Contents

Part I  3-D Image Display and Generation Techniques Based on I.P

1  Three-Dimensional Integral Television Using High-Resolution Video System with 2000 Scanning Lines ........................................ 3
   Fumio Okano, Jun Arai, Kohji Mitani, and Makoto Okui

2  High Depth-of-Focus Integral Imaging with Asymmetric Phase Masks ........................................ 25
   Albertina Castro, Yana Frauel, and Bahram Javidi

3  Integral Imaging Using Multiple Display Devices ........................................ 41
   Sung-Wook Min, Yunhee Kim, Byoungho Lee, and Bahram Javidi

4  3-D to 2-D Convertible Displays Using Liquid Crystal Devices ........................................ 55
   Byoungho Lee, Heejin Choi, and Seong-Woo Cho

5  Effect of Pickup Position Uncertainty in Three-Dimensional Computational Integral Imaging ........................................ 79
   Mehdi DaneshPanah, Behnoosh Taxakoli, Bahram Javidi, and Edward A. Watson

6  3-D Image Reconstruction with Elemental Images Printed on Paper ........................................ 99
   Daesuk Kim and Bahram Javidi
Part II Multiview Image Acquisition, Processing and Display

7 Viewing Zones of IP and Other Multi-view Image Methods
Jung-Young Son

8 Rich Media Services for T-DMB: 3-D Video and 3-D Data Applications
BongHo Lee, Kugjin Yun, Ryun Lee, Sukhee Cho, Namho Hur, Jinwoong Kim, Christoph Fehn, and Peter Kauf

9 Depth Map Generation for 3-D TV: Importance of Edge and Boundary Information
VaJarnes Tarn, Filippo Speranza, and Liang Zhang

10 Large Stereoscopic LED Display by Use of a Parallax Barrier
Hirotsugu Yarnamoto, Yoshio Hayasaki, and Nobuo Nishida

11 Synthesizing 3-D Images with Voxel207
Min-Chul Park, Sang Ju Park, Vladimir V. Saveljev, and Shin Hwan Kim

12 Multi-view Image Acquisition and Display
Sung Kyu Kim, Chaewook Lee, and Kyung Tae Kim

13 3-D Video Processing for 3-D TV
Kwanghoon Sohn, Hansung Kim, and Yongtae Kim

Part III 3-D Image Acquisition, Processing and Display Based on Digital Holography

14 Imaging 3-D Objects by Extending the Depth of Focus in Digital Holography
Pietro Ferraro, Simonetta Grilli, Giuseppe Coppola, and Sergio De Nicola

15 Extraction of Three-dimensional Information from Reconstructions of In-Line Digital Holograms
Conor P. McElhinney, Bryan M. Hennelly, Bahram Javidi, and Thomas J. Naughton
Contents

Part III  Processing and Display

16  Polarimetric Imaging of 3-D Object by Use of Wavefront-Splitting Phase-Shifting Digital Holography... 333
Takanori Nomura and Bahram Javidi

17  Three-dimensional Display with Data Manipulation based on Digital Holography.............................. 345
Osama Matača

Part IV  Other 3-D Image Acquisition and Display Techniques, and Human Factors

18  A 3-D Display System Using Motion Parallax............. 363
Hiroshi Ono and Sumio Yano

19  Dynamic Three-Dimensional Human Model .............. 373
Y. Iwadare

20  Electronic Holography for Real Objects Using Integral Photography...................................................... 389
Tomoyuki Mishina, Jun Arai, Makoto Okui, and Fumio Okano

21  Working Towards Developing Human Harmonic Stereoscopic Systems............................................. 417
Masaki Emoto and Hirokazu Yamanoue

22  Development of Time-Multiplexed Autostereoscopic Display Based on LCD Panel.............................. 467
Dae-Sik Kim, Sergey Shestak, Kyung-Hoon Cha, Jae-Phil Koo, and Seon-Deok Hwang

23  3-D Nano Object Recognition by Use of Phase Sensitive Scatterometry........................................... 493
Daesuk Kim, Byung Joon Baek, and Bahram Javidi

Index.................................................................................................................................................. 503
