Contents

Preface	ix
Section 1 A framework for success	1
1 How the book is organized, and why	3
1.1 Getting started with writing for international publication	3
1.2 Publishing in the international literature	4
1.3 Aims of this book	6
1.4 How the book is structured	7
2 Research article structures	9
2.1 Conventional article structure: AIMRaD (Abstract, Introduction, Materials and methods, Results, and Discussion) and its variations	9
3 Referees' criteria for evaluating manuscripts	15
3.1 Titles as content sign posts	16
Section 2 When and how to write each article section	19
4 Results as a "story": the key driver of an article	21
5 Results: turning data into knowledge	23
5.1 Figure, table, or text?	24
5.2 Designing figures	24
5.3 Designing tables	27
5.4 Figure legends and table titles	29
6 Writing about results	31
6.1 Functions of results sentences	31
6.2 Verb tense in Results sections	32
7 The Methods section	35
7.1 Purpose of the Methods section	35

7.2	Organizing Methods sections	35
7.3	Use of passive and active verbs	36
8	The Introduction	41
8.1	Five stages to a compelling Introduction	41
8.2	Stage 1: Locating your project within an existing field of scientific research	43
8.3	Using references in Stages 2 and 3	44
8.4	Avoiding plagiarism when using others' work	48
8.5	Indicating the gap or research niche	49
8.6	Stage 4: The statement of purpose or main activity	49
8.7	Suggested process for drafting an Introduction	50
8.8	Editing for logical flow	51
9	The Discussion section	55
9.1	Important structural issues	55
9.2	Information elements to highlight the key messages	56
9.3	Negotiating the strength of claims	57
10	The title	61
10.1	Strategy 1: Provide as much relevant information as possible, but be concise	61
10.2	Strategy 2: Use keywords prominently	61
10.3	Strategy 3: Choose strategically: noun phrase, statement, or question?	62
10.4	Strategy 4: Avoid ambiguity in noun phrases	63
11	The Abstract	65
11.1	Why Abstracts are so important	65
11.2	Selecting additional keywords	65
11.3	Abstracts: typical information elements	65
Section 3 Getting your manuscript published		67
12	Considerations when selecting a target journal	69
12.1	The scope and aims of the journal	69
12.2	The audience for the journal	69
12.3	Journal impact	70
12.4	Using indices of journal quality	70
12.5	Time to publication	71
12.6	Page charges or Open Access costs	71
13	Submitting a manuscript	73
13.1	Five practices of successful authors	73
13.2	Understanding the peer-review process	73
13.3	Understanding the editor's role	74
13.4	The contributor's covering letter	75
13.5	Understanding the reviewer's role	76
13.6	Understanding the editor's role (continued)	78
14	How to respond to editors and referees	79
14.1	Rules of thumb	79

14.2 How to deal with manuscript rejection	79
14.3 How to deal with “conditional acceptance” or “revise and resubmit”	81
15 A process for preparing a manuscript	89
15.1 Initial preparation steps	89
15.2 Editing procedures	90
15.3 A pre-review checklist	92
Section 4 Developing your publication skills further	95
16 Skill-development strategies for groups and individuals	97
16.1 Journal clubs	97
16.2 Writing groups	98
16.3 Selecting feedback strategies for different purposes	98
16.4 Training for responding to reviewers	100
17 Developing discipline-specific English skills	103
17.1 Introduction	103
17.2 What kinds of English errors matter most?	103
17.3 Strategic (and acceptable!) language re-use: sentence templates	105
17.4 More about noun phrases	108
17.5 Concordancing: a tool for developing your discipline-specific English	109
17.6 Using the English articles (a/an, the) appropriately in science writing	112
17.7 Using which and that	116
Section 5 Provided example articles	119
18 Provided example article 1: Kaiser et al. (2003)	121
19 Provided example article 2: Britton-Simmons and Abbott (2008)	133
Answer pages	145
References	167
Index	169
