# Table of Contents

*Christoph Beierle, Gerhard Brewka, Matthias Thimm*

A Personal Glimpse on Gabriele Kern-Isberner's Contributions to Artificial Intelligence .................................................. 1

## I Foundations

*Benjamin Fine, Gerhard Rosenberger*

i as a Quadratic Residue in the Gaussian Integers ............ 23

*Anja Moldenhauer, Gerhard Rosenberger*

Cryptosystems Using Automorphisms of Finitely Generated Free Groups.................................................. 31

*Bernhard Thalheim, Marina Tropmann-Frick*

Evaluation and Capability of Models.................................... 52

## II Rationality and Non-monotonic Reasoning

*James Delgrande, Bryan Renne*

On a Minimal Logic of Default Conditionals ....................... 73

*Sven Ove Hansson*

Alternatives to the Ramsey Test ................................. 84

*Marco Ragni*

Can non-monotonic logics model human reasoning?........... 98

*Wolfgang Spohn*

Enumerative Induction ........................................... 112

## III Problem Solving and Query Answering

*Joachim Biskup, Cornelia Tadros*

On the Simulation Assumption for Controlled Interaction Processing................................................ 133

*Thomas Eiter, Christoph Redl, Peter Schüller*

Problem Solving Using the HEX Family .......................... 150
Thomas Lukasiewicz, Maria Vanina Martinez, Cristian Molinaro, Livia Predoiu, Gerardo I. Simari
Ranking Answers to Datalog+/- Ontologies based on Trust and Reliability of Subjective Reports ............... 175

IV Belief Revision

Michael Abraham, Israel Belfer, Uri Schild, Dov Gabbay
Identity Merging and Identity Revision in Talmudic Logic: An Outline Paper .................................. 195

Salem Benferhat, Amen Ajroud
On the Syntactic Representation of Multiple Iterated Belief c-Revision ............................................. 210

Marcelo A. Falappa, Alejandro Garcia, Guillermo Simari
A Set of Operations for Stratified Belief Bases ................. 223

Eduardo Ferme, Sara Gonçalves
On the Iteration of KM-Update ................................. 243

V Uncertain Reasoning

Igor Douven
On de Finetti on Iterated Conditionals ......................... 265

Didier Dubois, Henri Prade
Qualitative and Semi-Quantitative Modeling of Uncertain Knowledge - A Discussion .......................... 280

Marc Finthammer, Christoph Beierle
On the Relationship Between Aggregating Semantics and FO-PCL Grounding Semantics for Relational Probabilistic Conditionals ........................................ 297

Elizabeth Howarth, Jeff Paris
The Finite Values Property ..................................... 316

Nico Potyka
Relationships Between Semantics for Relational Probabilistic Conditional Logics ............................. 332

Wilhelm Rödder, Friedhelm Kulmann and Andreas Dellnitz
A New Rationality in Network Analysis - Status of Actors in a Conditional-logical Framework ................. 348

VIII
Klaus-Dieter Schewe, Flavio Ferrarotti, Loredana Tec, Qing Wang
Towards a Behavioural Theory for Random Parallel Computing ........................................ 365

VI Argumentation

Leila Amgoud
On Argumentation-based Paraconsistent Logics ........... 377

Dov Gabbay, Odinaldo Rodrigues
Further Applications of the Gabbay-Rodrigues Iteration Schema in Argumentation and Revision Theories ........ 392

Author Index ................................................................. 409
