Computers and the Future of Skill Demand

By
Stuart W. Elliott
# Table of contents

**Executive summary** ................................................................. 13

**Chapter 1. The challenge computers pose to work and education** ........ 17
  - Past employment trends in skill demand .................................... 19
  - Projected future trends in skill demand .................................... 21
  - Plan for the study and report ................................................ 23
  - Notes ....................................................................................... 24
  - References ................................................................................ 24

**Chapter 2. Changes in skills and skill use in the OECD Survey of Adult Skills (PIAAC)** ................................................................. 27
  - Overview of the Survey of Adult Skills (PIAAC) .......................... 28
  - Using PIAAC to measure changes in skill demand .................... 29
  - Results for literacy proficiency in PIAAC and the International Adult Literacy Survey (IALS) ......................................................... 31
  - Basic results on skill use for PIAAC and IALS ............................ 33
  - Utilised literacy proficiency - combining results on literacy proficiency and use ................................................................. 35
  - Understanding the different approaches to measuring skill use .... 39
  - Notes ....................................................................................... 40
  - References ................................................................................ 40

**Chapter 3. Methodology for assessing computer capabilities using the Survey of Adult Skills (PIAAC)** .................................................. 43
  - Objective for the exploratory assessment of computer capabilities .. 44
  - Identifying a group of computer scientists ................................... 46
  - Structure of the assessment of computer capabilities .................. 47
  - Suggestions for improving the approach to assessing computer capabilities ................................................................. 52
  - Notes ....................................................................................... 56
  - References ................................................................................ 57
# TABLE OF CONTENTS

**Chapter 4. Assessment of computer capabilities to answer questions in the Survey of Adult Skills (PIAAC)** .................................................. 59
- Ratings of computer capabilities to answer the literacy questions. ... 60
- Ratings of computer capabilities to answer the numeracy questions ... 72
- Ratings of computer capabilities to answer the problem solving questions .................................................. 81
- Notes. ............................................................................. 85
- References ...................................................................... 86

**Chapter 5. Implications of computer capabilities for policy and research** .................................................. 87
- Linking current computer capabilities to workforce skill trends ...... 88
- Implications of computer capabilities for employment, based upon this study .................................................. 95
- Realistic aspirations for general cognitive skill development in the general population .................................................. 96
- Going beyond the existing understanding of adult and computer skills .................................................. 99
- Notes. ............................................................................. 100
- References ...................................................................... 101

**Annex A2. PIAAC and IALS comparisons for literacy proficiency and use by country** .................................................. 102

**Annex A4.1. Expert ratings of computer capabilities to answer PIAAC literacy questions** .................................................. 103

**Annex A4.2. Expert ratings of computer capabilities to answer PIAAC numeracy questions** .................................................. 104

**Annex A4.3. Expert ratings of computer capabilities to answer PIAAC problem solving questions** .................................................. 105

**Annex A5. Comparisons of worker proficiency in general cognitive skills with computer capabilities** .................................................. 106

**Annex B4. Descriptions of PIAAC proficiency levels and individual expert ratings of computer capabilities for answering PIAAC questions** .................................................. 107

**Tables**

- 3.1. Computer scientists providing assessments of computer capabilities .................................................. 47
- 5.1. Approximate proficiency level of computer capabilities in the Survey of Adult Skills (PIAAC) .................................................. 89
