Contents

| | |
|---|------------|
| Preface | vii |
| 1 Amuse-Gueule: Numerical Differentiation | 1 |
| I Ill-Posed Problems | 9 |
| 2 Compact Operator Equations | 11 |
| 3 The Hausdorff–Tikhonov Lemma | 17 |
| 4 Computerized X-Ray Tomography | 23 |
| 5 The Cauchy Problem for the Laplace Equation | 31 |
| 6 The Factorization Method in EIT | 39 |
| II Tikhonov Regularization | 47 |
| 7 Tikhonov’s Method | 49 |
| 8 The Discrepancy Principle | 55 |
| 9 Smoothing Splines | 61 |
| 10 Deconvolution and Imaging | 67 |
| 11 Evaluation of Unbounded Operators | 75 |
| III Iterative Regularization | 83 |
| 12 Landweber Iteration | 85 |
| 13 The Discrepancy Principle | 91 |
| 14 Iterative Solution of the Cauchy Problem | 97 |
| 15 The Conjugate Gradient Method | 103 |
| 16 The Gerchberg–Papoulis Algorithm | 111 |
| 17 Inverse Source Problems | 119 |
| Appendices | 127 |
| A The Singular Value Decomposition | 129 |
| B Sobolev Spaces | 133 |
| C The Poisson Equation | 139 |
| D Sobolev Spaces (cont.) | 143 |
| E The Fourier Transform | 147 |
| F The Conjugate Gradient Iteration | 151 |
| Bibliography | 155 |
| Index | 161 |
