

# **BASIC PRINCIPLES OF INDUCTION LOGGING**

Electromagnetic Methods in Borehole  
Geophysics

**ALEXANDER KAUFMAN**

**GREGORY ITSKOVICH**

# CONTENTS

<i>Introduction</i>	<i>xi</i>
<i>Acknowledgments</i>	<i>xv</i>
<i>List of Symbols</i>	<i>xvii</i>
<b>1. System of Equations of the Stationary Electric and Magnetic Fields</b>	<b>1</b>
1.1 Equations of the Stationary Electric Field in a Conducting and Polarizable Medium	2
1.2 Interaction of Currents, Biot-Savart Law, and Magnetic Field	4
1.3 Vector Potential of the Magnetic Field	13
1.4 System of Equations of the Stationary Magnetic Field	18
1.5 Examples of Magnetic Field of Current-Carrying Objects	21
1.6 System of Equations for the Stationary Fields	37
References	37
Further Reading	37
<b>2. Physical Laws and Maxwell's Equations</b>	<b>39</b>
2.1 Faraday's Law	40
2.2 Principle of Charge Conservation	46
2.3 Distribution of Electric Charges	48
2.4 Displacement Currents	59
2.5 Maxwell's Equations	67
2.6 Equations for the Fields E and B	73
2.7 Electromagnetic Potentials	75
2.8 Maxwell's Equations for Sinusoidal Fields	78
2.9 Electromagnetic Energy and Poynting Vector	81
2.10 Uniqueness of the Forward Problem Solution	86
Reference	90
Further Reading	90
<b>3. Propagation of Electromagnetic Field in a Nonconducting Medium</b>	<b>91</b>
3.1 Plane Wave in a Uniform Medium	91
3.2 Quasistationary Field in a Nonconducting Medium	104
3.3 Induction Current in a Thin Conducting Ring Placed in a Time-Varying Field	111
Further Reading	131

<b>4. Propagation and Diffusion in a Conducting Uniform Medium</b>	<b>133</b>
4.1 Sinusoidal Plane Wave in a Uniform Medium	133
4.2 Field of the Magnetic Dipole in a Uniform Medium (Frequency Domain)	141
4.3 Transient Field of the Magnetic Dipole in a Uniform Medium	149
4.4 The Field in a Nonconducting Medium	153
4.5 The Transient Field in a Conducting Medium	157
Further Reading	161
<b>5. Quasistationary Field of Magnetic Dipole in a Uniform Medium</b>	<b>163</b>
5.1 Expressions for the Field	163
5.2 Low and High Frequency Asymptotic	166
5.3 Expression for Induced Currents	168
Further Reading	172
<b>6. Geometrical Factor Theory of Induction Logging</b>	<b>173</b>
6.1 Two-Coil Probe	174
6.2 The Vertical Responses of the Two-Coil Probe in the Media With the Horizontal Boundaries	182
6.3 Radial Characteristics of Two-Coil Induction Probe	195
6.4 Multicoil or "Focusing" Induction Probe	204
6.5 Corrections of the Apparent Conductivity	222
References	226
Further Reading	226
<b>7. Integral Equations and Their Approximations</b>	<b>227</b>
7.1 Physical Principles of the Hybrid Method	227
7.2 Derivation of the Equation for the Field	228
7.3 A Volume Integral Equation and Its Linear Approximation	235
7.4 A Surface Integral Equation for the Electric Field	238
References	247
Further Reading	248
<b>8. Electromagnetic Field of a Vertical Magnetic Dipole in Cylindrically Layered Formation</b>	<b>249</b>
8.1 The Boundary Value Problem for the Vector Potential	249
8.2 Expressions for the Field Components	254
8.3 The Magnetic Field in the Range of Small Induction Number	257
8.4 Far Zone of Magnetic Field on the Axis of Borehole	266

8.5 Displacement of the Probe from the Borehole Axis	284
Reference	288
Further Reading	288
<b>9. Quasistationary Field of the Vertical Magnetic Dipole in a Bed of a Finite Thickness</b>	<b>289</b>
9.1 Vertical Component of the Field of a Magnetic Dipole	289
9.2 The Field of the Vertical Magnetic Dipole in the Presence of a Thin Conducting Plane	295
9.3 The Two-Coil Induction Probe in Beds With a Finite Thickness	297
9.4 Profiling Curves for a Two-Coil Probe in a Bed of Finite Thickness	306
Reference	310
<b>10. Induction Logging Based on Transient EM Measurements</b>	<b>311</b>
10.1 Transient Field of the Magnetic Dipole in a Uniform Medium	312
10.2 Transient Field of the Magnetic Dipole in a Medium With Cylindrical Interfaces	321
10.3 Transient Field of the Vertical Magnetic Dipole in a Medium With Horizontal Boundaries	337
10.4 Transient Field in Application to Deep-Reading Measurements While Drilling	343
10.5 Inversion of Transient Data in the Task of Geo-Steering	365
References	383
Further Reading	383
<b>11. Induction Logging Using Transversal Coils</b>	<b>385</b>
11.1 Electromagnetic Field of the Magnetic Dipole in a Uniform Isotropic Medium	385
11.2 Boundary Value Problem for the Horizontal Magnetic Dipole in the Cylindrically Layered Formation	388
11.3 Magnetic Field in the Range of Small Parameter	396
11.4 Magnetic Field in the Far Zone	406
11.5 Magnetic Field in a Medium With Two Cylindrical Interfaces	417
11.6 Magnetic Field in Medium With a Thin Resistive Cylindrical Layer	421
11.7 Magnetic Field in Medium With One Horizontal Interface	426
11.8 Magnetic Field of the Horizontal Dipole in the Formation With Two Horizontal Interfaces	432
11.9 Profiling With a Two-Coil Induction Probe in a Medium With Horizontal Interfaces	441
Further Reading	445

---

<b>12. The Influence of Anisotropy on the Field</b>	<b>447</b>
12.1 Anisotropy of a Layered Medium	448
12.2 Electromagnetic Field of Magnetic Dipole in a Uniform and Anisotropic Medium	452
12.3 Magnetic Field in an Anisotropic Formation of Finite Thickness	459
Further Reading	465
<i>Appendix: Electromagnetic Response of Eccentred Magnetic Dipole in Cylindrically         Layered Media</i>	467
<i>Index</i>	493
