# Contents

Preface.....	xix
Acknowledgments.....	xxi
Author .....	xxiii
<b>Chapter 1</b> Ceramic Fabrication Processes: An Introductory Overview .....	1
1.1 Introduction .....	1
1.2 Ceramic Fabrication Processes.....	2
1.3 Production of Ceramics from Powders: An Overview.....	5
1.3.1 Powder Preparation and Characterization.....	7
1.3.2 Powder Consolidation.....	8
1.3.3 Sintering Process.....	9
1.3.4 Ceramic Microstructures .....	12
1.4 Case Study in Processing: Fabrication of $\text{Al}_2\text{O}_3$ from Powders .....	15
1.5 Concluding Remarks .....	17
References .....	17
<b>Chapter 2</b> Synthesis and Preparation of Powders: Mechanical Methods .....	19
2.1 Introduction .....	19
2.2 Powder Characteristics .....	20
2.2.1 Desirable Powder Characteristics for Advanced Ceramics.....	21
2.3 Powder Preparation by Mechanical Methods.....	22
2.4 High-Compression Roller Mills .....	23
2.5 Jet Mills .....	24
2.6 Ball Mills.....	25
2.6.1 Tumbling Ball Mills .....	25
2.6.1.1 Mill Parameters .....	25
2.6.1.2 Grinding Media .....	26
2.6.1.3 Particle Parameters.....	26
2.6.1.4 Empirical Relationship for Ball Milling.....	27
2.6.1.5 Practical Considerations .....	28
2.6.2 Vibratory Ball Mills.....	29
2.6.3 Attrition Mills .....	29
2.6.4 Planetary Ball Mills .....	29
2.7 High-Energy Ball Milling.....	30
2.8 Concluding Remarks .....	32
Problems.....	32
References .....	32
<b>Chapter 3</b> Powder Synthesis by Chemical Methods .....	35
3.1 Introduction .....	35
3.2 Solid-State Reactions.....	35
3.2.1 Decomposition .....	35
3.2.2 Reaction between Solids .....	41
3.2.3 Reduction .....	45

3.3	Precipitation from Liquid Solutions .....	46
3.3.1	Principles of Precipitation from Solution .....	46
3.3.1.1	Nucleation of Particles .....	46
3.3.1.2	Growth of Particles .....	48
3.3.1.3	Controlled Particle Size Distribution .....	50
3.3.1.4	Particle Growth by Aggregation .....	51
3.3.1.5	Particle Growth by Ostwald Ripening .....	52
3.3.2	Methods for Preparing Powders by Hydrolysis .....	52
3.3.2.1	Hydrolysis of Solutions of Metal Alkoxides .....	52
3.3.2.2	Hydrolysis of Solutions of Metal Salts .....	54
3.3.2.3	Coprecipitation of Complex Oxides .....	57
3.3.2.4	Precipitation under Hydrothermal Conditions .....	58
3.3.2.5	Heterogeneous Precipitation to Form Coated Particles .....	59
3.3.2.6	Industrial Preparation of Powders by Precipitation from Solution .....	62
3.3.3	Precipitation Methods Based on Evaporation of the Liquid .....	62
3.3.3.1	Spray Drying .....	62
3.3.3.2	Spray Pyrolysis .....	63
3.3.3.3	Spray Drying of Suspensions .....	66
3.4	Freeze Drying .....	67
3.5	Gel Routes .....	67
3.5.1	Sol–Gel Processing .....	67
3.5.2	Pechini Method .....	68
3.5.3	Citrate Gel Method .....	68
3.5.4	Glycine Nitrate Process .....	68
3.6	Nonaqueous Liquid Reaction .....	69
3.7	Vapor-Phase Reactions .....	69
3.7.1	Gas–Solid Reaction .....	70
3.7.2	Reaction between Gases .....	71
3.8	Concluding Remarks .....	73
	Problems .....	73
	References .....	75
<b>Chapter 4</b>	<b>Synthesis of Ceramic Nanoparticles .....</b>	<b>79</b>
4.1	Introduction .....	79
4.2	Methods for Synthesizing Ceramic Nanoparticles .....	79
4.3	Solid–Solid Methods .....	79
4.4	Solid–Vapor–Solid Methods .....	80
4.5	Liquid–Solid Methods .....	82
4.6	Liquid–Vapor–Solid Methods .....	83
4.7	Concluding Remarks .....	85
	Problems .....	87
	References .....	87
<b>Chapter 5</b>	<b>Powder Characterization .....</b>	<b>89</b>
5.1	Introduction .....	89
5.2	Physical Characterization .....	89
5.2.1	Types of Particles .....	89

5.2.1.1	Primary Particles .....	89
5.2.1.2	Agglomerates .....	90
5.2.1.3	Particles .....	91
5.2.1.4	Granules.....	91
5.2.1.5	Flocs.....	91
5.2.1.6	Colloids.....	92
5.2.1.7	Aggregates.....	92
5.2.2	Particle Size and Particle Size Distribution .....	92
5.2.2.1	Definition of Particle Size.....	92
5.2.2.2	Average Particle Size .....	93
5.2.2.3	Representation of Particle Size Data .....	95
5.2.3	Particle Shape.....	98
5.2.4	Measurement of Particle Size and Size Distribution.....	98
5.2.4.1	Microscopy .....	98
5.2.4.2	Sieving .....	99
5.2.4.3	Sedimentation .....	101
5.2.4.4	Electrical Sensing Zone Techniques (Coulter Counter) .....	102
5.2.4.5	Light Scattering .....	103
5.2.4.6	X-Ray Line Broadening.....	105
5.2.5	Surface Area .....	106
5.2.6	Porosity of Particles.....	108
5.2.6.1	Gas Adsorption (Capillary Condensation).....	109
5.2.6.2	Mercury Porosimetry.....	111
5.2.6.3	Pycnometry .....	113
5.3	Chemical Composition .....	114
5.3.1	Optical Atomic Spectroscopy: Atomic Absorption and Atomic Emission .....	114
5.3.2	X-Ray Fluorescence Spectroscopy .....	116
5.3.3	Energy-Dispersive X-Ray Analysis.....	118
5.3.4	Fourier Transform Infrared Analysis.....	118
5.4	Crystal Structure and Phase Composition.....	119
5.5	Surface Characterization .....	120
5.5.1	Surface Structure.....	122
5.5.2	Surface Chemistry.....	123
5.5.2.1	Auger Electron Spectroscopy (AES).....	123
5.5.2.2	X-Ray Photoelectron Spectroscopy (XPS).....	125
5.5.2.3	Secondary Ion Mass Spectrometry (SIMS).....	126
5.6	Concluding Remarks .....	129
	Problems.....	129
	References .....	131
<b>Chapter 6</b>	<b>Science of Colloidal Processing.....</b>	<b>133</b>
6.1	Introduction .....	133
6.2	Types of Colloidal Suspensions.....	133
6.3	Attractive Surface Forces .....	134
6.3.1	Van der Waals Forces between Atoms and Molecules .....	134
6.3.2	Van der Waals Forces between Macroscopic Bodies .....	136
6.3.3	Hamaker Constant.....	137
6.3.4	Effect of Intervening Medium .....	138

6.4	Stabilization of Colloidal Suspensions .....	140
6.5	Electrostatic Stabilization .....	141
6.5.1	Development of Charges on Oxide Particles in Water .....	141
6.5.1.1	Isomorphic Substitution .....	141
6.5.1.2	Adsorption of Ions from Solution .....	142
6.5.2	Origins of Electrical Double Layer .....	144
6.5.3	Isolated Double Layer .....	146
6.5.4	Surface Charge .....	149
6.5.5	Repulsion between Two Double Layers .....	149
6.5.6	Stability of Electrostatically Stabilized Colloids .....	151
6.5.6.1	Factors Controlling the Stability of Suspensions .....	153
6.5.7	Kinetics of Flocculation .....	154
6.5.8	Electrokinetic Phenomena .....	155
6.5.8.1	Theory .....	155
6.5.8.2	Significance of $\zeta$ Potential .....	156
6.6	Steric Stabilization .....	157
6.6.1	Adsorption of Polymers from Solution .....	158
6.6.2	Origins of Steric Stabilization .....	159
6.6.3	Effect of Solvent and Temperature .....	161
6.6.4	Stability of Sterically Stabilized Suspensions .....	162
6.6.5	Stabilization by Polymers in Free Solution .....	163
6.7	Electrosteric Stabilization .....	164
6.7.1	Dissociation of Polyelectrolytes in Solution .....	165
6.7.2	Adsorption of Polyelectrolytes from Solution .....	166
6.7.3	Stability of Electrosterically Stabilized Suspensions .....	167
6.8	Structure of Consolidated Colloids .....	168
6.9	Concluding Remarks .....	170
	Problems .....	170
	References .....	172
<b>Chapter 7</b>	<b>Rheology of Colloidal Suspensions, Slurries, and Pastes .....</b>	<b>175</b>
7.1	Introduction .....	175
7.2	Types of Rheological Behavior .....	175
7.2.1	Viscous Flow Behavior .....	175
7.2.2	Viscoelastic Behavior .....	178
7.3	Rheological Measurement .....	179
7.4	Factors Influencing the Rheology of Colloidal Suspensions .....	180
7.4.1	Interparticle Forces .....	180
7.4.1.1	Hard Sphere Systems .....	180
7.4.1.2	Soft Sphere Systems .....	183
7.4.1.3	Flocculated Systems .....	183
7.4.1.4	Effect of Particle Interactions on the Viscosity .....	183
7.4.2	Particle Concentration .....	186
7.4.3	Particle Size and Particle Size Distribution .....	186
7.4.4	Particle Morphology .....	188
7.4.5	Suspension Medium .....	188
7.5	Concluding Remarks .....	190
	Problems .....	190
	References .....	190

<b>Chapter 8</b>	Processing Additives .....	193
8.1	Introduction .....	193
8.2	Types of Additives .....	193
8.3	Solvents.....	194
8.3.1	Selection of a Solvent .....	195
8.4	Dispersants .....	197
8.4.1	Inorganic Acid Salts .....	197
8.4.2	Surfactants .....	198
8.4.3	Low to Medium Molecular Weight Polymers .....	201
8.5	Binders.....	202
8.5.1	Inorganic Binders .....	204
8.5.2	Synthetic Organic Binders .....	204
8.5.3	Natural Organic Binders .....	204
8.5.4	Selection of a Binder .....	206
8.6	Plasticizers.....	208
8.7	Other Additives.....	210
8.8	Concluding Remarks .....	211
	Problems.....	211
	References .....	212
<b>Chapter 9</b>	Granulation, Mixing, and Packing of Particles.....	213
9.1	Introduction .....	213
9.2	Granulation of Particles.....	214
9.2.1	Desirable Characteristics of Granules .....	214
9.2.2	Preparation of Granules .....	215
9.2.3	Spray Drying .....	215
9.2.4	Factors Controlling the Characteristics of Spray-Dried Granules .....	216
9.2.5	Spray Freeze Drying .....	218
9.3	Mixing of Particulate Solids.....	219
9.3.1	Mixing and Segregation Mechanisms .....	219
9.3.2	Mixture Composition and Quality .....	221
9.3.3	Statistical Methods.....	222
9.3.3.1	Mixture Composition.....	222
9.3.3.2	Standard Deviation and Variance.....	222
9.3.3.3	Theoretical Limits of Standard Deviation.....	223
9.3.3.4	Mixing Indices.....	224
9.3.4	Measurement Techniques.....	224
9.3.5	Mixing Technology .....	225
9.4	Packing of Particles .....	227
9.4.1	Regular Packing of Monosize Spheres.....	227
9.4.2	Random Packing of Particles .....	229
9.4.2.1	Monosize Particles.....	230
9.4.2.2	Bimodal Mixtures of Spheres.....	230
9.4.2.3	Binary Mixtures of Nonspherical Particles .....	234
9.4.2.4	Ternary and Multiple Mixtures .....	235
9.4.3	Continuous Particle Size Distributions .....	235
9.5	Concluding Remarks .....	237
	Problems.....	238
	References .....	239

<b>Chapter 10</b>	<b>Forming of Ceramics: Conventional Methods</b>	<b>241</b>
10.1	Introduction	241
10.2	Dry or Semidry Pressing	241
10.2.1	Die Compaction	242
10.2.1.1	Die Filling	242
10.2.1.2	Compaction of Particles	242
10.2.1.3	Compaction of Granules	245
10.2.1.4	Ejection of Powder Compact	248
10.2.1.5	Compaction Defects	248
10.2.2	Isostatic Compaction	248
10.3	Suspension-Based Techniques	250
10.3.1	Slip Casting	251
10.3.1.1	Slip Casting Mechanics	252
10.3.1.2	Effect of Permeability of Cast	253
10.3.1.3	Effect of Mold Parameters	254
10.3.1.4	Effect of Slurry Parameters	254
10.3.1.5	Microstructural Defects in Slip-Cast Green Articles	255
10.3.2	Pressure Casting	255
10.3.3	Tape Casting	257
10.3.3.1	Slurry Preparation	258
10.3.3.2	Tape Casting Process	260
10.3.3.3	Microstructural Flaws in Tape-Cast Sheets	261
10.3.4	Centrifugal Consolidation	261
10.3.5	Dip and Spin Coating	262
10.3.6	Electrophoretic Deposition	264
10.3.6.1	Kinetics and Mechanisms of Deposition	265
10.3.6.2	Applications of Electrophoretic Deposition	266
10.3.6.3	Electrophoretic Deposition on Porous Nonconductors	267
10.3.7	Freeze Casting	268
10.3.8	Gelcasting	269
10.3.8.1	Monomers and Polymerization	270
10.3.8.2	Mold Materials	271
10.3.9	Direct Coagulation Casting	271
10.3.10	Aqueous Injection Molding	271
10.4	Plastic Forming Methods	273
10.4.1	Extrusion	273
10.4.1.1	Extrusion Mechanics	275
10.4.1.2	Extrusion Defects	276
10.4.2	Coextrusion	276
10.4.3	Injection Molding	277
10.4.3.1	Powder Characteristics	278
10.4.3.2	Binder System	278
10.4.3.3	Powder–Binder Mixture	278
10.4.3.4	Molding	279
10.5	Concluding Remarks	281
	Problems	281
	References	282

<b>Chapter 11</b>	<b>Additive Manufacturing of Ceramics.....</b>	<b>285</b>
11.1	Introduction .....	285
11.2	Powder Methods .....	286
11.2.1	Selective Laser Sintering.....	286
11.2.2	Three-Dimensional Printing .....	287
11.3	Particle-Filled Polymer Methods.....	288
11.3.1	Fused Deposition Modeling .....	288
11.3.2	Laminated Object Manufacturing.....	289
11.4	Suspension-Based Methods .....	290
11.4.1	Stereolithography .....	290
11.4.2	Inkjet Printing .....	291
11.4.3	Robocasting .....	293
11.4.4	Freeze Extrusion Fabrication .....	295
11.5	Concluding Remarks .....	296
	Problems.....	296
	References .....	297
<b>Chapter 12</b>	<b>Drying, Debinding, and Microstructural Characterization of Green Articles.....</b>	<b>299</b>
12.1	Introduction .....	299
12.2	Drying of Granular Ceramics.....	300
12.2.1	Drying of Drops of a Suspension on a Surface .....	300
12.2.2	Drying of Adherent Coatings .....	301
12.2.2.1	Measurement of Drying Stress .....	301
12.2.2.2	Cracking during Drying of Adherent Coatings .....	304
12.2.3	Drying of Three-Dimensional Solids.....	305
12.2.3.1	Stages of Drying .....	305
12.2.3.2	Moisture Distribution and Movement.....	310
12.2.3.3	Drying Stresses .....	312
12.2.3.4	Warping and Cracking.....	313
12.2.3.5	Avoidance of Warping and Cracking.....	314
12.2.4	Drying Technology.....	314
12.3	Binder Removal (Debinding) .....	315
12.3.1	Extraction of Binder by Capillary Flow.....	316
12.3.2	Solvent Extraction .....	317
12.3.3	Supercritical Fluid Extraction .....	317
12.3.4	Thermal Debinding .....	317
12.3.4.1	Binder Degradation.....	318
12.3.4.2	Stages of Thermal Debinding.....	318
12.3.4.3	Binder Redistribution.....	320
12.3.4.4	Effect of Ceramic Surface Interactions .....	321
12.3.4.5	Models for Thermal Debinding .....	323
12.3.5	Thermal Debinding Process Design .....	324
12.4	Green Microstructures and Their Characterization .....	325
12.5	Concluding Remarks .....	327
	Problems.....	327
	References .....	328

<b>Chapter 13</b>	<b>Principles of Sintering and Microstructural Development</b>	331
13.1	Introduction	331
13.1.1	Types of Sintering	331
13.1.2	Measurement of Sintering	332
13.1.3	Analysis of Sintering	334
13.2	Solid-State Sintering	334
13.2.1	Driving Force for Sintering	334
13.2.2	Effects of Surface Curvature	335
13.2.2.1	Stress on Atoms under a Curved Surface	335
13.2.2.2	Chemical Potential of Atoms under a Curved Surface	336
13.2.2.3	Vacancy Concentration under a Curved Surface	337
13.2.2.4	Vapor Pressure over a Curved Surface	338
13.2.3	Grain Boundary Effects	339
13.2.4	Mechanisms of Sintering	341
13.2.5	Stages of Sintering	342
13.2.6	Theoretical Analysis of Solid-State Sintering	344
13.2.6.1	Analytical Models	344
13.2.6.2	Herring Scaling Law	350
13.2.6.3	Numerical Simulations	350
13.2.6.4	Phenomenological Sintering Equations	350
13.3	Grain Growth	351
13.3.1	Types of Grain Growth	352
13.3.2	Importance of Controlling Grain Growth during Sintering	352
13.3.3	Normal Grain Growth	353
13.3.4	Abnormal Grain Growth	357
13.3.5	Ostwald Ripening	359
13.3.6	Control of Grain Growth	362
13.3.6.1	Effect of Dopants	362
13.3.6.2	Effect of Fine Inert Second-Phase Particles	366
13.3.7	Grain Growth in Porous Ceramics	368
13.3.8	Simultaneous Densification and Grain Growth	371
13.4	Viscous Sintering	373
13.5	Liquid-Phase Sintering	375
13.5.1	Stages of Liquid-Phase Sintering	376
13.5.2	Microstructure of Liquid-Phase Sintered Ceramics	377
13.5.3	Role of Solid-State Sintering in Liquid-Phase Sintering	377
13.5.4	Thermodynamic and Kinetic Factors	377
13.5.4.1	Wetting and Spreading of the Liquid	378
13.5.4.2	Dihedral Angle	379
13.5.4.3	Morphology of Grains and Liquid Phase	380
13.5.4.4	Effect of Solubility	380
13.5.4.5	Capillary Forces	381
13.5.4.6	Effect of Gravity	381
13.5.5	Mechanisms of Liquid-Phase Sintering	381
13.5.5.1	Stage 1: Rearrangement and Liquid Redistribution	382
13.5.5.2	Stage 2: Solution–Precipitation	382
13.5.5.3	Stage 3: Ostwald Ripening	385
13.5.6	Phase Diagrams in Liquid-Phase Sintering	385
13.6	Pressure-Assisted Sintering	386
13.6.1	Pressure-Assisted Sintering Models	386

13.6.2	Mechanisms of Pressure-Assisted Sintering .....	388
13.7	Field-Assisted Sintering Techniques .....	388
13.7.1	Spark Plasma Sintering .....	389
13.7.2	Flash Sintering .....	390
13.8	Concluding Remarks .....	391
	Problems .....	391
	References .....	394
<b>Chapter 14</b>	<b>Sintering Process Variables and Techniques.....</b>	<b>397</b>
14.1	Introduction .....	397
14.2	Sintering Furnaces and Furnace Supports .....	397
14.3	Particle Size and Packing .....	398
14.3.1	Particle Size.....	399
14.3.2	Particle Size Distribution .....	399
14.3.3	Particle Shape and Particle Structure.....	400
14.3.4	Particle Packing.....	400
14.3.5	Effect of Green Density.....	403
14.4	Anisotropic Shrinkage.....	404
14.4.1	Pore Shape Anisotropy.....	405
14.4.2	Particle Alignment .....	406
14.5	Heating Schedule.....	406
14.5.1	Design and Prediction of Heating Schedule.....	408
14.5.2	Effect of Heating Rate on Sintering .....	409
14.5.3	Special Heating Schedules .....	410
14.5.3.1	Multistage Sintering.....	410
14.5.3.2	Fast Firing.....	411
14.5.3.3	Rate-Controlled Sintering.....	412
14.6	Sintering Atmosphere .....	412
14.6.1	Gases in Pores .....	412
14.6.2	Effect on Vapor Transport.....	416
14.6.3	Volatilization and Decomposition.....	417
14.6.4	Oxidation State.....	419
14.7	Microwave Sintering.....	420
14.8	Pressure-Assisted Sintering.....	422
14.8.1	Hot Pressing .....	423
14.8.2	Hot Isostatic Pressing .....	424
14.9	Spark Plasma Sintering .....	426
14.10	Sintering of Ceramic Composites, Coatings, and Multilayers .....	427
14.10.1	Sintering of Ceramic Composites .....	427
14.10.2	Sintering of Adherent Coatings.....	429
14.10.3	Cosintering of Multilayer Ceramics.....	431
14.11	Concluding Remarks .....	433
	Problems.....	433
	References .....	434
<b>Chapter 15</b>	<b>Sol–Gel Processing.....</b>	<b>437</b>
15.1	Introduction .....	437
15.2	Sol–Gel Processing of Aqueous Silicates .....	437
15.2.1	Effect of pH.....	440

	15.2.1.1 Polymerization in the pH Range 2 to 7.....	441
	15.2.1.2 Polymerization above pH $\approx$ 7.....	441
	15.2.1.3 Polymerization below pH $\approx$ 2.....	442
15.3	Metal Alkoxides.....	442
	15.3.1 Preparation of Metal Alkoxides.....	443
	15.3.2 Basic Properties of Metal Alkoxides.....	444
	15.3.2.1 Physical Properties.....	444
	15.3.2.2 Chemical Properties.....	445
15.4	Sol–Gel Processing of Silicon Alkoxides.....	446
	15.4.1 Hydrolysis and Condensation.....	446
	15.4.1.1 Acid-Catalyzed Conditions.....	448
	15.4.1.2 Base-Catalyzed Conditions.....	448
	15.4.2 Polymer Growth.....	449
	15.4.3 Structural Evolution of Sol–Gel Silicates.....	451
	15.4.3.1 pH < $\sim$ 2.....	451
	15.4.3.2 pH > $\sim$ 7.....	451
	15.4.3.3 pH $\approx$ 2 to 7.....	451
	15.4.4 Gelation.....	452
	15.4.5 Drying of Gels.....	454
	15.4.5.1 Conventional Drying.....	455
	15.4.5.2 Supercritical Drying.....	462
	15.4.5.3 Structural Changes during Conventional Drying.....	463
	15.4.6 Gel Densification during Sintering.....	464
	15.4.6.1 Driving Forces and Mechanisms of Densification.....	464
	15.4.6.2 Kinetic and Practical Factors.....	467
15.5	Sol–Gel Preparation Techniques.....	468
	15.5.1 Preparation of Particulate Gels.....	468
	15.5.1.1 Single-Component Gels.....	468
	15.5.1.2 Multicomponent Gels.....	469
	15.5.2 Preparation of Polymeric Gels.....	470
	15.5.2.1 Partial Hydrolysis of the Slowest Reacting Alkoxide.....	471
	15.5.2.2 Slow Addition of Small Amounts of Water.....	472
	15.5.2.3 Use of a Mixture of Alkoxides and Metal Salts.....	473
	15.5.2.4 Alternative Routes.....	474
15.6	Applications of Sol–Gel Processing.....	474
	15.6.1 Thin Films and Coatings.....	474
	15.6.2 Fibers.....	476
	15.6.3 Monoliths.....	477
	15.6.4 Porous Materials.....	477
	15.6.5 Hybrid Inorganic–Organic Materials.....	478
15.7	Concluding Remarks.....	478
	Problems.....	479
	References.....	479
<b>Chapter 16</b>	<b>Ceramic Fabrication Methods for Specific Shapes and Architectures.....</b>	<b>481</b>
	16.1 Introduction.....	481
	16.2 Chemical Vapor Deposition.....	481
	16.2.1 Plasma-Assisted Chemical Vapor Deposition.....	483
	16.2.2 Chemical Vapor Infiltration.....	484
	16.3 Directed Metal Oxidation.....	484

16.4	Reaction Bonding .....	486
16.4.1	Reaction-Bonded Silicon Nitride .....	486
16.4.2	Reaction-Bonded Silicon Carbide .....	487
16.4.3	Reaction Bonding of Oxide Ceramics.....	490
16.5	Polymer Pyrolysis.....	491
16.5.1	Polymer Precursors for Silicon Carbide.....	493
16.5.2	Polymer Precursors for Silicon Nitride .....	494
16.6	Fabrication Routes for Fiber-Reinforced Ceramic Matrix Composites .....	496
16.6.1	Processing of SiC Fiber-Reinforced SiC Matrix Composites .....	496
16.6.1.1	Chemical Vapor Infiltration.....	497
16.6.1.2	Polymer Infiltration and Pyrolysis .....	499
16.6.1.3	Reactive Melt Infiltration.....	499
16.6.1.4	Powder Processing.....	499
16.6.2	Processing of Porous Oxide Fiber–Oxide Matrix Composites .....	499
16.7	Concluding Remarks .....	501
	Problems.....	501
