PREFACE TO THE 1993 EDITION XI
PREFACE XV
Introduction 3

Part I
The Players and the Stage

1. Men and Women of the Corporation: The Population 15
   The numbers of men and women in the administration of corpo-
   rate bureaucracies; the growth of a "masculine" ethic in manage-
   ment and the "feminization" of clerical work.

2. Industrial Supply Corporation: The Setting 29
   "Indsco": its offices; its culture; its people; and its elaborate sys-
   tem of ranks and grades.

Part II
Roles and Images

3. Managers 47
   The forces which lead the men who manage to reproduce them-
   selves in kind; and the reasons for conformity pressures on man-
   agers.

4. Secretaries 69
   The non-bureaucratic aspects of secretarial work as an organiza-
   tional anomaly; how secretaries are rewarded for behaviors that
   keep their mobility low. Sources of resistance to change in the job
   become clear.

5. Wives 104
   The peculiar position of the wives of management men; the
dilemmas confronting corporate wives as their career sequences
unfold in parallel to their husbands'; some critical policy ques-
tions about organizations and families.
Part III
Structures and Processes

6. Opportunity
Success as vertical mobility in the large corporation, in the absence of alternatives; how opportunity to get ahead defines the ways people involve themselves in work; the seductiveness of opportunity in contrast with the characteristic responses of those who find themselves stuck; how relative opportunity creates self-fulfilling prophecies and also accounts for what might otherwise seem to be "sex differences" in work behavior.

7. Power
The meanings of power and its importance for leadership in large organizations; how power accumulates through activities and alliances; the sources of bureaucratic powerlessness and the responses it engenders, trapping the powerless in downward spirals of ineffectiveness. The problems of women and leadership in organizations reveal themselves as matters of power, not sex.

8. Numbers: Minorities and Majorities
Relative numbers of socially different people—being among the many or among the few—are seen to have a powerful impact on individuals' fates; "tokens" (the numerically rare) and how they manage their special situations; certain popular findings about "women's behavior" in the professions or management dissolve into more universal human response to the dilemmas of token status.

Part IV
Understanding the Action

9. Contributions to Theory: Structural Determinants of Behavior in Organizations
Opportunity, power, and numbers as the elements of an integrated structural theory; how the model enlarges social, psychological, and critical perspectives; why "individual" models fail to answer the "woman question" and underline the need for a structural approach.

10. Contributions to Practice: Organizational Change, Affirmative Action, and the Quality of Work Life
Practical policies and programs to enhance opportunity, empower more people, and balance numbers; a cautionary note about bar-
riers to change and limits to change in large organization; but the need to go ahead with reforms despite limitations.

_Afterword to the 1993 Edition_

The View from the 1990s: How the Global Economy Is Reshaping Corporate Power and Careers

Who gets ahead? Structural sources of success revisited; opening boundaries: from corporatism to entrepreneurialism; the uncertainty of opportunity; the new demographics of power; dilemmas of diversity: microdynamics of the workplace; public rules and private lives: work-family issues; human resource policy for the twenty-first century: toward employability security.

_Appendices_

APPENDIX I: Field Study Methodology and Sources of Data

APPENDIX II: Some Observations of Women's Leadership in Organizations
