EU financial integration -

Three essays on propositions, evidence and implications

Inaugural-Dissertation
zur Erlangung des Doktorgrades
des Fachbereichs Wirtschaftswissenschaften
der Johann Wolfgang Goethe-Universität
Frankfurt am Main

Thomas Kiehlborn
Kassel
2005
1 Introduction and summary of results 1

2 EU financial integration: Is there a 'core Europe'? - Evidence from a cluster-based approach 32
   2.1 Introduction .................................................. 33
      2.1.1 Research motivation and questions ................. 33
      2.1.2 Structure of paper ..................................... 38
   2.2 Overview of literature on EU financial integration ....... 39
      2.2.1 Indicators for the measurement of financial integration .. 39
      2.2.2 Degree of integration in EU financial market segments .. 42
   2.3 Overview of research methodology .......................... 50
      2.3.1 Definition of financial integration: 'Maximum similarity' 50
      2.3.2 Choice of sample indicators, period, and countries ..... 54
      2.3.3 Stylized facts about the employed indicators .......... 58
      2.3.4 Concept and advantages of cluster analysis .......... 62
3 EU financial integration and tax competition -
Evidence on the validity of the agglomeration view 89

3.1 Introduction 90
  3.1.1 Research motivation and propositions 90
  3.1.2 Structure of paper 94

3.2 The capital tax competition-related debate in the EU 95
  3.2.1 Historical context 95
    3.2.1.1 Overview of legal and institutional foundations 95
    3.2.1.2 Overview of changing priorities and aims 96
  3.2.2 Arguments pro and against EU capital tax harmonization 102

3.3 Theoretical view of tax competition 105
  3.3.1 Basic tax competition model (BTCM) 105
    3.3.1.1 Central logic of the BTCM 105
    3.3.1.2 Key results of the BTCM 107
  3.3.2 Agglomeration view of tax competition 108
    3.3.2.1 Key assumptions of the model of Baldwin and Krugman (2004) 108
3.3.2.2 Rationale behind the concept of agglomeration 110
3.3.2.3 Bell-shaped agglomeration rent curve 111
3.3.2.4 Three-stage tax game 112
3.3.2.5 Bell-shaped tax gap curve 115
3.3.2.6 Harmful tax harmonization 116

3.3.3 Key results of the agglomeration view and their modification of BTCM predictions 117

3.4 Overview of research methodology 119
3.4.1 Assessment of macroeconomic propositions 119
3.4.1.1 Division of EU25 into four regions 119
3.4.1.1.1 Criteria of country classification 119
3.4.1.1.2 Characteristics of the four regions 119
3.4.1.2 Data sources, indicators, averaging methodologies 120
3.4.1.2.1 Data sources: OECD, Devereux, Grifffith, and Klemm, EUROSTAT 120
3.4.1.2.2 Backward and forward-looking indicators 121
3.4.1.2.3 Arithmetic and GDP-weighed averages 122

3.4.2 Assessment of microeconomic propositions 122
3.4.2.1 Choice of indicators 122
3.4.2.1.1 Germany as measure of large core nation 122
3.4.2.1.2 Foreign banking units as measure of foreign entrepreneur 122
3.4.2.1.3 Tax-, agglomeration force-, and company-related commitment drivers 123

3.4.2.2 Survey design 125
3.4.2.2.1 Overview of methodology 125
3.4.2.2.2 Representativeness of database 126

3.5 Evidence on the validity of the agglomeration view 127
3.5.1 Evidence on the validity of the macroeconomic propositions 127
3.5.1.1 Introductory remarks 127
3.5.1.2 Backward-looking indicators 127
3.5.1.2.1 Corporate income tax rates 127
3.5.1.2.2 Implicit tax rates on corporate income 136
3.5.1.3 Forward-looking indicators 138
3.5.1.3.1 Statutory corporate tax rates 138
3.5.1.3.2 Effective marginal and effective average tax rates 143
3.5.2 Excursus: Methodological concerns about Baldwin and Krugman (2004) 148
3.5.3 Evidence on the validity of the microeconomic propositions 152
3.5.3.1 Introductory remarks 152
3.5.3.2 Evidence on core governments' limit-pricing power re the setting of taxes 152
3.5.3.3 Relevance of agglomeration force-related commitment drivers 155
3.6 Conclusion and outlook 157

Appendix B 160
B.1 Data overview: Backward-looking indicators 160
B.1.1 Total taxes / GDP: OECD 1965-2001 160
B.1.2 Total taxes / GDP: EUROSTAT 1995-2002 163
B.1.3 Corporate income taxes / GDP: OECD 1965-2001 164
B.1.4 Corporate income taxes / total taxes: OECD 1965-2001 167
B.1.5 Corporate income taxes / GDP: EUROSTAT 1995-2002 170
B.1.6 Corporate income taxes / total taxes: EUROSTAT 1995-2002 171
B.1.7 Implicit tax rates on corporate income: EUROSTAT 1995-2002 172
B.2 Data overview: Forward-looking indicators 173
B.2.2 Top statutory corporate tax rates: EUROSTAT 1995-2004 174
4 Implications of EU financial integration for banking configuration and coordination strategies - Propositions and evidence

4.1 Introduction ........................................ 184

4.1.1 Research motivation and propositions .................. 184

4.1.2 Structure of paper .................................. 189

4.2 Derivation of research propositions ......................... 190

4.2.1 Definition of strategy ................................ 190

4.2.2 Overview of investigated strategy-related aspects .... 190

4.2.3 Discussion of the rationale behind the research propositions 191

4.3 Overview of research methodology ........................ 197

4.3.1 Data source and classification of results .............. 197

4.3.2 Representativeness of database ....................... 198

4.3.3 Assignment of business foci ........................ 199

4.4 Evidence on the validity of the research propositions ..... 202

4.4.1 Proposition 1: Centralization of value chain elements 202

4.4.2 Proposition 2: Standardization of business setup areas 206

4.4.3 Proposition 3: Centralization of decision-making power:

Static perspective ........................................ 210
4.4.4 Proposition 4: Centralization of decision-making power:

Dynamic perspective .................................................. 213

4.5 Conclusion and outlook .............................................. 217

Appendix C ................................................................. 220

C.1 Sample representativeness .......................................... 220

C.2 Descriptive sample statistics .................................... 221

C.3 Assignment of business foci via modified CAP-model .... 222

C.4 English version of the questionnaire ......................... 227

C.5 German version of the questionnaire ......................... 232

C.6 English version of the cover letter ......................... 237

C.7 German version of the cover letter ......................... 238

C.8 Letter of support of VAB ........................................... 239

C.9 Participants' guide / Leitfaden .................................. 240

Bibliography .................................................................. i

Curriculum Vitae ............................................................ xiv

Ehrenwörtliche Erklärung ................................................ xvi
