Creating and Capturing Value through Crowdsourcing

Edited by
CHRISTOPHER L. TUCCI, ALLAN AFUAH, AND GIANLUIGI VISCUSI

OXFORD UNIVERSITY PRESS
## Contents

List of Figures and Tables .......................... xv
List of Contributors ................................ xvii

1. Introduction to Creating and Capturing Value Through Crowdsourcing
   Christopher L. Tucci, Allan Afuah, and Gianluigi Viscusi
   Introduction ........................................ 1
   Conclusions and Future Research Directions ....... 6

PART I. CROWDSOURCING: FUNDAMENTALS AND THE ROLE OF CROWDS AND COMMUNITIES

2. Crowdsourcing: A Primer and Research Framework
   Allan Afuah
   Introduction ........................................ 11
   Types of Crowdsourcing ............................... 13
   The Crowdsourcing Process ........................... 14
   Theoretical Rationale Behind Crowdsourcing ...... 14
   Internal Versus External Crowdsourcing .......... 15
   The Relationship Between Open Innovation and Crowdsourcing ................................. 16
   Advantages of Crowdsourcing ........................ 17
   Disadvantages of Crowdsourcing ..................... 19
   Why the Interest in Crowdsourcing? .................. 20
   A Conceptual Framework for Identifying and Exploring Theoretically Interesting Crowdsourcing Questions ................................. 21
   Value Created and/or Captured during Crowdsourcing ........................................ 21
   Seeker Organization’s Attributes ..................... 22
   Crowd Attributes ...................................... 24
   Problem Attributes ................................... 26
   Moderating Effect of Crowdsourcing Strategy .......... 27
   Moderating Effect of Meso Environment ............ 28
   Moderating Effect of Macro-Environmental Factors ................................. 29
   Conclusions and Future Research ..................... 31

3. Three’s a Crowd?
   Gianluigi Viscusi and Christopher L. Tucci
   Introduction ........................................ 39
   Online Distributed Innovation: A Crowd is not a Group ........................................ 41
   Crowd as a Solution to Distant Search: When is the Right Time? ................................. 45
   Ideas Come Next: The Rise of Crowd-Driven Entrepreneurship ................................. 46
Key Questions for the Crowd-Oriented Organization 48
Conclusions and Future Research 51

4. How Firms Leverage Crowds and Communities for Open Innovation
Joel West and Jonathan Sims 58

Introduction 58
Communities, Crowds, and Collaboration 61
Communities 61
Crowds 65
Hybrid Crowds: When Crowds are Like Communities 70
Motivating Network Collaborators 73
Structural Forms of Participation Architecture 73
How Firms Tap into Motivation 74
Intrinsic Motivations Driving Participation in Communities and Crowds 76
Extrinsic Motivations Driving Participation in Communities and Crowds 77
Degrees of Collaborative Innovativeness 78
Direct Contributions to Open Innovation 78
Indirect Contributions to Open Innovation 80
Contributions Beyond Innovations 81
Discussion, Conclusions, and Future Research 82
Conclusion 87

5. The Road to Crowdfunding Success: A Review of the Extant Literature
Vincenzo Butticè, Chiara Franzoni, Cristina Rossi-Lamastra, and Paola Rovelli 97

Introduction 97
Crowdfunding: Its Features and Definitions 99
Achieving Crowdfunding Success 103
The Main Features of a Crowdfunding Campaign 105
Fundraiser Motivations and Characteristics 108
The Role of Crowdfunders 111
Fundraiser–Crowdfunder Interactions 113
Conclusions and Future Research 115

PART III. COLLABORATION-BASED CROWDSOURCING

8. Renegotiating Public Value with Co-Production
   Antonio Cordella, Andrea Paletti, and Maha Shaikh
   Introduction ................................................................. 181
   Value Creation in the Public Sector .................................. 183
   Bureaucracy and Value Creation ...................................... 183
   Bureaucracy and Public Value ......................................... 185
   Public Value: Beyond Bureaucracy ................................... 187
   Co-Production: New Modes of Value ................................. 189
   Co-Production and in the Public Sector: A New Value Generating Proposition .................................. 193
   How Can Public Administration Benefit from Co-Production and Crowdsourcing to Better Produce Public Value? ................................................................. 196
   Conclusions and Future Research .................................... 197

   Natalia Levina and Anne-Laure Fayard
   Introduction ..................................................................... 204
   Background Literature .................................................... 207
   Boundary Spanning in Organizations ................................. 208
   Management Consultants as Knowledge Brokers .................... 211
   Collaborative Production in Online Communities .................... 212
   Crowdsourcing for Innovation ......................................... 213
   Methods and Research Settings ....................................... 214
   Research Sites .................................................................. 214
   Findings ......................................................................... 217
   Case: DC.com .................................................................. 217
   Case: Gamma .................................................................... 222
   Discussion ....................................................................... 226
   Boundary Spanning with Clients ....................................... 227
   Online Collaboration Practices for External Consumption ....... 228
   Conclusions and Future Research .................................... 230

10. Co-Creation from a Telecommunication Provider’s Perspective: A Comparative Study on Innovation with Customers and Employees
    Milica Šundić and Karl-Heinz Leitner
    Introduction ..................................................................... 236
    Towards Open Innovation ............................................... 238
    The Rise of Openness and Co-Creation ............................... 238
    Open Innovation in Firms ............................................... 239
    Business Model Innovation ............................................. 241
    Innovation with Crowds .................................................. 241
    Innovation Communities ................................................ 241
    Super Users ..................................................................... 243
Contents

Intra-Corporate Crowdsourcing 244
Risks of Openness and Crowd Involvement 245
Case Study 248
Research Framework and Questions 248
Three Co-Creation Approaches from an Austrian Telecommunication Provider 249
Results 255
Commercial Feasibility of Ideas 255
User Participation and Behavior 256
Social Media Tools for Communities 259
Discussion 260
Open Co-Creation with Customers 260
Semi-Open Co-Creation with Employees 261
Closed Offline Co-Creation 262
Conclusions and Future Research 262

PART IV. HYBRIDS: TOURNAMENT-BASED AND COLLABORATION-BASED CROWDSOURCING

Allan Afuah
Introduction 271
Background Literature: Co-opetition and Why Crowdsourcing 273
Traditional Co-opetition 274
Crowdsourcing Co-opetition 275
Why Crowdsource a Problem? 276
Framework for Exploring the Impact of Co-opetition on Crowdsourcing Performance 276
Problem Decomposability 278
Competition by Solvers: Tournament-Based Crowdsourcing 278
Moderating Role of Cooperation to Reduce Frictions 279
Cooperation by Solvers: Collaboration-Based Crowdsourcing 284
Moderating Role of Competition to Reduce Problem Module Solution Inefficiency 285
Conclusions and Future Research 286

12. Prediction Markets For Crowdsourcing 292
Christian Horn, Marcel Bogers, and Alexander Brem
Introduction 292
Crowdsourcing for Knowledge in Innovation Management 294
Prediction Markets and Crowdsourcing 295
Empirical Analysis: Case and Methodology 298
Empirical Studies 298
Conclusions and Future Research 303
13. Ethics in Crowdsourcing: Revisiting and Revising the Role of Stakeholder Theory  
Daniel Curto-Millet and Arsalan Nisar

Introduction 310
   What is Crowdsourcing? 311
   Locus of Control 313

Core Concepts of Stakeholder Theory 314
   A De-Centralized View of the Firm 314
   Holistic Analysis and Guidance 316
   In Pursuit of Identity 316

The Applicability of Stakeholder Theory for Crowdsourcing 317
   Challenging Traditional Notions of the Firm 318
   Complex Ownership Rules 319
   Evolving Stakeholder Identities 321

Challenges: Stakeholder Theory and Crowdsourcing 322
   Uncertainty of Roles 323
   Novel Notions of Rights Ownership 324

Conclusions and Future Research 326
