Contents

8 PREFACE
Achim Menges and Sean Ahlquist

10 INTRODUCTION
Computational Design Thinking
Sean Ahlquist and Achim Menges

30 Formation and Transformation
Johann Wolfgang von Goethe

32 On the Theory of Transformations, or the Comparison of Related Forms
D'Arcy Wentworth Thompson

42 Variational Evolution
Ernst Mayr

50 The Meaning of General System Theory
Ludwig von Bertalanffy

58 Systems Generating Systems
Christopher Alexander

68 The Architectural Relevance of Cybernetics
Gordon Pask

78 Towards a Humanism Through Machines
Nicholas Negroponte

86 A New Agenda for Computer-Aided Design
William J Mitchell

94 Algorithmic Form
Kostas Terzidis

102 Architecture and Practical Design Computation
Mark Burry
An Introduction to Creative Evolutionary Systems
Peter J Bentley and David W Corne

Constrained Generating Procedures
John H Holland

Real Virtuality
Manuel DeLanda

A Natural Model for Architecture
John Frazer

Morphogenesis and the Mathematics of Emergence
Michael Weinstock

Philosophy of Mathematics for Computational Design:
Spatial Intuition Versus Logic
Jane Burry

Associative Design: From Type to Population
Peter Trummer

Integral Formation and Materialisation:
Computational Form and Material Gestalt
Achim Menges

The Computational Fallacy
Sanford Kwinter
