Admixtures - Enhancing Concrete Performance

Proceedings of the International Conference held at the University of Dundee, Scotland, UK on 6 July 2005

Edited by

Ravindra K. Dhir
Director, Concrete Technology Unit
University of Dundee

Peter C. Hewlett
Chief Executive,
British Board of Agrément

and

Moray D. Newlands
CPD/Consultancy Manager, Concrete Technology Unit
University of Dundee

ThomasTelford
CONTENTS

Preface  iii
Introduction  iv
Organising Committee  v
Scientific and Technical Committee  vi
Collaborating Institutions  vi
Sponsoring Organisations With Exhibition  vii
Exhibiting Organisations  viii
Supporting Institutions  ix

Opening Paper

New Superplasticisers for the Total Control of Performances of Fresh and Hardened Concrete
M Corradi, R Khurana, R Magarotto, Degussa Construction Chemicals Italia SpA, Italy

THEME 1 ADVANCES IN ADMIXTURE TECHNOLOGY

Keynote Paper
Towards Tailored Superplasticizers
Y F Hoist, P Bowen, F Perche, Swiss Federal Institute of Technology, Switzerland

Enhancing the Compatibility of Superplasticisers With Cements
R Magarotto, F Moratti, N Zeminian

Enhancing the Performance of Concrete Subjected to Salty Seawater
N M Naghoj, N Abdel-Rahman,

New High Performance Polycarboxilate Superplasticizers based on Derivative Copolymers of Maleinic Acid
Y R Falikman, Y V Sorokin, A Y Vainer, N F Bashlykov

Interaction Between Cement and Superplasticizer in Presence of Metakaolin
J Golaszewski, J Szwabowski, B Bisok

Correction of the Consistency of SCC by Redosing Superplastizker
P Grubl, C Lemmer, M Ruhl

Investigation of Kiln Dust BF Slag and Corrosion Inhibitors Influence in Concrete Durability
A Routoulas, G Batis, K K Sideris, P Koalouris

Corrosion Protection Investigations With the Use of N, N-Dimethyldiminoethanol Corrosion Inhibitor
G Batis, F Rakanta, K K Sideris

xi
Compatibility of a New Generation Polycarboxylate-Type Superplasticiser with Different Set Accelerators
B Felekoglu, B Baradan, H Sarikahya, L Yuceer

Influence on the Degradation Products on the Hydration Delay Induced by HEC Cellulose Esters
J Pourchez, P Grosseau, B Guilhot, R Guyonnet, B Ruot

Research of Rheological Properties of Modified Cement Mortars
R Hela, J Marsalova

Self-Compacting/Curing/Compressing Concrete
R Troli, A Borsó, S Collepardi, G Fazio, M Collepardi

THEME 2 CONCRETE PERFORMANCE

Keynote Paper
Admixtures and Sustainability
P-C Aitcin, M Page, Université de Sherbrooke, Canada

The Influence of Some Lithium Salts on the Setting and Heat Liberation Characteristics of Portland Cement Paste
S Modry

Influence of Non-Toxic Admixtures on the Kinetics of Cement Mixture Hydration
S Hoskova, P Demo, J Litos

Influence of Different Chemical Admixtures on the Rheological Properties of Mortars
A Griesser, F Jacobs, F Hunkeler

On the Slump Loss Problem of Superplasticized Concrete Mixes
R F Runova, M O Kochevyh, I I Rudenko

Rheological Study on the Effect of Temperature on Superplasticised Cement Pastes
V Fernandez-Altable, I Casanova

The Influence of Temperature on the Fluidity of Fresh Self Compacting Concrete
S Grzeszczyk, M Sudol

Influence of Air Entraining Agents on Workability of Fresh High Performance Concrete
J Golaszewski, J Szwabowski, P Soltysik

Studies on Effects of Activators on Properties and Mechanism of Hydration of Portland Cement
M Cheikh-Zouaoui, N Chikh, S Aggoun, R Duval

Service-Life Estima
V H Nguyen, T A'T

Corrosion Inhibitor
M Malehuddin

On the Long Term
R Gettu, J Rancero

Closing Paper
Admixtures Enhance
M Collepardi, ENC
