveness of a Turbine Vane by Two-Equation Turbulence Models
Prasert Prapamonthon, Huazhao Xu, Jianhua Wang, and Ge Li

A Detailed Uncertainty Analysis of Adiabatic Film Cooling Effectiveness Measurements Using Pressure Sensitive Paint
Greg Natsui, Zachary Little, Jayanta S. Kapat, Jason E. Dees, and Gregory Laskowski

Quantitative MRI Measurements of Hot Streak Development in a Turbine Vane Cascade
Sayuri D. Yapa, Christopher J. Elkins, and John K. Eaton

Effects of Crossflow in an Internal-Cooling Channel on Film Cooling of a Flat Plate Through Compound-Angle Holes
Zachary T. Stratton, Tom I.-P. Shih, Gregory M. Laskowski, Brian Barr, and Robert Briggs

Aerodynamic and Heat Transfer Characterization of a Nozzle Vane Cascade With and Without Platform Cooling
G. Barigozzi, A. Perdichizzi, M. Henze, and J. Krueckels
An Experimental Investigation on Transpiration Cooling Based on the Double-Laminated Sintered Woven Wire Mesh Structures
Ma Jiandong, Xiang Luo, Lv Pin, Liu Yangpeng, and Li Haiwang

The Effects of Inlet Reynolds Number, Exit Mach Number and Incidence Angle on Leading Edge Film Cooling Effectiveness of a Turbine Blade in a Linear Transonic Cascade
Cong Liu, Hui-ren Zhu, Zhong-yi Fu, and Run-hong Xu

Experimental Study of Leakage Flow on Flow Field and Film Cooling of High Pressure Turbine Blade Platform
Kenichiro Takeishi, Yutaka Oda, and Shintaro Kozono

Scaling of Adiabatic Effectiveness and Net Heat Flux Reduction From Near Ambient to Engine Temperatures
Nathan J. Greiner, Marc D. Polanka, and James L. Rutledge

Experimental Investigation of Net Heat Flux Reduction at Combustion Temperatures
Nathan J. Greiner, Marc D. Polanka, James L. Rutledge, and Andrew T. Shewhart

Design, Characterization, and Verification of a Closed Loop Wind Tunnel With Linear Cascade and Upstream Wake Generator
Carlos R. Gonzalez, Guillaume F. Bidan, Jason W. Bitting, Christopher M. Foreman, Jean-Philippe Junca-Laplace, Kevin D. Wood, and Dimitris E. Nikitopoulos

Massively-Parallel Compressible Discontinuous Galerkin Spectral Element LES of Film Cooling
Joshua L. Camp and Andrew Duggleby

Heat Transfer Measurements of Vane Endwall With Film Cooling and Impingement Cooling
Xueying Li, Mingfei Li, Jing Ren, and Hongde Jiang

Combination Effects of Upstream-Ramp and Swirling Coolant Flow on Film Cooling Characteristics
Wenshuo Yang, Jian Pu, and Jiahua Wang

Experimental Investigation of Coolant-to-Mainstream Scaling Parameters With Cylindrical and Shaped Film Cooling Holes
Joshua B. Anderson, Emily J. Boyd, and David G. Bogard

Aerodynamic Analysis of Film Cooling Jet Under Different Main Stream Pressure Gradient
Yanmin Qin, Hong Yin, Jing Ren, and Hongde Jiang
GT2015-43210 ................................................................. V05BT12A035
Measurement and Prediction of Adiabatic Film Effectiveness of Combustor Representative Effusion Arrays
  Jason Krawciw, Damian Martin, and Paul Denman

GT2015-43283 ................................................................. V05BT12A036
Film Cooling Parameter Waveforms on a Turbine Blade Leading Edge Model With Oscillating Stagnation Line
  James L. Rutledge, Tylor C. Rathsack, Matthew T. Van Voorhis, and Marc D. Polanka

GT2015-43301 ................................................................. V05BT12A037
Heat Transfer and Film Cooling on a Contoured Blade Endwall With Platform Gap Leakage
  Stephen P. Lynch and Karen A. Thole

GT2015-43339 ................................................................. V05BT12A038
Effect of High Freestream Turbulence on Flowfields of Shaped Film Cooling Holes
  Robert P. Schroeder and Karen A. Thole

GT2015-43345 ................................................................. V05BT12A039
Film Cooling Modelling for Gas Turbine Nozzles and Blades: Validation and Application
  Luca Andrei, Luca Innocenti, Antonio Andreini, Bruno Facchini, and Lorenzo Winchler

GT2015-43602 ................................................................. V05BT12A040
Assessment of Large Eddy Simulation Predictive Capability for Compound Angle Round Film Holes
  Gregory Rodebaugh, Zachary Stratton, Gregory Laskowski, and Michael Benson

GT2015-43603 ................................................................. V05BT12A041
Experimental and Numerical Investigations of the Heat Transfer and Flow Field in a Trailing Edge Cooling Geometry: Part II — LES and Hybrid RANS/LES Study
  Elizaveta Ivanova, Gustavo Ledezma, Guanghua Wang, and Gregory M. Laskowski

GT2015-43731 ................................................................. V05BT12A042
Building Block Experiments in Discrete Hole Film Cooling
  Kevin J. Ryan, Filippo Coletti, Christopher J. Elkins, and John K. Eaton

GT2015-43781 ................................................................. V05BT12A043
An Experimental Study on Film Cooling Performance Behind Barchan Dune-Shaped Ramps Using PSP and PIV Techniques
  Wenwu Zhou and Hui Hu

GT2015-43808 ................................................................. V05BT12A044
Investigation of Spiral and Sweeping Holes
  Douglas Thurman, Philip Poinsatte, Ali Ameri, Dennis Culley, Surya Raghu, and Vikram Shyam

GT2015-43831 ................................................................. V05BT12A045
Local Heat and Mass Transfer Characteristics for Multi-Layered Impingement/Effusion Cooling
  Seon Ho Kim, Kyeong Hwan Ahn, Jun Su Park, Eui Yeop Jung, Ki-Young Hwang, and Hyung Hee Cho

GT2015-43841 ................................................................. V05BT12A046
Experimental and Numerical Investigations of the Heat Transfer and Flow Field in a Trailing Edge Cooling Geometry: Part 1 — Experimental Study With IR Thermography and PIV
  Guanghua Wang, Jordi Estevadeordal, James DeLancey, Jeremy Bailey, James Kopriva, and Gregory Laskowski
