| Instructions To The Reader                        | xvii |

### PART I GETTING STARTED

1. Introduction                                      | 3   |
2. The Systems Approach and Other Good Advice        | 11  |
3. Implementation                                    | 23  |
4. Research Strategies                                | 45  |

### PART II FORECASTING METHODS

5. Classifying the Forecasting Methods                | 65  |
6. Judgmental Methods: The Crystal Ball               | 73  |
7. Extrapolation Methods                              | 137 |
8. Econometric Methods                                | 171 |
9. Segmentation Methods                               | 225 |
10. Bootstrapping and Other Combined Methods          | 247 |

### PART III EVALUATING MODELS

11. A Framework for Evaluation                        | 273 |
12. Testing Inputs                                   | 295 |
13. Testing Outputs                                  | 307 |
