ADVANCES IN  
**PROTEIN CHEMISTRY AND  
STRUCTURAL BIOLOGY**

Chromatin Proteins and Transcription  
Factors as Therapeutic Targets

# CONTENTS

<i>Contributors</i>	<i>ix</i>
<i>Preface</i>	<i>xiii</i>
<b>1. Targeting Chromatin Remodeling in Inflammation and Fibrosis</b>	<b>1</b>
J. Yang, B. Tian, and A.R. Brasier	
1. Inflammation Initiation in Mucosal Surfaces	2
2. Central Role of NF $\kappa$ B in Regulating the Innate Immune Response	3
3. Mechanisms of Inducible Gene Expression	6
4. Transcriptional Elongation in Rapid Inflammatory Responses	6
5. Mechanisms Linking Chronic Inflammation to Mesenchymal Transition and Airway Fibrosis	10
6. The RelA–BRD4 Pathway Links Inflammation, Fibrosis, and Airway Remodeling	12
7. Effects of the Mesenchymal Cell-State Change on Innate Responses	15
8. Therapeutic Targets in the RelA-Triggered Innate/Fibrotic Pathway	16
9. Discussion and Outlook	25
Acknowledgments	25
References	25
<b>2. HMGB1 Protein: A Therapeutic Target Inside and Outside the Cell</b>	<b>37</b>
I. Ugrinova and E. Pasheva	
1. Introduction	38
2. HMGB1—General Overview	39
3. HMGB1 in the Nucleus—An Architectural Factor	43
4. HMGB1 Outside the Cell	52
5. HMGB1 as a Therapeutic Target	55
6. HMGB1 as a Target of miRs	61
7. Concluding Remarks	64
References	64
<b>3. Targeting IKK and NF-<math>\kappa</math>B for Therapy</b>	<b>77</b>
J.K. Durand and A.S. Baldwin	
1. IKK and NF- $\kappa$ B Signaling	77
2. NF- $\kappa$ B Target Gene Specificity	82

3. NF- $\kappa$ B in Inflammation, Survival, and Proliferation	82
4. IKK and NF- $\kappa$ B Signaling in Disease	84
5. Targeting IKK and NF- $\kappa$ B Signaling	87
6. IKK/NF- $\kappa$ B and Anticancer Drug Resistance	96
7. Clinical Trials	97
8. Concluding Remarks	97
Acknowledgments	98
References	99
<b>4. NF-<math>\kappa</math>B as a Therapeutic Target in Inflammatory-Associated Bone Diseases</b>	<b>117</b>
T.-h. Lin, J. Pajarinen, L. Lu, A. Nabeshima, L.A. Cordova, Z. Yao, and S.B. Goodman	
1. Introduction	118
2. Inflammation and Bone Disorders	119
3. Inflammation and NF- $\kappa$ B Signaling	124
4. NF- $\kappa$ B and Bone Remodeling	129
5. Pharmaceutical Approaches to Modulate NF- $\kappa$ B Activity	136
6. Drug Delivery Strategies in Bone Disorders	138
7. Conclusion	143
References	145
<b>5. The Functional Stability of FOXP3 and ROR<math>\gamma</math>t in Treg and Th17 and Their Therapeutic Applications</b>	<b>155</b>
J. Ren and B. Li	
1. Introduction	156
2. Regulation of FOXP3 Function in Tregs	158
3. Regulation of ROR $\gamma$ t Function in Th17	161
4. Plasticity of Treg and Th17 in Health and Diseases	165
5. Plasticity of Treg and Th17 Cell Lineages	167
6. Concluding Remarks	174
Acknowledgments	175
References	175
<b>6. The Complex Role of the ZNF224 Transcription Factor in Cancer</b>	<b>191</b>
E. Cesaro, G. Sodaro, G. Montano, M. Grosso, A. Lupo, and P. Costanzo	
1. Introduction	192
2. ZNF224 Interacts With Distinct Partners to Elicit Differential Regulatory Pathways	197

3. Multiple Roles of KRAB-ZFPS in Cancer	200
4. ZNF224 as a New Therapeutic Target in Cancer	212
5. Conclusions	214
References	215
<b>7. Transcription Factors in Breast Cancer—Lessons From Recent Genomic Analyses and Therapeutic Implications</b>	<b>223</b>
E. Zacksenhaus, J.C. Liu, Z. Jiang, Y. Yao, L. Xia, M. Shrestha, and Y. Ben-David	
1. Introduction	224
2. Features of Oncogenic Alterations in TFs	226
3. Altered TFs Involved in Super-Enhancers and Positive Transcriptional Elongation	239
4. Induction of TFs Through Mutations in DNA-Binding Sites and Altered Chromatin Conformation	240
5. Additional TFs Implicated in BC but Not Identified by Recent Genomic Analyses	241
6. Therapeutic Implications	243
7. Approaches to Target-Specific Genetic Alterations in TFs	244
8. Targeting Frequently Altered TFs in BC	247
9. Concluding Remarks	257
Acknowledgments	258
References	258
<b>8. Transcription Factors as a Target for Vaccination Against Ticks and Mites</b>	<b>275</b>
O.A.E. Sparagano	
1. Introduction	275
2. Targets From Mites and Ticks	276
3. Targeting Pathogens and Symbionts	279
4. Conclusions	280
Acknowledgments	280
References	280
<b>9. Elucidating the Mutational Landscape in Hepatocyte Nuclear Factor 1<math>\beta</math> (HNF1B) by Computational Approach</b>	<b>283</b>
P. Sneha and C.G.P. Doss	
1. Introduction	284
2. Materials and Methods	286

---

3. Results	289
4. Discussion	298
5. Conclusion	302
Acknowledgment	302
References	302
