PhD Thesis

ENVIRONMENTAL PRACTICES AND GREENING STRATEGIES IN SMALL MANUFACTURING ENTERPRISES IN SOUTH AFRICA - A CRITICAL REALIST APPROACH

Søren Jeppesen

Department of Intercultural Communication and Management
Copenhagen Business School
Denmark
Table of Contents

ACKNOWLEDGEMENTS .................................................................................................................. II
LIST OF TABLES AND FIGURES ......................................................................................... IX
ABBREVIATIONS .................................................................................................................. X

PART I - THE SCIENTIFIC FRAMEWORK .................................................................................... 1

CHAPTER 1. GREENING OF SMES - A NEW PERSPECTIVE? .................................................. 2
  1.1. Motivation ......................................................................................................................... 2
  1.2. Research focus and aim ..................................................................................................... 4
  1.3. Research questions and purpose ....................................................................................... 6
  1.4. Methodology. Research strategy, research designs and data collection methods ......... 7
      1.4.1. Research strategy ....................................................................................................... 7
      1.4.2. Research design ......................................................................................................... 9
      1.4.3. Data collection methods and the research process ..................................................... 10
  1.5. Theory and analytical framework .................................................................................... 11
  1.6. Epistemological considerations and delimitations .......................................................... 12
  1.7. Style & structure .............................................................................................................. 13

CHAPTER 2. ENVIRONMENTAL MANAGEMENT IN INDUSTRY AND THE GREENING
      OF SME LITERATURE ........................................................................................................... 15
  2.1. Environmental Management in Industry (EMI) and Greening of SMEs: An introduction
      of the international literature ............................................................................................. 16
      2.1.1. Paradigm shift theories ............................................................................................. 17
      2.1.2. Win-win theories ...................................................................................................... 18
      2.1.3. Stakeholder management theories ............................................................................ 24
      2.1.4. Toolbox approaches ............................................................................................... 26
      2.1.5. Greening of business functional theories ................................................................. 27
      2.1.6. Investigations of greening issues in the Third World ............................................... 28
  2.2. The Greening of SME literature and its relevance to the thesis ..................................... 32
      2.2.1. A characteristic of the EMI literature ....................................................................... 32
      2.2.2. A characteristic of the greening of SMEs literature ............................................... 34
      2.2.3. Towards a new perspective and an alternative approach to investigating the greening
            of SMEs ......................................................................................................................... 37

CHAPTER 3. A CRITICAL REALIST APPROACH TO GREENING OF SMES ......................... 41
  3.1. The Critical Realist Perspective ....................................................................................... 41
      3.1.1. Critical Realism and the essential elements ............................................................... 42
      3.1.2. Explanation in the CRP ............................................................................................ 46
      3.1.3. The CRP and its main schools .................................................................................. 48
  3.2. CRP within social sciences .............................................................................................. 50
  3.3. A Critical Realist Approach to studies in social science ................................................ 52
      3.3.1. Types of research in a CRA. Research strategy ....................................................... 53
      3.3.2. Research design in a CRA ....................................................................................... 56
  3.4. A CRA for studying environmental practices and greening strategies in SMEs .......... 59

CHAPTER 4. A THEORETICAL-ANALYTICAL FRAMEWORK FOR INVESTIGATING
      DRIVING FORCES OF GREENING IN SMES ..................................................................... 63
  4.1. Neo-classical theory of the firm and Industrial economics ............................................ 64
      4.1.1. Theories of the firm in neo-classical economics ....................................................... 64
      4.1.2. Dynamic Industrial Economics perspectives on the firm ....................................... 65
7.3.1. The changing South African context and linkages between industry, environment and the potential driving forces of greening

7.3.2. Contributions from the explorative and extensive investigations to the intensive analysis of the driving forces of greening at the level of the firm

PART III – THE DRIVING FORCES AND GREENING STRATEGIES

CHAPTER 8. THE INTENSIVE DESIGN AND FIRM STUDIES

8.1. The theoretical-analytical framework and its main features revisited

8.2. My intensive research design

8.2.1. The ontological and epistemological foundation of the analysis

8.2.2. Selection of firm studies

8.2.3. Methods for data collection, selection of respondents and situations for observation

8.2.4. The data collection process

8.3. The analysis of the empirical observations

8.4. Introduction to the firm studies

8.4.1. The firms and their environmental practices

8.4.2. History, business strategy, markets and customers of the firms

8.4.3. The industry and external relations

8.4.4. Discussion of findings in relation to the context analysis

8.4.5. The further analysis

CHAPTER 9. MOBILISATION OF RESOURCES AND CAPABILITIES FOR ENVIRONMENTAL PRACTICES IN SMALL FIRMS IN SOUTH AFRICA

9.1. The resources of the small firms

9.1.1. The resources of Electroplating

9.1.2. The resources of Liners Exclusive

9.1.3. The resources of the Press Shop

9.2. The mobilisation of resources and capabilities for environmental practices in the firms studied

9.2.1. The mobilisation of resources and capabilities for environmental practices in Electroplating

9.2.2. The mobilisation of resources and capabilities for environmental practices in Liners Exclusive

9.2.3. The mobilisation of resources and capabilities for environmental practices in the Press Shop

9.2.4. Summary

9.3. The mobilisation of resources and capabilities for environmental practices among small firms in South Africa

9.3.1. Business strategy and development of the firms

9.3.2. The importance of the environment and the benefits of going green

9.3.3. The importance of resources and capabilities – or the lack of them?

CHAPTER 10. THE DRIVING FORCES OF GREENING IN SMALL FIRMS IN SOUTH AFRICA

10.1. The driving forces of greening in Electroplating

10.1.1. A responsible environmental approach

10.1.2. The emphasis on resource (economic) efficiency

10.1.3. Relations with the main supplier

10.1.4. Relations with the regulatory authorities
10.1.5. The market situation (relations to clients and the niche for quality products) 207

10.2. Driving forces of greening in Liners Exclusive 208
10.2.1. The emphasis on resource (economic) efficiency 208
10.2.2. The emphasis on training and skills development 209
10.2.3. Relations between the management and the employees 210
10.2.4. Relations to customers and the network of the firm 212

10.3. Driving forces of greening in the Press Shop 213
10.3.1. Relations to the clients and market pressures 213
10.3.2. The emphasis on resource efficiency 214
10.3.3. The emphasis on training 215
10.3.4. The environmental awareness of the owners 216
10.3.5. Relations to the regulatory authorities 216

10.4. Driving forces of greening in small firms in South Africa 217

10.5. The greening strategies of small firms 224
10.5.1. The greening strategy of Electroplating 224
10.5.2. The greening strategy of Liners Exclusive 229
10.5.3. The greening strategy of the Press Shop 231
10.5.4. Discussion of the greening strategies 234

CHAPTER 11. THE FUTURE GREENING OF SMALL FIRMS IN SOUTH AFRICA 239
11.1. Small firms and the importance of driving forces, resources and capabilities 240
11.2. The market and relations to clients and suppliers 247
11.3. The importance of regulation and the South African government 250
11.4. The role of other institutions, communities and NGOs 253
11.5. The future greening of SMEs in South Africa 254

PART IV – THE CONTRIBUTIONS AND CONCLUSIONS 256

CHAPTER 12: GREENING IN SMALL FIRMS REVISITED – A NEW PERSPECTIVE 257
12.1. The contributions of a CRA at the social theory level 258
12.1.1. The recognition of partiality 259
12.1.2. The contributions from the RBP 261
12.1.3. Contributions deriving from the theoretical-analytical framework 263
12.1.4. Choice of methods for data collection 266
12.2. Contributions of the CRA at the social ontology level 267
12.3. Further development of the CRA 270
12.3.1. Refinements of a CRA 270
12.3.2. Development of the CRP 273
12.4. Towards a new perspective on the greening of SMEs 273
12.4.1. The foundation of a new perspective on the greening of SMEs 274
12.4.2. The issue of size – is SME a relevant category of analysis? 275

CHAPTER 13. CONCLUSION 278
13.1. The answers to the research questions 278
13.2. Summary of results and accomplishments 279
13.2.1. Providing a scientific framework for opening the black box of the firm 280
13.2.2. Contributions to Sayer's Critical Realist Approach and to Critical Realism 281
13.2.3. Contributions from the empirical work 282
13.2.4. Overall contribution 283
13.3. Methodological and theoretical reflections 283
13.4. Implications for future research 284
