Information Seeking in Electronic Environments

Gary Marchionini

University of Maryland

CAMBRIDGE UNIVERSITY PRESS
## Contents

List of figures and tables  
Preface  
Acknowledgments

### 1 Information and information seeking
- What is information?  
- Information seeking  
- Preview

### 2 Information seekers and electronic environments
- Personal information infrastructures  
  - Influence of electronic digital technology on personal information infrastructures  
  - People and electronic environments: Interactivity  
  - Developments in electronic environments: Systems, data structures, and algorithms

### 3 Information-seeking perspective and framework
- Information-seeking perspective  
  - Human-centered models of information seeking  
  - Studies of users of electronic retrieval systems
- Factors of information seeking  
  - Information seeker  
  - Task  
  - Search system  
  - Domain  
  - Setting  
  - Outcomes  
  - Summary of factors
- Information-seeking process  
  - Recognize and accept an information problem  
  - Define and understand the problem  
  - Choose a search system  
  - Formulate a query  
  - Execute search  
  - Examine results  
  - Extract information

Reflect/iterate/stop
Summary of subprocesses

4 Foundations for personal information infrastructures:
Information-seeking knowledge, skills, and attitudes
General cognitive facility
Domain expertise
System expertise
Information-seeking expertise
Patterns, strategies, tactics, and moves

5 Analytical search strategies
Online search strategies and tactics
Online search tactics
Searching full-text online databases
Lessons learned from professional online searching
Naive models of information seeking
Novice users of bibliographic search systems
Novice users of systems containing primary information
Lessons learned from novice users of primary search systems

6 Browsing strategies
Why browse?
Browsing strategies and tactics
Limitations of browsing
How systems support browsing
Bibliographic and online search systems
Full-text search systems
Graphics search systems
Visual queries and browsers
Information retrieval techniques and mechanisms to support browsing

7 Designing support for browsing: A research and development perspective
Representations
Mechanisms for managing representations
Probes
Zooms and pans
Filters and templates
A geometric metaphor
Browsing and human–computer interaction
Design perspective for supporting information-seeking strategies
## Contents

8 The continuing evolution of information seeking 162
   Effects of electronic environments 162
      Physical consequences of information in electronic form 163
      Intellectual consequences of information in electronic form 167
   Constraints and challenges for continued evolution 174
      Physical, economic, and technical constraints and challenges 174
      Intellectual property, authority, and copyright 175
      Social and political constraints and challenges 178
      Subject access and information problems 179
      Human nature 181
   Evolution and mutation 183

9 Future directions and conclusion 185
   Amplification and augmentation 185
   Communities of perspective and interdisciplinarity 187
   What kinds of information environments do we want? 189
      Scenario one: Multimedia knowledge bases 191
      Scenario two: Intelligent agents 192
      Scenario three: Implants, ubiquitous computing, and human–
machine symbiosis 193
   Conclusion 195
