Economic Valuation of River Systems
Contents

List of contributors vii
Preface xi
Acknowledgments xiii

1 The role of biology and ecological engineering in watershed and river restoration 1
Timothy C. Granata and Ulrike Zika

2 Codification, case studies, and methods for economic analysis of river systems 19
Fred J. Hitzhusen

3 Estimating willingness to pay for additional protection of Ohio surface waters: contingent valuation of water quality 35
Stephen Irvin, Tim Haab, and Fred J. Hitzhusen

4 The economics of high-head dam removal in an ecological context: a case study of the Ballville Dam, Fremont, Ohio 52
Sarah A. Kruse, Timothy C. Granata, and Ulrike Zika

5 The economics of low-head dam removal: a case study on the Salmon River in Fort Covington, New York 67
David Warren and Fred J. Hitzhusen

6 Economic analysis of infrastructure and water quality improvements in the Muskingum River Corridor 86
Fred J. Hitzhusen, Radha Ayalasomayajula, and Sarah Lowder

7 Economic analysis of water quality and recreational benefits of the Hocking River Valley 101
Allan Sommer and Brent Sohngen

8 Effects of pesticide use and farming practices on water treatment costs in Maumee River basin communities 115
D. Lynn Forster and Chris Murray
Contents

9 Economic efficiency and distribution evaluation of dredging of toxic sediments and selected dam removal in the Mahoning River
Ashraf Abdul-Mohsen and Fred J. Hitzhusen 129

10 An economic analysis of Lower Great Miami River segment improvements
Radha Ayalasomayajula, P. Wilner Jeanty, and Fred J. Hitzhusen 153

11 The Cuyahoga River Valley initiative: framing, codification, and preliminary economic analysis in an urban river corridor
Fred J. Hitzhusen, Sarah A. Kruse, Ashraf Abdul-Mohsen, Joana J. Ferreti-Meza, and Marc Hnytka 174

12 Overview, key findings, and approaches including benefit transfer for generalization of research results
Fred J. Hitzhusen and Sarah A. Kruse 192
