

# **Micromechanical modeling of Dual Phase 600 steel laser weld under cyclic loading**

Zur Erlangung des akademischen Grades

Doktor-Ingenieur (Dr.-Ing.)

an der Fakultät Bauingenieurwesen

der Bauhaus-Universität Weimar

vorgelegt von

**Ghazal Moeini**

**Mentor:** Univ.-Prof. Dr.-Ing. habil. Carsten Könke

Tag der mündlichen Prüfung: 11. Juni 2018

# Contents

Contents .....	XI
List of Figures .....	xv
List of Tables .....	xix
Chapter 1 Introduction.....	1
Chapter 2 Literature Review.....	5
2.1 Dual phase steels .....	5
2.2 DP steel welded joints .....	8
2.2.1 Microstructural features of DP steel welded joint .....	8
2.2.2 Mechanical features of DP steel welded joint.....	10
2.3 Fatigue Failure.....	11
2.3.1 Fatigue of welded joints.....	16
2.4 Continuum mechanical modeling based on microstructure .....	19
2.4.1 Representative Volume Element.....	20
2.4.2 Mechanical properties of single phases .....	22
2.4.2.1 Monotonic tensile flow curve of single phases .....	23
2.4.2.2 Correlation among monotonic flow curve and cyclic behavior of single phases .....	23
2.4.3 Hardening model for cyclic plasticity .....	25
2.4.4 Boundary Condition.....	28
2.4.5 Homogenization.....	31
Chapter 3 Experimental procedure .....	33
3.1 Material .....	33
3.2 Laser welding .....	33
3.3 Metallography and Micro-hardness .....	34
3.4 Electron Backscatter Diffraction (EBSD) analysis .....	35
3.5 Tensile Test with digital image correlation technique .....	36
3.6 Low Cycle Fatigue Test .....	38
3.7 In-situ test with SEM.....	39
Chapter 4 Numerical model.....	41

4.1	RVE generation .....	41
4.2	Mechanical properties of single phases .....	43
4.2.1	Monotonic flow curve of single phase .....	43
4.2.2	Cyclic deformation of single phases .....	45
4.3	Kinematic hardening parameters identification .....	46
4.4	Boundary condition .....	48
4.5	Homogenization process .....	48
4.6	Macromechanical modeling .....	49
Chapter 5	Results and discussion .....	50
5.1	Experimental results .....	50
5.1.1	Microstructure evolution .....	50
5.1.2	Microhardness profile .....	53
5.1.3	Tensile properties .....	54
5.1.3.1	Tensile test of welded joint with DIC technique .....	55
5.1.3.2	In-situ tensile test of welded joint with SEM .....	57
5.1.4	Fatigue properties .....	59
5.1.4.1	Failure location and fractography .....	62
5.1.4.2	In-situ cyclic tension-compression fatigue test .....	64
5.2	Numerical results .....	67
5.2.1	Micromechanical modeling .....	67
5.2.1.1	2D RVE .....	67
5.2.1.2	Mechanical behavior of single phases .....	69
5.2.1.3	Numerical regional tensile tests .....	72
5.2.1.4	Numerical regional low cycle fatigue tests .....	76
5.2.2	Joint model .....	82
5.2.2.1	Numerical macromechanical behavior .....	83
Chapter 6	Conclusions and Future work .....	86
6.1	Conclusions .....	86
6.2	Future work .....	88
References	.....	90
