A Structuralist Theory of Economics

Adolfo García de la Sienra
## Contents

Preface x
Acknowledgments xi

1 Introduction 1
   1.1 A new view of scientific theories 3
   1.2 The S-view in action: an example 7
   1.3 Problems of the S-view 9

2 Models and structures 13
   2.1 The rise of the concept of structure 13
   2.2 Models for first-order logic 14
   2.3 Elementary classes in economics 19
   2.4 Theory of classes 25
   2.5 The general concept of structure 30

3 The structuralist view of theories 35
   3.1 Origins 35
   3.2 The concept and relevance of a metatheory 35
   3.3 The ways of theoretical practice 38
   3.4 A dialogue between the L-view and the S-view 38
   3.5 The structuralist view of theories 48

4 Idealization and concretization 55
   4.1 Motivation 55
   4.2 Empirical structures 57
   4.3 Construction of idealized models 59
   4.4 Concretization 65

5 Measurement 69
   5.1 The nature of measurement 69
   5.2 Representational measurement 72
Contents

5.3 Measurement by means of theory  74
5.4 Measurement without theory  78

6 A general concept of an economy  82

6.1 Fixing the reference of economic theories  82
6.2 A general concept of an economic system  82

7 Preference and utility  90

7.1 Introduction  90
7.2 The conditions of Debreu and Mas-Colell  92
7.3 Motivation  93
7.4 The algebraic theory of difference  94
7.5 The geometric theory of difference  97
7.6 The theory of preference  106
7.7 The empirical meaning of differentiability  107
7.8 New foundations of preference theory  111

8 The logical structure of game theory  114

8.1 Introduction  114
8.2 Finding the (lost) beings, stories and narratives  115
8.3 Conceptual prolegomena  116
8.4 Concepts of strategy  117
8.5 Probability spaces induced by behavioral strategies  119
8.6 The equilibrium concept  123
8.7 The game concept  125
8.8 Empirical applicability of GT  129

9 Abstract labor and labor-value  132

9.1 Introduction  132
9.2 Abstract labor  134
9.3 Market-determination of abstract labor  140
9.4 Labor-value  145
9.5 The meaning and relevance of abstract labor  153

10 Classical economics  155

10.1 Introduction  155
10.2 The fundamental Marxian theorem  156
10.3 General equilibrium  160
10.4 Equilibrium  163
10.5 The empirical claim  172
11 The logical structure of Sraffian economic theory 174

11.1 Introduction 174
11.2 The conceptual framework 174
11.3 The basic theory-element 177
11.4 The standard commodity 179
11.5 The empirical claim 180
11.6 What can/ought be done? 181

12 The logical structure of econometrics 182

12.1 Motivation 182
12.2 Real concrete DGPS 183
12.3 Random experiments 184
12.4 Probability spaces 185
12.5 Random variables 189
12.6 Conditional probability as fundamental 191
12.7 From conditional to absolute probability 194
12.8 Statistical inference 195
12.9 The logical structure of econometrics 196
