Part I FREQUENTLY ASKED QUESTIONS 1

1 What is business process management? 3

2 How can we demystify business process management? 10
  Brief history of business process management 10
  The next big thing (or how mystification begins) 12
  BPM hype cycle 13
  What is mystifying about BPM? 13
  The iceberg syndrome 15
  Exploring “reality” 16
  Change management and performance management 17
  Conclusion 21
3 Who should be involved in BPM, and the critical success factors 23
   Management of business processes 25
   Use of external BPM experts 28
   Critical success factors 29
   A metaphor for BPM involvement 33

4 When should you do BPM—what are the main drivers and triggers? 37

5 How should you start BPM—bottom-up or top-down? 44
   Bottom-up approach 45
   Top-down approach 47

6 Why is it important to improve business processes before automating them? 51
   What are the problems with automating first? 52
   Why is this not working? 52
   Why is this so? 53
   The need to improve processes first 54
   Key considerations 55
   Conclusion 56

7 What are the technology components of BPM? 58
   Modeling and design 60
   Execution and tracking 62
   Performance management 67
   Technology standards 69

8 Should you be customer-centric? 73

9 Why is determining BPM foundations a critical first step? 81
   BPM Foundations 84
   BPM Enablement 84
   BPM Foundations and enablement benefits 85

10 Why do you need a structured approach to implementing BPM? 88
   Typical common pitfalls 93
