Routledge Handbook of Sustainable and Resilient Infrastructure

Edited by Paolo Gardoni
Contents

List of figures xiii
List of tables xxvii
List of contributors xxxii

PART I
Introduction 1

1 Toward sustainable and resilient physical systems: Current state and future directions 3
Paolo Gardoni

PART II
Situating and motivating sustainability and resilience 13

2 Aligning community resilience and sustainability 15
Therese P. McAllister and Steven Moddemeyer

3 On sustainability and resilience of engineered systems 28
Michael Havbro Faber

4 Resilience and sustainability goals for communities and quantification metrics 50
Jessica Boakye, Colleen Murphy and Paolo Gardoni

5 Structural engineering dilemmas, resilient EPCOT, and other perspectives on the road to engineering resilience 70
Michel Bruneau and Andrei M. Reinhorn

6 Performance-based engineering to achieve community resilience 94
Bruce R. Ellingwood, Naiyu Wang, James Robert Harris, and Therese P. McAllister
## PART III
### Resilience of different systems

<table>
<thead>
<tr>
<th>Chapter</th>
<th>Title</th>
<th>Authors</th>
</tr>
</thead>
<tbody>
<tr>
<td>7</td>
<td>Tornado damage modeling: Single buildings, communities, and regions</td>
<td>John W. van de Lindt, Hassan Masoomi, Navid Attary, and Christine D. Standohar-Alfano</td>
</tr>
<tr>
<td>8</td>
<td>Realizing hurricane resilient communities through distributed computing</td>
<td>Ahmed U. Abdelhady, Seymour M.J. Spence, and Jason McCormick</td>
</tr>
<tr>
<td>9</td>
<td>Resilience assessment of community building portfolios</td>
<td>Peihui Lin and Naiyu Wang</td>
</tr>
<tr>
<td>10</td>
<td>A way forward to resilient infrastructures against earthquake–tsunami multi–hazard</td>
<td>Raffaele De Risi, Ario Muhammad, and Katsuichiro Goda</td>
</tr>
<tr>
<td>11</td>
<td>Resilience assessment of transportation networks</td>
<td>Maria Nogal and Alan O’Connor</td>
</tr>
<tr>
<td>12</td>
<td>A framework for resilience assessment of highway transportation networks</td>
<td>Navya Vishnu, Sabarethinam Kameshwar, and Jamie E. Padgett</td>
</tr>
<tr>
<td>13</td>
<td>Physics-based fragility functions: Their mathematical formulation and use in the reliability and resilience analysis of transportation infrastructure</td>
<td>Fabrizio Nocera, Armin Tabandeh, Roberto Guidotti, Jessica Boakye, and Paolo Gardoni</td>
</tr>
<tr>
<td>14</td>
<td>Modeling the time–varying performance of electrical infrastructure during post disaster recovery using tensors</td>
<td>Neetesh Sharma and Paolo Gardoni</td>
</tr>
<tr>
<td>15</td>
<td>A holistic framework to evaluate water availability for post-earthquake firefighting</td>
<td>Negar Elhami Khorasani, Maxwell Coar, Amir Sarreshtehdari, and Maria Garlock</td>
</tr>
<tr>
<td>16</td>
<td>Risk and life cycle cost based asset management framework for aging water supply system</td>
<td>Solomon Tesfamariam, Golam Kabir, and Rehan Sadiq</td>
</tr>
</tbody>
</table>
17 Resilience of potable water and wastewater networks  
*Max Didier, Simona Esposito, and Božidar Stojadinović*

18 Population dynamics and the resiliency of water and wastewater infrastructure  
*Kasey M. Faust and Jessica A. Kaminsky*

**Cyber infrastructure**  
357

19 Cyber threat on critical infrastructure: A growing concern for decision makers  
*Omar Kammouh and Gian Paolo Cimellaro*

**PART IV**  
**Sustainable materials, design, and construction**  
375

20 Low CO₂ cement for sustainable concrete  
*Maria C.G. Juenger*

21 The need for standardized testing for service life prediction of reinforced concrete: Ensuring sustainable systems  
*David Trejo*

22 The long-term ageing trends of asphalt binders in highway pavements  
*Yuhong Wang, Kecheng Zhao and Fangjin Li*

**PART V**  
**Merging sustainability and resilience**  
417

23 Bridging the gap between sustainability and resilience of civil infrastructure using lifetime resilience  
*David Y. Yang and Dan M. Frangopol*

24 Tradeoffs between sustainable and resilient buildings  
*Abbie B. Liel and Sarah J. Welsh-Huggins*

**PART VI**  
**The role of dependencies/interdependencies**  
465

25 The role of interdependencies in infrastructure modeling and community resilience  
*Dorothy A. Reed and Shuoqi Wang*
Contents

26 Probabilistic modeling of interdependencies for resilient infrastructure systems 495
   Iris Tien

27 Modeling of interdependent critical infrastructure for regional risk and resilience analysis 507
   Roberto Guidotti and Paolo Gardoni

28 Regional resilience analysis: A multi-scale approach to model the recovery of interdependent infrastructure 529
   Neetesh Sharma, Armin Tabandeh, and Paolo Gardoni

Part VII
The role and impact of aging and deterioration, and life-cycle analysis 553

29 Deterioration models for engineered systems 555
   Javier Riascos-Ochoa and Mauricio Sánchez-Silva

30 Stochastic life-cycle analysis and performance optimization of deteriorating engineering systems using state-dependent deterioration stochastic models 580
   Gaofeng Jia and Paolo Gardoni

PART VIII
The role and impact of climate change 603

31 Infrastructure and climate change 605
   Mikhail Chester, Samuel Markolf, Andrew Fraser, Daniel Burillo, Emily Bondank, Yeowon Kim, and Christopher Hoehne

32 Climate change impact on R.C structures subjected to chloride ingress and carbonation-induced corrosion 626
   Emilio Bastidas-Arteaga and Mark G. Stewart

33 Hazard-based hurricane loss estimation including climate change impacts: Sea surface temperature change 646
   David V. Rosowsky

34 A physics-based transportable probabilistic model for climate change dependent storm surge 662
   Alessandro Contento, Hao Xu, and Paolo Gardoni
PART IX
Smart cities and the role of information and communication technology in achieving sustainability and resilience  

35 Exploiting smart technologies to build smart resilient cities  
Emanuele Bellini and Paolo Nesi  

36 Framework for improved indoor thermal comfort through personalized HVAC control  
Da Li, Carol C. Menassa, and Vineet R. Kamat  

37 Reinforcement learning for intelligent environments: A tutorial  
Zoltan Nagy, June Young Park, and Jose Ramón Vázquez-Canteli  

PART X
Multi-objective optimization  

38 Resilience-based restoration optimization, resource location, and importance measures  
Kash Barker and Yasser Almogathawi  

39 Lifecycle multi criteria decision analysis of buildings using generalized expected utility  
Umberto Alibrandi and Khalid M. Mosalam  

PART XI
The role of urban planning and public policies  

40 Addressing the infrastructure decay rate in US cities: The case for a paradigm shift in information and communication  
Mark Reiner and Jennifer E. Cross  

41 Balanced urban design process to create resilient and sustainable urban environments  
Nuwan Dias, Dilanthi Amaratunga, Kaushal Keraminyage, and Richard Haigh  

PART XII
Economic considerations and the role of insurance and re-insurance  

42 Defining economic recovery: An application of the synthetic control method  
Ryan Levitt and Sammy Zahran
Contents

43 Modeling business interruption as a function of the reliability and resilience of physical infrastructure and social systems 841
   Fabrizio Nocera and Paolo Gardoni

44 CAT bond pricing and coverage design against natural perils 866
   Lorenzo Hofer, Paolo Gardoni, and Mariano Angelo Zanini

Index 889
