<b>Preface</b> .....	v
<b>Acknowledgements</b> .....	ix
<b>List of Contributors</b> .....	xxi
<b>1 Analysis of Rates of Geochemical Reactions</b> .....	1
Susan L. Brantley and Christine F. Conrad	
1.1 Kinetics and Thermodynamics .....	1
1.2 Rates of Reactions .....	3
1.2.1 Extent of Reaction .....	3
1.2.2 Rate of Reaction .....	4
1.3 Rate Equations .....	6
1.3.1 Rate Order and Rate Constant .....	6
1.4 Reaction Mechanisms .....	8
1.4.1 Elementary Reactions .....	8
1.4.2 Heterogeneous Reactions .....	10
1.4.3 Catalysis and Inhibition .....	10
1.5 Analysis of Kinetic Results .....	12
1.5.1 Differential Method .....	12
1.5.2 Integral Method .....	13
1.6 Half Life .....	17
1.7 Complex Reactions .....	20
1.7.1 Opposing Reactions .....	20
1.7.2 Sequential Reactions .....	22
1.7.3 Parallel Reactions .....	25
1.7.4 Chain Reactions .....	25
1.8 Temperature Dependence of Reaction Rates .....	26

1.9	Chemical Reactors	28
1.9.1	Batch Reactors	29
1.9.2	Flow-Through Reactors	30
1.10	Conclusions	34
	References	35
<b>2</b>	<b>Transition State Theory and Molecular Orbital Calculations Applied to Rates and Reaction Mechanisms in Geochemical Kinetics</b>	<b>39</b>
	James D. Kubicki	
2.1	Introduction	39
2.1.1	Why are Mechanisms Important?	39
2.1.2	Why are Reaction Mechanisms Hard to Determine?	41
2.2	Methods for Determining Mechanisms	44
2.2.1	Rate Laws	44
2.2.2	Activation Energies—Estimate of Bond-Breaking Energy in Rate-Determining Steps	45
2.2.3	Isotopic Exchange—Isotopic Tracers Can Identify Atom Types in a Reaction	45
2.2.4	Spectroscopy—Identification of Reactive Intermediates	45
2.2.5	Molecular Modeling	46
2.3	Transition State Theory	48
2.3.1	Equilibrium Assumption	48
2.3.2	Determining Reaction Pathways and Transition States	51
2.3.3	Calculating Activation Energies and Rate Constants	54
2.4	Quantum Mechanical Calculations	56
2.4.1	Choice of Basis Set	57
2.4.2	Choice of Electron Correlation	58
2.4.3	Choice of Model System	60
2.5	Examples	60
2.5.1	O-isotope Exchange in $\text{H}_4\text{SiO}_{4(\text{aq})}$	60
2.5.2	Ligand Exchange in Aqueous Solutions	62
2.5.3	Hydrolysis of Si-O-Si and Si-O-Al	63
2.6	Summary	65
	References	66
<b>3</b>	<b>The Mineral–Water Interface</b>	<b>73</b>
	A. Lüttge and R. S. Arvidson	
3.1	Introduction: Definitions and Preliminary Concepts	73
3.1.1	Mineral–Water Interfaces are Everywhere	73
3.1.2	The Mineral–Water Interface: An Integrated Approach	75
3.1.3	The Relationship of the Interface to the Bulk Solid	76
3.1.4	The Fundamental Importance of Scale	77

3.1.5	A Schematic View of the Surface Structure: The Importance of Defects and Dislocations . . . . .	80
3.1.6	Introduction to the Processes of Adsorption, Dissolution, Nucleation, and Growth . . . . .	82
3.2	Quantification: The Key to Understanding Mineral–Water Interface Processes . . . . .	83
3.2.1	The Concept and Quantification of Surface Area . . . . .	83
3.3	Analytical Methods . . . . .	88
3.3.1	Quantification of Surface Topography . . . . .	88
3.3.2	Quantification of Surface Chemistry and Structure . . . . .	92
3.3.3	Integrated Quantitative Studies . . . . .	94
3.4	Approaches to Modeling the Mineral–Water Interface . . . . .	96
3.4.1	Ab Initio and Density Functional Theory Calculations: A Prerequisite for Monte Carlo Simulations . . . . .	97
3.4.2	Monte Carlo Simulations of Surface Topography and Interface Processes . . . . .	99
3.5	Summary and Outlook . . . . .	101
	References . . . . .	102
<b>4</b>	<b>Kinetics of Sorption–Desorption . . . . .</b>	<b>109</b>

<b>5</b>	<b>Kinetics of Mineral Dissolution</b> .....	151
	Susan L. Brantley	
5.1	Introduction .....	151
5.1.1	Importance of Dissolution Reactions .....	151
5.1.2	Steady-State Dissolution .....	151
5.1.3	Stoichiometry of Dissolution .....	154
5.2	Mechanisms of Dissolution .....	156
5.2.1	Interface Versus Transport Control .....	156
5.2.2	Silicate and Oxide Dissolution Mechanisms .....	161
5.3	Rate Constants as a Function of Mineral Composition .....	175
5.3.1	Silica .....	175
5.3.2	Feldspar .....	176
5.3.3	Non-Framework Silicates .....	177
5.3.4	Carbonates .....	180
5.4	Temperature Dependence .....	183
5.4.1	Activation Energy .....	183
5.4.2	Solution Chemistry and Temperature Dependence .....	184
5.5	Chemical Affinity .....	185
5.5.1	Linear Rate Laws .....	185
5.5.2	Non-Linear Rate Laws .....	187
5.6	Conclusion .....	193
5.7	Glossary of Symbols .....	194
	References .....	196
<b>6</b>	<b>Data Fitting Techniques with Applications to Mineral Dissolution Kinetics</b> .....	211
	Joel Z. Bandstra and Susan L. Brantley	
6.1	Introduction .....	211
6.2	Rate Law Selection .....	212
6.2.1	Identifying Key Features .....	212
6.2.2	Modeling Key Features .....	216
6.3	Parameter Estimation .....	222
6.3.1	Error Minimization .....	222
6.3.2	Linear Regression .....	224
6.3.3	Non-Linear Fitting .....	226
6.3.4	Linear Fitting of Log Transformed Data versus Non-linear Fitting .....	229
6.3.5	Variance Heterogeneity .....	232
6.3.6	Multiple Independent Variables .....	234
6.3.7	Multiple Dependent Variables .....	237
6.3.8	Global Analysis .....	238
6.4	Error Analysis .....	239
6.4.1	Graphical Diagnostics .....	239
6.4.2	Quantitative Diagnostics .....	242

6.5	Uncertainty Quantification . . . . .	243
6.5.1	Composition of Errors . . . . .	245
6.5.2	Approximations from the Covariance Matrix . . . . .	246
6.5.3	Monte Carlo Methods . . . . .	247
6.5.4	Bootstrap Methods . . . . .	248
6.6	Commonly Encountered Problems . . . . .	249
6.7	Conclusions . . . . .	251
