PROCEEDINGS of the

14th MINI CONFERENCE ON VEHICLE SYSTEM DYNAMICS, IDENTIFICATION AND ANOMALIES

Held at the
Faculty of Transportation Engineering and Vehicle Engineering
Budapest University of Technology and Economics, Hungary
BUDAPEST, 10-12 November, 2014

Edited by Prof. I. Zobory

VSDIA 2014

BUDAPEST UNIVERSITY OF TECHNOLOGY AND ECONOMICS
## CONTENTS

### PREFACE

9

### PLENARY SESSION

TRUE, H. - XUE-JUN, G. - YING-HUI, L. (Denmark + China)

Multiple Solution Branches in Railway Vehicle Dynamics ................................................. 13

ZBOINSKI, K. - WOZNICA, P. (Poland)

Study of Some Dynamical Properties of Railway Transition Curves with Non-linear Curvatures ................................................................. 23

SAKAMOTO, M. - LIN, S. - SUDA, Y. - KAGEYAMA, M. - KOGA, S. - KUNIMI, T. - KAWANABE, T. (Japan)

Study on the Improvement of Sign Detection System of Flange Climb Derailment with Real-Scale Wheel Climb Experiment ........................................ 31

MELNIK, R. - SOWINSKI, B. (Poland)

The Analysis of Rail Vehicle Model Eigenvalues for Suspension Fault Detection Method ................................................................. 39

LIU, X. - ALFI, S. - BRUNI, S. (Italy)

Condition Monitoring of Rail Vehicle Suspension Based on Recursive Least-Square Algorithm .............................................................................. 47

KOLONITS, F. (Hungary)

Fretting due to Rotatory Load of Railway Axle in Hub .......................................................... 55

WINKLER, N. - DRUGGE, L. - STENSSON-TRIGELL, A. - EFRAIMSSON, G. (Sweden)

Aerodynamics of Road Vehicles in Transient Cross-Winds – Coupling Aero to Vehicle Dynamics ................................................................................. 63

Hierarchical Robust Control for In-Wheel Motor Vehicles ......................................................... 71

VANDANJON, P-O. - COIRET, A. - LORINO, T. (France)

Application of Viability Theory for Road Vehicle Active Safety Using Parallelized Algorithm .............................................................................. 83

SUNDER, R. - PROKOP, G. (Germany)

Rig Based Tire Evaluation for an Indirect Tire Ppressure Monitoring System (iTPMS) ........................................................................................................... 91

### SESSION FOR DYNAMICS, IDENTIFICATION AND ANOMALIES OF RAILWAY VEHICLES

99

FIRLIK, B. (Poland)

Identification of Non-Linear Phenomena at the Wheel-Rail Contact Area for the Development of a New Tramway Wheel Profile ............................................ 101

BIONDA, S. - DI-GIALLEONARDO, E. - CAZZULANI, G. - BRAGHIN, F. (Italy)

Development of a New Algorithm for Wheel-Rail Contact Force Estimation Using Reduced Measurement Sets ................................................................. 111
DUSZA, M. - ZBOINSKI, K. (Poland)
The Wheel-Rail Coefficient of Friction Influence on Rail Vehicle Models
Lateral Stability - Bifurcation Approach ............................................................ 123

PARÁZSÓ, J. - SZABÓ, A. (Hungary)
Simulation of the Effect of Vehicle Parameter Asymmetricities on the
Running Stability of a Six-Axle Locomotive ..................................................... 135

KOMINOWSKI, J. - SOWINISKI, B. (Poland)
Analysis of Periodical Measurements of Railway Vehicle Dynamics ................. 147

ZBOINSKI, K. - GOLOFIT-STAWINSKA, M. (Poland)
The Issue of Classification of Railway Vehicles Behaviour in Transition Curves
above Critical Velocity ......................................................................................... 153

KRULICH, P. - CAPEK, J. (Czech Republic)
Influence of Bogie Interconnection on Vehicle-Track Interaction ...................... 163

DI-GIALLEONARDO, E. - MELZI, S. - TOMASINI, G. (Italy)
Cross-Wind Effect on “High Speed” Freight Wagons ....................................... 173

SEBESAN, I. - BADEA, C.N. (Romania)
Dynamic Study on Safety against Derailment of a Freight Tank Wagon .............. 185

BRAGHIN, F. - CAZZULANI, G. - DI-GIALLEONARDO, E. -
MELZI, S. (Italy)
Effect of Freight Train Composition on Ride Safety of Low-Flatcar Wagons ........ 193

CHUDZIKIEWICZ, A. - SOWINSKA, M. (Poland)
Low-Floor Trams Running Gear – Comparative Simulation Studies .................... 203

KOSTREWSKI, M. - CHUDZIKIEWICZ, A. (Poland)
Rail-Track Quality Indicator towards Rail Vehicle Driving Dynamics ............... 211

LEONARDI, F. - ALFI, S. - BRUNI, S. (Italy)
Treatment of Driving Dynamic Datasets of a Railway Vehicle Aimed at
Condition Monitoring of the Track ..................................................................... 219

FERENCZ, P. (Hungary)
Specialties of Bogie Overhaul at Stadler Bogie Revision Centre of Competence .... 227

CARNEVALE, M. - CORRADI, R. (Italy)
Development of a Robust Position Detection System to Be Implemented on Urban
Tramcars Equipped with Active Steering Bogies ................................................. 235

BIONDA, S. - BRAGHIN, F. - CROSIO, P. - DI-GIALLEONARDO, E. (Italy)
Integration of the Measure of the Primary Suspension Deflection into a
Dynamometric Wheel-Set Equipped with Strain Gauge Bridges ....................... 243

BRAGHIN, F. - SABBIONI, E. - MILANI, D. - BIONDA, S. (Italy)
Portable Device for Rail Bending and Torsion Measurement ............................ 253

CSIBA, J. (Hungary)
Comparative Investigation of the Components Determining the Running
Technical Characteristics of Railway Carriage Bogies .................................... 263

KRÉMER, M. (Hungary)
On Model Validation, What Does the Validated State Mean for the User? ........ 275
MOLNÁRFI, Z. (Hungary)  
Investigation into the Energy Optimum Control in Special Cases of Railway Traction ..........285

SESSION FOR DYNAMICS, IDENTIFICATION AND ANOMALIES OF ROAD VEHICLES .........................................................................................................................293

SABBIONI, E. - CHELI, F. - IVONE, D. (Italy)  
Real Time Tyre-Road Friction Coefficient Identification and Vehicle State Estimations by Means of Tyre Force Measurements ..............................................295

SALIS, F. - BRAGHIN, F. (Italy)  
Modelling and Performance Analysis of Active Clutch and Gear Shift for Formula Student Vehicles ..................................................................................................................305

NYERGES, Á. - NÉMETH, H. (Hungary)  
Low Pressure Intake Throttle and Exhaust Brake Support Assessment on the Low Pressure Loop Exhaust Gas Recirculation on Medium Duty Diesel Engines ..........315

HESZ, M. - MELEGH, G. (Hungary)  
Traffic Accident Reconstruction Possibilities from EDR Data Source ..................325

KOKREHEL, C.S. - NÉMETH, H. (Hungary)  
On the Mechanical Stress Change of a Driven Bus Axle Depending on the Hybridization Factor of the Driveline .................................................................331

KOVAČS, S. - VERESS, Á. (Hungary)  
Aero Acoustic Calculation of a Pneumatic Valve ......................................................339

SESSION FOR DYNAMICS, IDENTIFICATION AND ANOMALIES OF AIRCRAFT AND SHIPS ...........................................................................................................349

GÁTI, B. (Hungary)  
Mathematical Model for Simulating Out-Of-The-Envelope Behaviour of Fixed Wing and Multirotor UAVs ..........................................................351

NAGY, A. (Hungary)  
Investigation on Turning Characteristic of Paragliders ........................................359

ZARE, F. - VERESS, Á. (Iran+Hungary)  
Numerical Modelling and Simulation of a Centrifugal Compressor Passage with Plausibility Check ..........................................................367

HARGITAI, C.S.L. (Hungary)  
Prediction of Inland Ship Manoeuvrability Changes by Simulation of Quasi-Stationary Manoeuvres .................................................................379

GYÖRGY, D.G. (Hungary)  
Data Investigation for Inland Vessel Maneuvering Simulation ................................389

SESSION FOR VEHICLE CONTROL THEORY AND INTERDISCIPLINARY SCIENCES .................................................................................................................401

(Mexico + France)  
INOVE: A Testbench for the Analysis and Control of Automotive Vertical Dynamics .........................................................................................................................403
NGUYEN, M-Q. - SENAME, O.- DUGARD, L. (France)
A MIMO LPV Control of Semi-Active Suspension .......................................................... 415

FERGANI, S. - SENAME, O. - DUGARD, L. (France)
LPV/H∞ Fault Tolerant Control for Automotive Semi-Active Suspensions
Using Roll and Pitch Monitoring Information .............................................................. 427

BÁRDOS, Á. - SZIMANDL, B. - NÉMETH, H. (Hungary)
Feed-forward LQ Servo Back-Pressure Controller for Engine Exhaust Throttle .......... 437

LEE, S. - NAKANO, K. - OHORI, M. (Japan)
On-Board Identification of Cornering Stiffness of Vehicle Using an Absolute
Velocity Sensor .............................................................................................................. 445

VASS, S. - NÉMETH, H. (Hungary)
CFD Modelling of a Common Rail Injector Nozzle, Flow and Spray
Characteristics, Validation Using high Speed CCD Camera ........................................ 453

SZIMANDL, B. - NÉMETH, H. (Hungary)
Analysis of an Electro-Pneumatic Clutch Model ............................................................ 465

TALIMIAN, A. - TALIMIAN, AL. (Iran)
Bending Vibration Analysis of a Mono-Symmetric Thin-Walled Beam with
Different Geometries ....................................................................................................... 475

POKORÁDI, L. (Hungary)
Reliability of Systems with Complex Interconnections ................................................. 483

SZAMOSI, B. - POKORÁDI, L. (Hungary)
Comparison of the QS 9000 and the VDA Failure Mode and Effect
Analysis Methods ............................................................................................................ 491

ADVERTISEMENTS ........................................................................................................... 499
