Market Access Options in the WTO Doha Round
Impacts on the Swiss Meat Market

by

# Table of Contents

## Chapter One: Introduction

1.1 Motivation  
1.2 Objectives of study  
1.3 Background  
  1.3.1 Collapse of the 2003 WTO Ministerial Conference: Time for reflection  
  1.3.2 Multipolar structure of trade conflicts  
  1.3.3 Regional versus multilateral trade agreements  
  1.3.4 Lack of transparency and trust  
1.4 Organization of study  

## Chapter Two: The Swiss Tariff Pattern in Agricultural and Food Products  

2.1 The specific tariff system  
2.2 Tariff peaks  
2.3 Binding overhang  
2.4 The threshold price system  
2.5 Tariff escalation and deescalation  
2.6 Preferential market access  

## Chapter Three: Formulae for Tariff Reduction and Liberalizing Tariff Rate Quotas  

3.1 Tariff rate quotas (TRQs)  
  3.1.1 Tariff rate quotas under perfect competition  
  3.1.2 Tariff rate quotas under imperfect competition  
3.2 Special Agricultural Safeguard (SSG)  
3.3 Formulae for tariff reduction  
  3.3.1 Uruguay formula  
  3.3.2 Swiss formula  
  3.3.3 Harbinson formula  
  3.3.4 Derbez text and the blended formula  
3.4 Flexible Swiss formula  
  3.4.1 Properties and prerequisites of the flexible Swiss formula
3.4.2 Framework for WTO market access modalities with a flexible Swiss formula 63
3.4.3 Liberalizing tariff rate quotas 64
3.5 Final remarks on tariff cutting formulae 66

Chapter Four: Meat Import Demand Elasticities for Switzerland 69
4.1 Model 69
  4.1.1 Overview 69
  4.1.2 The Almost Ideal (AI) and Semiflexible Almost Ideal (SAI) demand systems 70
4.2 Data 75
4.3 Estimation 79
4.4 Results of the first stage source-specific SAI meat demand model for Switzerland (wholesale level) 79

Chapter Five: An Empirical Policy Model of the Swiss Meat Market 93
5.1 Overview of the equilibrium displacement model 93
5.2 Structural model 95
5.3 Displaced model 100
  5.3.1 Economic welfare 105
5.4 Model calibration 105
  5.4.1 Price and quantity data 105
  5.4.2 Binding and not binding tariff rate quota, and quota rents 107
  5.4.3 Initial market equilibria 111
  5.4.4 Discussion of parameter estimates 112

Chapter Six: Results 121
6.1 Pork market 121
  6.1.1 The impact of different consumer preferences 122
  6.1.2 The impact of different adaptation periods 124
  6.1.3 Lowering the threshold price for feed grains to compensate for the reduction in the pork out-of-quota tariff 126
  6.1.4 The impact of pork out-of-quota tariff reduction on other meat categories 129
6.2 Beef and veal market 130
6.3 Poultry and sheep meat market 133
6.4 Tariff capping at 50 percent 135
6.5 Impact of the flexible Swiss formula on the Swiss tariff schedule 137
Chapter Seven: Conclusions and Implications

7.1 Summary on market access and tariff cutting formulae

7.2 Conclusions and implications for the Swiss meat market

7.3 Conclusions and implications for Switzerland

7.4 Outlook

Appendix A: Demand Models and Estimates

A.1 Model development
   A.1.1 The locally concave Almost Ideal demand model
   A.1.2 The Semiflexible Almost Ideal (SAI) demand system

A.2 Estimation

A.3 Meat demand models
   A.3.1 First stage SAI source-specific meat demand model for Switzerland (wholesale level)
   A.3.2 First stage SAI aggregate meat demand model for Switzerland

Appendix B: Mathematical Appendix

B.1 The equilibrium displacement model for the Swiss meat market in full matrix notation

B.2 Restrictions on price transmission elasticities

B.3 Derivation of equation (5.35)

B.4 Deriving elasticities for the empirical model
