Expansive Soils

Recent advances in characterization and treatment

Editors

Amer Ali Al-Rawas
Department of Civil and Architectural Engineering, College of Engineering, Sultan Qaboos University, Sultanate of Oman

Mattheus F.A. Goosen
School of Science and Technology, University of Turabo, Puerto Rico, USA
Contents

List of contributors ix
Preface xi

PART 1
Nature, identification, and classification of expansive soils 1

1 Geology, classification, and distribution of expansive soils and rocks: a case study from the Arabian Gulf 3
AMER A. AL-RAWAS, MATTHEUS F.A. GOOSEN, AND GHAZI A. AL-RAWAS

2 Identification and classification of expansive soils 15
SU DHAKAR M. RAO

3 Prediction and classification of expansive clay soils 25
AGUS SETYO MUNTOHAR

4 Overview of mineralogy of bentonites: genesis, physicochemical properties, industrial uses, and world production 37
RICHARD PRIKRYL

5 Swelling in non-vertisolic soils: its causes and importance 55
MIGUEL ANGEL TABOADA AND RAÚL SILVIO LAVADO

PART 2
Volume change characteristics 79

6 ESEM study of structural modifications of argillite during hydration/dehydration cycles 81
JOËLLE DUPLAY, GERMAN MONTES-HERNANDEZ, AND LUIS MARTINEZ
7 Large-scale odometer for assessing swelling and consolidation behavior of Al-Qatif clay
   SHAHID AZAM

8 Water sorption and dilatation of bentonites and montmorillonite-rich clays
   RADEK HANUS, IRENA KOLARIKOVÁ, AND RICHARD PŘIKRYL

PART 3
Swelling potential measurement

9 ESEM-DIA method to estimate swelling–shrinkage of raw and cation-saturated bentonite
   GERMAN MONTES-HERNÁNDEZ

10 Effect of remolding techniques on soil swelling and shear strength properties
    MOUSA F. ATTOM, MAJED M. ABU-ZREIG, AND MOHAMMED TALEB OBADAY

11 Swelling rate of expansive clay soils
    ROSLAN HASHIM AND AGUS SETYO MUNTONAR

12 Swelling behavior of Ankara Clay: predictive techniques, damage details, and swelling maps
    ZEYNAL ABIDDIN ERGÜLER AND RESAT ULUSAY

13 Prediction of swelling characteristics with free swell index
    BHYRAVULLA R. PHANIKUMAR

PART 4
Advanced techniques for swelling potential assessment

14 Remote sensing of expansive soils: use of hyperspectral methodology for clay mapping and hazard assessment
    SABINE CHABRILLAT AND ALEXANDER F.H. GOETZ

15 Spectroscopy as a tool for studying swelling soils
    PATRICK CHEGE KARIUKI, KEITH SHEPHERD, AND FREEK VAN DER MEER

16 Finite element analysis of piers in expansive soils
    YAHIA E. A. MOHAMEDZEIN

26 Stabilization of problematic soils using cement and lime
EVANGELOS I. STAVRIDAKIS

27 Influence of sand content on strength and durability of
cement-acrylic resin treated soil
COSTAS A. ANAGNOSTOPOULOS

28 Physical and engineering properties of cement stabilized
soft soil treated with acrylic resin additive
COSTAS A. ANAGNOSTOPOULOS

PART 8
Other treatment methods

29 Pozzolanic stabilization of expansive soils
P.V. SIVAPULLAIAH

30 Swelling characteristics and improvement of expansive soil
with rice husk ash
AGUS SETYO MUNTOHAR

31 Effects of addition of fly ash on swell potential of
an expansive soil
DEVRIIM TURKER AND ERDAL COKCA

32 Dynamic characterization of chemically modified expansive soil
LAUREANO R. HOYOS, PHONLAWUT CHAINUWAT, AND ANAND J. PUPPALA

33 Assessment of seasonal effects on engineering behavior of
chemically treated sulfate-rich expansive clay
LAUREANO R. HOYOS, ARTHIT LAIKRAM, AND ANAND J. PUPPALA

PART 9
Construction techniques and remedial measures

34 Granular pile-anchors: an innovative foundation technique for
expansive soils
BHARAVAJULA R. PHANIKUMAR AND RADHEY S. SHARMA
