Handbook on Water Security

Edited by

Claudia Pahl-Wostl
Professor for Resources Management, Institute of Environmental Systems Research, University of Osnabrück, Germany

Anik Bhaduri
Executive Director, Sustainable Water Future Programme (formerly the Global Water System Project), Australia

Joyeeta Gupta
Professor of Environment and Development in the Global South, Department of Human Geography, Planning and International Development Studies, University of Amsterdam, and Professor at UNESCO-IHE Institute for Water Education, Delft, the Netherlands
## Contents

*List of contributors*  
Foreword  Dr Uschi Eid  

1 Water security: a popular but contested concept  
*Claudia Pahl-Wostl, Joyeeta Gupta and Anik Bhaduri*  

1 Water security: a popular but contested concept

### PART I CONCEPTUAL PERSPECTIVES

2 Water security: critical analysis of emerging trends and definitions  
*Christina Cook and Karen Bakker*

3 Water security: past, present and future of a controversial concept  
*Janos Bogardi, Ursula Oswald Spring and Hans Günter Brauch*

4 Water securities and the individual: challenges from human security to consumerism  
*Jeremy Allouche, Alan Nicol, Lyla Mehta and Shilpi Srivastava*

5 The social construction of water security discourses: preliminary evidence and policy implications from the Middle East  
*Itay Fischhendler and Daniel Nathan*

6 Water security, systemic risks and adaptive water governance and management  
*Claudia Pahl-Wostl*

7 How trade policies can help to achieve water security in a transboundary setting  
*Anik Bhaduri*

8 Water sovereignty and security, high politics and hard power: the dangers of borrowing discourses!  
*Joyeeta Gupta, Joseph W. Dellapenna and Marcel van den Heuvel*

### PART II THEMATIC PERSPECTIVES

9 Perspectives on climate change impacts and water security  
*Fulco Ludwig, Henk van Schaik, John H. Matthews, Diego Rodriguez, Marloes H.N. Bakker, Patrick Huntjens, Karin Lexén and Peter Droogers*

10 Groundwater and security  
*Kirstin I. Conti, Neno Kukurić and Joyeeta Gupta*
Handbook on water security

11 Role of water security for agricultural and economic development – concepts and global scenarios
Claudia Ringler, Tingju Zhu, Sebastian Gruber, Ronan Treguer, Laurent Auguste, Lee Addams, Nicola Cenacchi and Timothy B. Sulser

12 Human security and access to water, sanitation, and hygiene: exploring the drivers and nexus
Pedi Obani and Joyeeta Gupta

13 The ecology of water security
Ben Stewart-Koster and Stuart E. Bunn

14 Water security and environmental water needs: the role of the ecosystem services concept and transformation of governance systems
Claudia Pahl-Wostl and Kathrin Knüppe

15 Secure water supply in water-scarce regions
Francisco Meza and Christopher A. Scott

PART III REGIONAL PERSPECTIVES

16 Water security or water ‘securities’? Increasing complexity in balancing of multiple goals in Spain
Elena López-Gunn, Mario Ballesteros, Lucia De Stefano, Alberto Garrido, Nuria Hernández-Mora and Bárbara A. Willaarts

17 Water security in Southern Africa: discourses securitising water and the implications for water governance and politics
Richard Meissner

18 Water security – China perspective
Hong Yang, Junguo Liu and Jun Xia

19 Water security in Southeast Asia region
Felino P. Lansigan and Amparo C. dela Cruz

20 Australian water security: a water–food–environment–energy nexus perspective
Marian J. Patrick, Sondoss Elsawah, Isabela Burgher and Anthony J. Jakeman
