Health Informatics Meets eHealth
Predictive Modeling in Healthcare – From Prediction to Prevention
Proceedings of the 10th eHealth2016 Conference

Edited by
Günter Schreier
AIT Austrian Institute of Technology GmbH, Graz, Austria

Elske Ammenwerth
UMIT – University for Health Sciences, Medical Informatics and Technology, Hall in Tirol, Austria

Alexander Hörbst

# Contents

Preface

_Günter Schreier, Elske Ammenwerth, Alexander Hörbst and Dieter Hayn_

Scientific Program Committee

Reviewers

Cardiovascular Dysautonomias Diagnosis Using Crisp and Fuzzy Decision Tree:
A Comparative Study

_Ilham Kadi and Ali Idri_

Data Driven Methods for Predicting Blood Transfusion Needs in Elective Surgery

_Dieter Hayn, Karl Kreiner, Peter Kastner, Nada Breznik, Axel Hofmann, Hans Gombotz and Günter Schreier_

Clinical Decision Support for the Classification of Diabetic Retinopathy:
A Comparison of Manual and Automated Results

_Christoph Mitsch, Karsten Fehre, Sonja Prager, Christoph Scholda, Katharina Kriechbaum, Thomas Wrba and Ursula Schmidt-Erfurth_

Analyzing Readmissions Patterns: Assessment of the LACE Tool Impact

_Christo El Morr, Liane Ginsburg, Victor-Seungree Nam, Susan Woollard and Bojay Hansen_

Piloting the European Unified Patient Identity Management (EUPID) Concept to Facilitate Secondary Use of Neuroblastoma Data from Clinical Trials and Biobanking

_Hubert Ehber, Dieter Hayn, Markus Falgenhauer, Michael Nitzlnader, Gudrun Schleiermacher, Riccardo Haupt, Giovanni Erminio, Raffaella Defferrari, Katia Mazzocco, Jan Kohler, Gian Paolo Tonini, Ruth Ladenstein and Günter Schreier_

Interoperability Architecture for a Paediatric Oncology European Reference Network

_Michael Nitzlnader, Adela Canete Nieto, Antonio Juan Ribelles, Barbara Brunmair, Ruth Ladenstein and Günter Schreier_

An IT-Supported Evaluation Tool for Biobanks Based on International Guidelines to Improve the Biosample Quality

_Sabrina B. Neururer, Philipp Hofer and Georg Göbel_

Towards a Holistic Biomedical Information Platform for Primary and Secondary Use Settings

_Gerd Schneider, Björn Schreiweis, Raluca Pahontu, Theresia Eichner and Björn Bergh_

Automated Transformation of openEHR Data Instances to OWL

_Birger Haarbrandt, Thomas Jack and Michael Marscholkek_
Extraction of UMLS® Concepts Using Apache cTAKES™ for German Language
Matthias Becker and Britta Böckmann

A Patient Safety Information Model for Interoperability
Jean Marie Rodrigues, Neelam Dhingra-Kumar, Stefan Schulz and Julien Souvignet

Automatic Analysis of Critical Incident Reports: Requirements and Use Cases
Kerstin Denecke

SEMCARE: Multilingual Semantic Search in Semi-Structured Clinical Data
Pablo López-García, Markus Kreuzthalser, Stefan Schulz, Daniel Scherr, Philipp Daumke, Kornél Markó, Jan A. Kors, Erik M. van Mulligen, Xinkai Wang, Hanney Gonna, Elijah Behr and Angel Honrado

Bridging the Gap Between HL7 CDA and HL7 FHIR: A JSON Based Mapping
Christoph Rinner and Georg Dufschmid

Accessing Patient Information for Probabilistic Patient Models Using Existing Standards
Jan Gaebel, Mario A. Cypko and Heinz U. Lemke

Developing an Approach for Aggregating Information from an EHR into a Fully Structured Patient Summary
Patrick Mangesius, Samrend Saboor and Thomas Schabetsberger

Impact of Internet on Cytology Information Management
Ljerka Luic and Livia Molnar

Requirements for Workflow-Based EHR Systems – Results of a Qualitative Study
Marco Schweitzer, Nelia Lasierra and Alexander Hoerbst

AAL Service Performance Measurement Cube – Key Criteria for AAL New Service Development
Johannes Kriegel, Klemens Auinger, Luise Reckwitz, Stephanie Schmitt-Rüth, Susanne Weissenberger and Linda Tuttle-Weidinger

Requirements for Evidence-Based Templates in Electronic Case Report Forms
Marco Schweitzer and Stefan Oberbichler

Identifying eHealth Opportunities to Support Medication Adherence – Findings of a Focus Group Study
Yulong Gu, John Kennely, Jim Warren, Amelia Been Ahn, Matire Harwood and Pat Neuwelt

Specific Requirements of Physiotherapists on the Practical Use of Software in the Therapeutical Process
Karin Messer-Misak and Rudolf Egger

KATIS: An eHealth System for Complementary Medicine
Venus Ogultarhan, Alban Shoshi, Rico Magnucki, Benjamin Kormeier and Ralf Hofestäd
Electronic Certification of Death in Slovenia – System Considerations
and Development Opportunities
Dalibor Stanimirovic
174

A Process Model for IT Migrations in the Context of a Hospital Merger –
Results from an Austrian Case Study
Katharina Steininger, Birgit Kempinger, Stefan Schiffer
and Gustav Pomberger
182

Animated Scatterplot – Analysis of Time-Oriented Data of Diabetes Patients
Margit Pohl, Harald Endl and Ulrich Fels
191

How Is My Field Evolving? – Network Based Analysis of Biomedical Scientific
Discourse
Cord Spreckelsen and Klaus Kabino
199

Evaluation of Game Engines for Cross-Platform Development of Mobile Serious
Games for Health
Carina Kleinschmidt and Martin Haag
207

Integrated Patient Education on U.S. Hospital Web Sites
Edgar Huang, Kerong Wu and Kelsey Edwards
215

User Interface Design in Medical Distributed Web Applications
Alexandru Serban, Mihaela Crisan-Vida, Leonard Mada
and Lacramioara Stoicu-Tivadar
223

Medical Informatics and Information Technology Supporting Oral Medicine
Janat Zvárová, Karel Chleborád, Karel Zvára and Tatjána Dostálková
230

Continual Screening of Patients Using mHealth: The Rolling Score Concept
Applied to Sleep Medicine
Claudio Zluga, Robert Modre-Osprian, Peter Kastner and Günter Schreier
237

Secondary Use of Claims Data from the Austrian Health Insurance System
with i2b2: A Pilot Study
Florian Endel and Georg Duftschmid
245

How Many Patients Could Benefit from Pre-Emptive Pharmacogenomic Testing
and Decision Support? A Retrospective Study Based on Nationwide Austrian
Claims Data
Wolfgang Kuch, Christoph Rinner, Walter Gall and Matthias Samwald
253

A Smartwatch-Based Assistance System for the Elderly Performing Fall
Detection, Unusual Inactivity Recognition and Medication Reminding
Markus Deutsch and Harald Burgsteiner
259

ICD-11 (JLMMS) and SCT Inter-Operation
Marzouk Mamou, Alan Rector, Stefan Schulz, James Campbell,
Harold Solbrig and Jean-Marie Rodrigues
267

A Diabetes Self-Management Prototype in an AAL-Environment to Detect
Remarkable Health States
Denise Schindelboeck, Friedrich Praus and Walter Gall
273
Electronic Patient Reported Outcomes in Paediatric Oncology – Applying Mobile and Near Field Communication Technology

Katharina Duregger, Dieter Hayn, Michael Nitzlnader, Martin Kropf, Markus Falgenhauer, Ruth Ladenstein and Günter Schreier

Subject Index 289
Author Index 291
