Dynamic Deformation, Damage and Fracture in Composite Materials and Structures

Edited by

Vadim V. Silberschmidt
Contents

List of contributors xi
Woodhead Publishing Series in Composites Science and Engineering xiii

1 Introduction 1
V.V. Silberschmidt

Part One  Low-velocity loading 5

2 Damage tolerance of composite structures under low-velocity impact 7
C. Bouvet, S. Rivallant
2.1 Introduction 7
2.2 Principles of damage tolerance 8
2.3 The different damage types 11
2.4 Impact damage 15
2.5 Damage detectability 21
2.6 Residual strength after impact 25
2.7 Impact threat 28
2.8 Conclusions 30
References 31

3 Damage in laminates from low-velocity impacts 35
S. Abrate
3.1 Introduction 35
3.2 Impact damage 36
3.3 Damage detection and structural health monitoring 47
3.4 Impact damage predictions for low-velocity impacts 53
3.5 Conclusions 57
References 57

4 Multiscale modeling of delamination damage in laminated structures 71
R. Massabò
4.1 Introduction 71
4.2 Models for laminated structures 76
4.3 A multiscale model for multilayered plates with imperfect interfaces and delaminations 80
4.4 Static and dynamic characteristics of laminated plates with cohesive interfaces and delaminations subjected to thermomechanical loading 93
4.5 Conclusions 106
Acknowledgments 107
References 107
Appendix 109

5 Low-velocity impact of composite laminates: damage evolution 117
Y. Shi, C. Pinna, C. Soutis
5.1 Introduction 117
5.2 Composite damage criteria 118
5.3 Damage prediction of composites under low-velocity impact 130
5.4 Conclusions 143
References 144

6 Low-velocity impact on laminates 147
G. Minak, M. Fotouhi, M. Ahmadi
6.1 Low-velocity impact on thin and thick laminates 147
6.2 Low-velocity impact on thin and thick laminates under preload (tension/compression) 148
6.3 Low-velocity impact on curved laminates 155
6.4 Conclusions 162
References 163

Part Two  High-velocity loading 167

7 High-velocity impact damage in CFRP laminates 169
S. Yashiro, K. Ogi
7.1 Introduction 169
7.2 Experiments 171
7.3 Experimental results 173
7.4 Discussion 178
7.5 Conclusions 188
References 189

8 Dynamic damage in FRPs: from low to high velocity 193
V.A. Phadnis, A. Roy, V.V. Silberschmidt
8.1 Introduction 193
8.2 Impact response of composite materials 193
8.3 Damage mechanisms of FRPs under high-velocity impact 196
8.4 Air-blast response of curved CFRP laminates 199
8.5 Ballistic impact response of hybrid woven FRPs 211
8.6 Conclusions 219
Acknowledgements 220
References 220
Part Three  Shock and blast  223

9  The dynamic loading response of carbon-fiber-filled polymer composites  225
D.M. Dattelbaum, J.D. Coe
9.1 Introduction  225
9.2 Materials  234
9.3 Methods  239
9.4 Results  244
9.5 Discussion of shock response of CP and CE composites  263
9.6 Summary and conclusions  272
Acknowledgments  274
References  275

10  The response to underwater blast  279
V.L. Tagarielli, A. Schiffer
10.1 Introduction  279
10.2 Laboratory-scale underwater blast experiments  281
10.3 Experimental results  286
10.4 Modelling and optimisation  298
10.5 Conclusions  304
Acknowledgements  306
References  306

11  Dynamic loading of composite structures with fluid—structure interaction  309
Y.W. Kwon
11.1 Introduction  309
11.2 Experimental study of impact on composite structures with FSI  309
11.3 Numerical analysis of impact on composite structures with FSI  319
11.4 Experimental study of vibration of composite structures in water  322
11.5 Numerical analysis of vibration of composite structures in water  324
11.6 Experimental study of cyclic loading of composite structures with FSI  330
11.7 Numerical analysis of cyclic loading of composite structures with FSI  333
11.8 Conclusions  335
References  336

12  Shock loading of polymer composites  337
P.J. Hazell
12.1 Shock propagation in composites  337
12.2 The response of composites to air-blast loads  349
12.3 Concluding remarks and future research needs  357
References  358
