Preface

xiii

1. Oxidative Stress: Love and Hate History in Central Nervous System 1

Genaro Gabriel Ortiz, Fermín P. Pacheco Moisés, Mario Mireles-Ramírez,
Luis J. Flores-Alvarado, Héctor González-Usigli, Víctor J. Sánchez-González,
Angélica L. Sánchez-López, Lorenzo Sánchez-Romero, Eduardo I. Díaz-Barba,
J. Francisco Santoscoy-Gutiérrez, and Paloma Rivero-Moragrega

1. Introduction	2
2. Oxidative Stress and Neuropathology	12
3. PD and ROS	17
4. Cerebral Ischemia and ROS	20
5. Multiple Sclerosis	24
References	28

2. Neuroinflammation in Alzheimer’s Disease: The Preventive and Therapeutic Potential of Polyphenolic Nutraceuticals 33

Yousef Sawikr, Nagendra Sastry Yarla, Ilaria Peluso,
Mohammad Amjad Kamal, Gjumrakch Aliev, and Anupam Bishayee

1. Introduction	34
2. Neuroinflammation in AD (Alzheimer’s Disease)	35
3. Astrogliosis in AD	37
4. Advanced Glycation End Products in AD	39
5. Polyphenolic Nutraceuticals Targeting Neuroinflammation for Prevention and Therapy of AD	40
6. Conclusions and Future Directions	47
References	47

3. Inflammation in Epileptic Encephalopathies 59

Oleksii Shandra, Solomon L. Moshé, and Aristeia S. Galanopoulou

1. Introduction	60
2. Inflammation and Neuroinflammation: Definitions, Targets, and Role in Epilepsy and Seizures	62
3. Does Activation of the Inflammatory Pathways in the Brain Cause Epilepsy in WS?	65

4. Does Activation of the Inflammatory Pathways in the Brain Contribute to the Associated Comorbidities and Progression?	72
5. Can Activation of Certain Inflammatory Pathways Be a Compensatory or Protective Event?	73
6. Are There Interactions Between Inflammation and the Neuroendocrine System That Contribute to the Pathogenesis of WS?	74
7. Does Activation of Brain Inflammatory Signaling Pathways Contribute to the Transition of WS to LGS?	75
8. Are There Any Lead Candidates or Unexplored Targets for Future Therapy Development for WS Targeting Inflammation?	75
9. Concluding Remarks	76
Acknowledgments	77
References	77
4. Analyzing the Effect of V66M Mutation in BDNF in Causing Mood Disorders: A Computational Approach	85
P. Sneha, D. Thirumal Kumar, Sugandhi Saini, Kreeti Kajal, R. Magesh, R. Siva, and C. George Priya Doss	
1. Introduction	86
2. Materials and Methods	88
3. Results	91
4. Discussion	98
5. Conclusion	100
Acknowledgments	100
References	101
5. A Computational Approach to Identify the Biophysical and Structural Aspects of Methylenetetrahydrofolate Reductase (MTHFR) Mutations (A222V, E429A, and R594Q) Leading to Schizophrenia	105
Himani Tanwar, P. Sneha, D. Thirumal Kumar, R. Siva, Charles Emmanuel Jebaraj Walter, and C. George Priya Doss	
1. Introduction	106
2. Materials and Methods	108
3. Results	111
4. Discussion	118
5. Conclusion	121
Acknowledgments	121
References	122

6. Stress-Induced NLRP3 Inflammasome in Human Diseases	127
Elísabet Alcocer-Gómez, Beatriz Castejón-Vega, and Mario D. Cordero	
1. Introduction	128
2. Inflammatory Diseases and Stress	130
3. The Inflammasomes	131
4. The Inflammasome in the Psychiatric Diseases	134
5. NLRP3 Inflammasome and Neuroinflammation in Neurodegenerative Diseases	139
6. Inflammasome and Cancer	144
7. NLRP3 and CVD	149
8. Future Perspectives	153
References	154
7. Stress-Adaptive Response in Ovarian Cancer Drug Resistance: Role of TRAP1 in Oxidative Metabolism-Driven Inflammation	163
Maria Rosaria Amoroso, Danilo Swann Matassa, Ilenia Agliarulo, Rosario Avolio, Francesca Maddalena, Valentina Condelli, Matteo Landriscina, and Franca Esposito	
1. Introduction	164
2. Linking OXPHOS, Inflammation, EMT, and Chemoresistance in Cancer	166
3. TRAP1 as a Novel Player in Ovarian Cancer Biology	179
4. Concluding Remarks	190
References	191
8. Molecular Targets of Ascochlorin and Its Derivatives for Cancer Therapy	199
Jason Chua Min-Wen, Benjamin Chua Yan-Jiang, Srishti Mishra, Xiaoyun Dai, Junji Magae, Ng Shyh-Chang, Alan Prem Kumar, and Gautam Sethi	
1. Introduction	201
2. Pharmacological Properties of ASC and Its Derivatives	203
3. Anticancer Effects of ASC and Its Derivatives	207
4. Conclusion	218
Acknowledgments	218
References	218
9. Cardiokines as Modulators of Stress-Induced Cardiac Disorders	227
Anna Planavila, Joaquim Fernández-Solà, and Francesc Villarroya	
1. Introduction	228

2. The Heart as a Secretory Organ	229
3. Cardiokines and Cardiac Stress	230
4. Cardiokines: Autocrine/Paracrine Signaling	231
5. Endocrine Functions of Cardiokines	241
6. Cardiokines as Biomarkers for Cardiac Disorders	244
7. Conclusions	245
Acknowledgments	246
References	247
