China’s 40 Years of Economic Reform and Development
How the Miracle Was Created
Contents

Part I Reform and Opening Up

1 The Mixed-Ownership Joint Stock System Is a Major Way to Realize Public Ownership

1.1 The Proposal that Mixed Ownership Is the Most Vital Form of Public Ownership Continues and Further Develops the Related Theories of the Communist Party

1.2 Taking a Mixed Ownership Model as the Primary Means for Realizing Public Ownership Represents a Scientific Summary of Our Experience in Reform

1.3 Taking Mixed Ownership as the Primary Means for Realizing Public Ownership Is an Important Outcome of Explorations on Combining Public Ownership with the Market Economy

1.4 Studying and Implementing the Decision’s Conclusions on How to Realize Public Ownership Can Have a Significant and Far-Reaching Impact on SOE’s Reform and Development

2 The Mainstay that Successfully DEALT with the International Financial Crisis

2.1 The Root Cause Was that the United States Used State Credit to Create Financial Bubble

2.2 The Chinese Economy Has Become the Stabilizer and Engine Driving the World Economy

2.3 Taking Multiple Effective Measures to Fend off International Financial Risks

2.4 Upholding China’s Legitimate Rights and Interests in the Reform of the International Financial System
3 Adhering to the Strong Engine of the Expedited Innovation Reforms ...................................................... 19

4 Balancing the Government-Market Relationship Is Instrumental for Economic Structural Reform ............................................... 27
  4.1 Streamlining Administration and Delegating Powers to Boost the Vitality of Enterprises: The Key to Success in China’s Reform ........................................... 27
  4.2 Expanding the Fundamental Role of the Market in Allocating Resources ............................................. 29
  4.3 Deepening the Reform of the Administrative System and Building a Service-Oriented Government with Carefully Defined Functions ............................................. 32
  4.4 Principles for Balancing the Government-Market Relationship ...................................................... 34

5 Building Consensus on Reform by Changing the Growth Model ................................................................. 37
  5.1 Promote Income Distribution Reform that Centers on Changing the Driver of Economic Growth from Investments and Exports to Consumption ........................................... 40
  5.2 Promoting Reform of the Tax System to Replace Business Taxes with VAT While Accelerating the Development of the Tertiary Industry ...................................................... 43
  5.3 Reform the Technology and Education System While Centering on Industrial Upgrades ............................................. 46
  5.4 Accelerate the System for Rural-Urban Integration While Narrowing the Rural-Urban Gap ............................................. 48
  5.5 Further Reform the Financial System While Leveraging the Basic Role of the Market in Allocating Resources ............................................. 51
  5.6 Reform the Land Management System While Unleashing the Potential of Land ............................................. 52

6 Suggestions on Building an Asian Infrastructure Investment and Financing Institution Led by China ................................................. 53
  6.1 Establishing a Chinese-Led Asian Infrastructure Investment and Financing Institution Serves China’s Strategic Interests ...................................................... 54
  6.2 It Is Possible and Feasible to Build a Chinese-Led Asian Infrastructure Investment and Financing Institution ............................................. 56
  6.3 Considerations for the Establishment of a Chinese-Led Asian Infrastructure Investment and Financing Institution ............................................. 58
  6.4 Suggestions for Establishing a Chinese-Led Asian Infrastructure Investment and Financing Institution ............................................. 59
7 The Roadmap for the Reform of the Financial System .......................... 61
  7.1 Make Expanding Access to Finance the Priority of Financial System Reform .................................................. 62
  7.2 Establish Local Financial Regulators to Improve Accountability of Local Governments .................. 63
  7.3 Establish Deposit Insurance and Loan Guarantee Systems and Resolve Risk Through Market Mechanisms ................ 64
  7.4 Promoting Interest Rate Liberalization Is the Centerpiece of Deepening Reforms in the Financial System .......... 65
  7.5 Develop a Multi-tiered Capital Market System ................. 66
  7.6 Push for Progress in Renminbi Internationalization in an Orderly Manner ............................. 68

8 Keeping Reform Oriented Toward a Socialist Market Economy ................................................................. 71
  8.1 Leveraging the Decisive Role of the Market in Allocating Resources Represents a New Leap in the Party’s Understanding of the Laws of the Market Economy ......... 71
  8.2 Deepening Reform to Promote Public Ownership and More Efficiently Integrate It with the Market Economy .... 74
  8.3 Distribution System Reforms Will Allow for a Stronger Incentive Mechanism for Promoting Economic Development ................................................................. 76
  8.4 Improving the Macro Regulatory System Is Intrinsically Important for Harnessing the Strengths of the Socialist Market Economy .............................................. 77

9 Establishing an International Reserve Currency System with Checks and Balances ........................................... 79
  9.1 Replacing the Single Reserve Currency with Multiple Reserve Currencies Is a Historical Inevitability ............. 79
  9.2 Establishing an International Reserve Currency System with Checks and Balances Could Help Solve the Triffin Dilemma ................................................................. 81
  9.3 China’s Financial System Reform Will Set the Stage for the Renminbi to Become an International Reserve Currency ................................................................. 83
  9.4 The Position, Role, and Strategic Choice of the Euro in Maintaining the Stability of the International Monetary System ................................................................. 85

10 Giving Play to New Development Engines Through Reform and New Breakthroughs .................................. 87
  10.1 Reform the Household Registration System and Unleash the Potential of Urbanization ......................... 88
Contents

10.2 Reform the Rural Land System and Unleash the Potential of Agricultural Modernization ........................................... 89
10.3 Implement Reform of the Financial System and Unleash the Potential of Capital .......................................................... 91
10.4 Reform Investment and Financing Mechanisms and Unleash the Potential of Private Investment ............................... 92

11 Getting Rid of Misconceptions on the Deepening of SOE Reform

11.1 Rectifying False Perceptions of SOE Reform .................................................. 95
11.2 Highlighting the Importance and Urgency of Deepening SOE Reform ................................................................. 98
11.3 Resolve to Innovate, Target Policies and Finish the New Round of the SOE Reform .................................................. 100

12 Exploring Building of New-Type Think Tanks with Chinese Characteristics .......................................................... 103

12.1 The Significance of the Decision Made at the 18th Central Committee’s Third Plenary Session to Build New Types of Think Tanks with Chinese Characteristics ........................................... 104
12.2 Building New Types of Think Tanks with Chinese Characteristics Requires the Experiences of Developed Countries ................................................................. 105
12.3 Main Problems in the Development of Chinese Think Tanks ................................................................. 108
12.4 Building New Types of Think Tanks with Chinese Characteristics Must Include a Firm Grasp of the Right Direction .................................................. 110

13 Enhancing the Systematicness, Integrality, and Cooperativity of Reforms .......................................................... 113

13.1 One General Objective for These Six Major Reforms .................................................. 113
13.2 Six Major Reforms as One Enormous and Structured Social Project .................................................. 115
13.3 Challenges Facing the Six Major Reforms .................................................. 117
13.4 Six Major Reforms to Tap Huge Development Potential .................................................. 119

Part II The Development Pattern

14 Transforming the Development Pattern Is the Fundamental Approach for Dealing with the Crisis .......................................................... 123

14.1 Adjust the Demand Structure by Enhancing the Role of Consumption in Boosting Economic Growth .................................................. 124
14.2 Adjust the Industrial Structure by Developing the Tertiary Industry .................................................. 125

</table>
23.2 Expanding Domestic Demand and Cultivating New Growth Areas Is the Key to Maintaining Rapid Economic Growth ... 197
23.3 Achieve Rapid Economic Growth Based on Structural Optimization and the Transformation of the Growth Model ... 200
23.4 Improve Investment and Financing Mechanisms and Direct Personal Savings Deposits to Investment Priorities .... 202

24 Macroeconomic Management Reform in China ................. 205
24.1 The Basic Direction of the Macroeconomic Management System Reform ............................................. 205
24.2 The Planning System Reform ........................................... 222
24.3 Reform of the Fiscal and Tax Systems ................................. 229
24.4 The Reform of the Financial System ................................. 235

25 Expanding Domestic Demand: A Vital Strategic Guideline .......... 245
25.1 Expanding Domestic Demand Plays a Critical Role in Maintaining a Rapid Economic Growth ........ 245
25.2 Expanding Domestic Demand as the Basis Standpoint for China’s Economic Development ............. 247
25.3 Priorities and Major Tasks for Expanding Domestic Demand in 1999 .............................................. 248

26 Translating Inflation Pressure into Impetus for Industrial Upgrading .......................................................... 253
26.1 An Analysis of Current Inflation Pressure ......................... 253
26.2 Directing Surplus Funds Toward Structural Adjustment and Industrial Upgrading ......................... 255

27 Improving Coordination of Economic Growth, Structural Adjustment and Commodity Prices ................. 259
27.1 Achieving Steady and Robust Economic Development While Keeping Commodity Prices Stable and Making Structural Adjustments ........................................ 259
27.2 Channeling Investment in Accordance with the Requirements for Accelerating the Transformation of the Economic Development Pattern ........................................ 262
27.3 Start by Increasing the Supply of Products in Short Supply to Relieve Inflationary Pressure ......................... 265

28 Properly Handling Dialectical Relationships in Economic Work ................................................................. 267
28.1 Gain a Strong Understanding of the Dialectical Relationship Between Supply and Demand ......................... 267
28.2 Gain a Strong Understanding of the Dialectical Relationship Between Short-Term and Long-Term Economic Development ............................................. 269
28.3 Gain a Strong Understanding of the Dialectical Relationship Between Urban and Rural Development ........................................ 270
28.4 Gain a Strong Understanding of the Dialectical Relationship Between the Real Economy and the Virtual Economy ............. 272
28.5 Gain a Strong Understanding of the Dialectical Relationship Between the Government and the Market .......................... 273

Part IV Balanced Urban-Rural Development

29 Facilitating Coordinated Agricultural Modernization, Industrialization and Urbanization ..................................................... 279
29.1 Agricultural Modernization Is Clearly Lagging Behind Industrialization and Urbanization ............................................. 279
29.2 Seizing Rare Historic Opportunities to Modernize Agricultural ......................................................................................... 282
29.3 Cultivating New Agricultural Investment and Operation Entities ...................................................................................... 283
29.4 Summarizing and Promoting Successful Experiences of Various Localities in Agricultural Modernization ..................... 283

30 Sticking to New Urbanization with Chinese Characteristics .... 285
30.1 Urbanization Will Be the Most Fundamental Driver of China’s Economic Development Over the Next Two Decades .......... 285
30.2 Three City Clusters as the Engines Driving Economic Growth ......................................................................................... 287
30.3 Sub-regional City Clusters with Provincial Capitals as Centers ......................................................................................... 288
30.4 Urbanization at Local Level with Counties at the Center .......... 290
30.5 Major Reasons Behind the Rapid Development of City Clusters ..................................................................................... 291
30.6 Rural Land Reform Is the Key to Unleashing the Potential of Urbanization ................................................................. 292

31 Exploring Methods for Realizing Public Rural Land Ownership ......................................................................................... 295
31.1 Allow Mortgages, Guarantees and Circulation of Contracted Land Management Rights for Farmers .......................... 295
31.2 Facilitate Mortgages, Guarantees and Transfers of Rural Housing Properties in a Steady and Prudent Manner ............... 297
31.3 Rural Collectively-Owned Construction Land Should Be Subject to the Same Rights and Prices as State-Owned Land ........ 299

32 Focusing on Rural Reform, Breaking Demand Bottlenecks ...... 301
32.1 Inadequate Demand Is the Major Problem Currently Affecting the Economy ............................................................. 301
32.2 Releasing Rural Demand Potential Is the Key to Resolving Inadequate Demand ........................................ 302
32.3 Encouraging Rural Migrant Workers to Buy Houses in Cities After They Are Paid to Give up Their Homesteads .......... 304
32.4 Correcting Misunderstandings .................................. 305

33 Accelerating Urban-Rural Integration to Build a Moderately Prosperous Society in All Respects .......................... 307
33.1 Ensuring Equal Fundamental Rights for Urban and Rural Residents Is the Precondition for Urban-Rural Integration .... 308
33.2 Ensuring Equal Access to Public Services for Both Urban and Rural Areas Is a Key Step Toward the Intended Urban-Rural Integration ........................................... 309
33.3 Income Balance Between Urban and Rural Residents Is the Fundamental Objective of Urban-Rural Integration ........ 310
33.4 Reasonable Allocation of Urban and Rural Factors Is the Inevitable Requirement of Urban-Rural Integration ........... 311
33.5 Three Approaches to Accelerate Reform and Development of Urban-Rural Integration ............................ 312

34 Drawing upon the Experience and Lessons of the Netherlands and Japan to Accelerate Agricultural Modernization ........ 315
34.1 The Dutch Agriculture for Instance Focuses on Large-Scale Production Incorporating Various Social Sectors with Cooperatives as Major Players, While the Japanese Agriculture Prioritizes Small Production, with Farming Households as the Major Players ........................................... 316
34.2 Back to the Netherlands, That's Why the Country's Agricultural Industry Is Considered Highly Lucrative Whereas that of Japan Can Barely Survive Minus Government Subsidies ................................................. 317
34.3 While the Netherlands Demands High Quality from Its Agricultural Workforce, Japan's Agriculture Has Been Reduced to an Aging Industry ........................................ 317
34.4 While the Netherlands Is Devoted to Developing High Value-Added Exports, Japan Is Trying Its Utmost to Protect Its Farm Produce Market .............................................. 318

35 Urban-Rural Integration Is the Greatest New Driver for Growth ................................................................. 321
35.1 Economic Restructuring Is the Driver of New Development ...... 321
35.2 How Urban-Rural Integration Can Gain Momentum ........... 322
35.3 Focusing on Reforms for Urban-Rural Integration Is the Only Way by Which to Release a Great New Momentum .................................................. 324
35.4 Correcting Misunderstandings to Accelerate Urban-Rural Integration .................................................. 327

36 Regarding Attractive Towns as the Breakthrough for Urban-Rural Integration .................................................. 329

Part V Innovation

37 Innovation: The Key to Transforming the Growth Pattern ............. 335
37.1 Innovation Is the Key to Transforming the Economic Growth Pattern .................................................. 335
37.2 Preparations for Realizing Innovation Are Done .................................................. 336
37.3 Build an Innovation System Featuring Collaboration Between Academia and Industry .................................................. 338
37.4 Set the Stage for Innovation .................................................. 339

38 Multiple Approaches to Greater Innovation Capacity .................... 343

39 Huawei: The Secret to Its Success .................................................. 349
39.1 Market Orientation .................................................. 349
39.2 High Input .................................................. 350
39.3 Incentive Mechanisms .................................................. 351
39.4 Joint Struggle .................................................. 352
39.5 Global Resources .................................................. 352

40 Innovation Is Central to Realizing Industrial Upgrading .............. 355
40.1 The Urgency of Highlighting Innovation in the Post-crisis Era .................................................. 355
40.2 Innovation: A Core Strategy of Development for Enterprises .................................................. 357
40.3 Improving the Establishment of Innovation Policies and the Social Environment .................................................. 359
40.4 Give Full Play to S&T Resources in the International Market to Enhance Innovation Capacity .................................................. 360

41 Why Shenzhen’s Patent Application Leads the World .................... 363

42 Expediting Setting Up an Economic System and Development Pattern Centered on Innovation ................. 367
42.1 China Has Entered a New Phase of Innovation-Driven Sustainable Growth .................................................. 367
42.2 How to Build an Economic System Led and Supported by Innovation .................................................. 369
42.3 How to Build an Innovation-Driven Development Model 371

Part VI Industrial Revitalization

43 The Cultivation and Development of Pillar Industries in the 1990s 377
   43.1 The New Stage and Major Tasks of Economic Growth 377
   43.2 The New Economic Growth Areas in the 1990s 378
   43.3 The Development of Pillar Industries Requires Powerful Industry Organizational Policies 381
   43.4 Establishing Effective and Flexible Investment and Financing Mechanisms 383

44 On the Strategy of Big Enterprises and Groups of China 385
   44.1 Assurance that the Large Enterprise Group Strategy Is Principal in China’s Economic Development and Institutional Transformation in the Near Future 385
   44.2 Fully Understanding the Economies of Scale of Enterprise Groups and Its Role in Stabilizing and Coordinating the Economy 387
   44.3 Lessons China Can Learn from the Western Market Economy in Promoting Economic Collectivization and Large Enterprise Policies 389
   44.4 The Implementation of China’s Large Group Strategy Must Be Promoted with a Coordination of Structural Adjustments in Existing State-Owned Assets and the Revitalization of Pillar Industries 391
   44.5 The Key to Implementing a Large Enterprise Group Strategy Is to Establish a Policy Guarantee System 394

45 Mobilizing Various Sectors to Develop the Tertiary Industry 397

46 Adjusting the Investment Structure for New Industrialization 401
   46.1 The Departure of the Investment Structure from the Development Strategy Is a Pressing Issue 401
   46.2 The Main Reasons for the Resurgence of the Extensive Growth Model 403
   46.3 The Directions and Tasks for Adjustment of the Investment Structure 406
   46.4 Carrying Out Economic Approaches in a Coordinated Manner to Direct the Allocation of Resources 409

47 Solving Major Problems to Advance Supply-Side Structural Reform 413
   47.1 Focus on Rural Reforms and Boost the Development of Urban-Rural Integration 413
47.2 Focus on the Reform of the Investment System
and Increase the Supply of Public Goods 416

47.3 Focus on Technology and Education Reform, and Increase
the Supply of Technology and Talent 417

Part VII Conclusion

48 Exploring Methods of Reform Practically Suited to China’s National Conditions 423

48.1 Using Economic Development as the Standard for Testing Reforms 423

48.2 Always Keeping Reforms Market-Oriented 424

48.3 Adhering to Gradual Reforms 425

48.4 Adhering to the System of Testing and then Expanding Reforms 426

48.5 Adhering to Openness to Promote Reform and Development 427

48.6 Coordinating and Promoting Reforms 428

Appendix 429
