1 **Introduction**  
*Why measure efficiency in the health sector?*  
*Outline of the book*  

2 **Health and efficiency concepts**  
*Introduction*  
*The economic theory of production*  
*Production and efficiency in the single-output model*  
*Production and efficiency in the multi-output model*  
*The production of health and health care*  
*Health outcomes and health-care outputs*  
*Efficiency, health and health care*  

3 **Efficiency measurement techniques**  
*Introduction*  
*Efficiency measurement and Farrell*  
*Ordinary least squares (OLS) regression*  
*Data envelopment analysis*  
*Stochastic frontier analysis*  
*Comparing frontier techniques*  

4 **Measuring efficiency in health services**  
*Introduction*  
*Feedback to individual units*
Contents

Feedback of results 65
Software review 70
Summary and conclusions 75
Appendix 76

5 Application of efficiency measurement in health services 82

Introduction 82
Background 83
Applications 83
Summary and conclusions 101
Appendix 103

6 Advanced applications and recent developments 118

Introduction 118
Comparison of the different methods of analysis and their policy implications 119
Economies of scale and scope 125
Weight restriction in DEA 128
The efficient production of health 130
Analysis of different health-care measures 133
Summary 133

7 Future directions 135

Notes 139
Bibliography 140
