Innovative Approaches in Agent-Based Modelling and Business Intelligence
Contents

1 Gallery for Evolutionary Computation and Artificial Intelligence Researches: Where Do We Come from and Where Shall We Go ................................................................. 1
   Takao Terano

2 Mathematical Technologies and Artificial Intelligence Toward Human-Centric Innovation .............................................................. 9
   Kotaro Ohori and Hirokazu Anai

3 Study on the Social Perspectives of Traffic Congestion in Sri Lanka Through Agent-Based Modeling and Simulation: Lessons Learned and Future Prospects ................................................... 23
   Chathura Rajapakse, Lakshika Amarasinghe, and Kushan Ratnayake

4 Information Technology and Finance .................................................. 43
   Hiroshi Takahashi

5 Two Phase Transitions in the Adaptive Voter Model Based on the Homophily Principle ................................................................. 53
   Takashi Ishikawa

6 Sensitivity Analysis in a Bayesian Network for Modeling an Agent ................................................................. 65
   Yoko Ishino

7 Analyzing the Influence of Headline News on Credit Markets in Japan ................................................................................. 77
   Hiroaki Jotaki, Yasuo Yamashita, Satoru Takahashi, and Hiroshi Takahashi

8 Consideration on an Integrated Approach to Solving Industrial Issues Through Surveys, Statistics, and Simulations ......................... 95
   Yasuo Kadono

9 U-Mart: 20-Year Experience of an Artificial Market Study .................. 111
   Hajime Kita
10 What Do Agents Recognize? From Social Dynamics to Educational Experiments ........................................... 123
Masaaki Kunigami

11 Model Prediction and Inverse Simulation ......................................................... 139
Setsuya Kurahashi

12 Identification of High-Frequency Herding Behavior in the Chinese Stock Market: An Agent-Based Approach .................. 157
Zhenxi Chen and Thomas Lux

13 A Data Analysis Study on Factors of the Pedestrian Flows in Two Different Underground Malls Using Space Syntax Measures: Case Comparisons in Nagoya, Japan ....................... 173
Akira Ota, Gadea Uriel, Hiroshi Takahashi, and Toshiyuki Kaneda

14 A Study on Agent Modeling of Tourist Evacuation Behaviors in an Earthquake: A Case Study of an Evacuation Simulation of Himeji Castle .......................................................... 189
Makoto Sonohara, Kohei Sakai, Masakazu Takahshi, and Toshiyuki Kaneda

15 Virtual Grounding for Agent-Based Modeling in Incomplete Data Situation .............................................. 205
Shingo Takahashi

16 Analysis of Problem-Solving Processes ............................................................ 221
Toru B. Takahashi

17 The Energy Transition Game: Experiences and Ways Forward ................. 237
Wander Jager, Geeske Scholz, René Mellema, and Setsuya Kurahashi

18 A Coevolutionary Opinion Model Based on Bounded Confidence, Reference Range, and Interactive Influence in Social Network .......................................................... 253
Chao Yang

19 Prof. Dr. Takao Terano as a Brilliant Educator .............................................. 269
Takashi Yamada
