Settlements, kinship and hunting grounds in traditional Greenland

A comparative study of local experiences from Upernavik and Ammassalik

Robert Petersen
Abstract 9

Introduction to the approach 11

Chapter 1
Hunting and Settlement 17
Upernavik Municipality 17
The landscape 17
The climate and annual light 17
Plant life 18
Animal life 18
Ice conditions 21

Ammassalik Municipality 22
The landscape 22
The climate 23
Plant life 23
Animal life 23
Ice and currents 24

The material: Catch Lists 25
Debate on the catch lists 27

Chapter 2
Social formation and geographical mobility 28
Upernavik. A little about the settlement history 28
The dialect 29
The folklore 30
The seasonal migrations 31
Technical innovations and changes in hunting life 32
The non-seasonal migrations 33

Ammassalik. The East Greenland population in the past 35
The South East Greenlanders and Ammassalik 35
The settlement of the Ammassalik group 36

Chapter 3
The influence of material culture on mobility 39
Upernavik and Ammassalik districts 39
Transportable items 39
Non-transportable items 39
The dwelling 39
The winter dwelling 40

Inuit without igloos 41
The summer travelling life: the tent 42
The hunter's hut 43
Transportation 44
The kayak 44
The umiak and other boats 47
The sledge and the dogs 50
Imported tools 54
The gun 54
The sealing net 55
The saarlisaartoq/slider 56
Property ownership 57
Resources and first acquisition rights 57
Transfers of the right to decide 58
Ownership and territoriality 60

Chapter 4
Local communities as organizations 62
Upernavik 62
The nuclear family and the household 62
Other relatives 65
Kindred groups and fellow settlers 66

Ammassalik 70
The earlier marital situation 71
The Aqipi family 72
Marriage and hostility among the families 75
The time of the communal house 77
The Aqipi family's dwellings and housemates 77
The Aqipi family's housemates and fellow settlers 80
Supplementary information on kinship and residence 81
Mobility and potential communal settlement 81
Endogamy or exogamy: examples from two places 82
Settlements with a single household 83
Factors contributing to the unity of the settlement 84
Common concerns 84
General distributions of food 84
Links between the settlements 85
Links between the centre and isolated places 86
CONTENTS

Some types of links among households 87
    Wife-swapping 87
    The social role of the name 87
    Singing-evenings and song-duels 87
Similarities and differences between the two districts 89
    The gender-related division of labour 89
    Family units - household units 90
    Negative reciprocity 92
    Potential and balanced reciprocity 94
    Group norms in the light of mobility 94
    The units of the group 95
    Settlements 96
    Tentholds and summer camps 96
    Settlement groups and regional groups 97
    Special roles 97

Chapter 4
Changes in the settlement pattern 99
Upernavik. The seasonal moves 99
    Technical innovations and changes in hunting life 99
    The non-seasonal moves 100
    Settlements and population figures 101
    The degree of settlement 103
    The beginning of expansion 103
    Settlements that were abandoned 107
    Settlement formation during the expansion period 108
    Ittuersuaq and Makkorsuaq and their family 108
    Paangu and his family 110
    Abel Danielsen 111
    Daniel Johnsen 111
    Vittus Jensen and Ludvig Eliassen 111
    Who followed whom? 112
    What made people move to new places? 114
Ammassalik. The seasonal moves 115
    Technical innovations and some changes 116
    The non-seasonal moves 117
    Settlements and population figures 117
    Growth and change in the settlements 118
A summary for both districts 120

Changes due to longer-term declines in the hunting 132
Ammassalik 133
Upernavik-Ammassalik, the centrifugal forces 136
Potential population of the individual settlements 137

Chapter 7
The non-self-sufficient hunting society 139
Definition 139
Some effects of the technological changes 139
    Hunting equipment 140
    The use of bought wood 142
    Net hunting 143
    Clothing 143
    Dwellings 144
    Sailing craft 146
    The dog sledge 148
    Heating and lighting 149
    New needs for shop goods 149
    Earning potential and needs 150
    The need for plant 153
    The role of the school in the hunting districts 154
    Some forms of socialization 155
    The cooperative idea 157

Chapter 8
Hunting communities as part of Greenlandic society 159
The political and organizational framework 159
    The basic organization 159
    Some organizational forms 160
    Another kind of community activity: Voluntary organizations 161
    Some focuses in modernization 162
    The period immediately before modernization 162
    Modernization begins 163
    Some modernization programmes 164
    The health service 165
    Education and training 165
    Political structure 167
    Implemented policies and the party system 168
Economic conditions of the hunting settlements 169
    Non-hunting-related incomes in the hunting districts 169
Aspects of the economy of the settlements in the 1990s 171
    The population base 171
