Contents

<i>Preface</i>	vii
1. The Standard Model	1
2. Review of Special Relativity	15
3. Quantum Mechanics and the Propagator	27
4. Scattering Processes and Feynman Diagrams	43
5. Photons and the Electromagnetic Field	57
6. Processes with Photons	69
7. Cross Section and Dimensional Analysis	77
8. More on the Dirac Equation	89
9. Other Forces: Weak Interactions	105
10. The Gauge Principle	119
11. The Gauge Principle II	133
12. Gauge Symmetry: The Matrix Generalization	145

13. Gauge Symmetry: The Matrix Generalization II	151
14. Back to Particles and the Strong Nuclear Force	167
15. More on Quantum Chromodynamics (QCD)	179
16. Mesons and Baryons	189
17. Spontaneous Symmetry Breaking	205
18. Superconductivity and Electroweak Interactions	225
19. Electroweak Interactions and the Story of Mass	237
20. CP-Violation and Matter vs Antimatter	247
21. Many Big Questions Remain	257
<i>References</i>	299
<i>Index</i>	311
