Perspectives on Competition in Transportation
Contents

Preface and Acknowledgements 1

Introduction 1

PART I  AIR TRANSPORT

Colm McCarthy and Jacinta McDonnell
Competition or Regulation for European Airports? 7

Jordi Candela i Garriga
Managing Airports in Competitive Environments:
The Case of Reus Airport 31

Jon L. Bryan
The Bargaining Power of Air Transport Labor in a Newly Competitive Environment 43

Frank Fichert
Economic Instruments for Reducing Aircraft Noise:
Theoretical Framework and Recent Experience 59

PART II  ROAD TRANSPORT

Leandro García-Menéndez, Inmaculada Martínez-Zarzoso and Eva María Pérez-García
Road-Shipping Competition in Spanish Exports:
Estimation of a Mixed Logit Model 79
Edward Shinnick and Sarah McEnery
The Potential for Increased Competition in Bus Transport: The Case of Ireland 97

Carlos Enriquez Marchal
Radioactive Material Transport: General Overview of a Peculiar Cargo 117

PART III TRANSPORTATION AND COST ISSUES

Inmaculada Martínez-Zarzoso, Celestino Suárez-Burguet and Eva María Pérez-García
Determinants of Transport Costs and Trade: Sectoral Evidence for Spanish Exports 145

Thierry Blayac
Value of Travel Time: A Comparison of Several Functional Forms for the Conditional Indirect Utility in Discrete Choice Models 163

PART IV TRANSPORTATION AND COMPETITION: SOME VISIONS

Woodrow W. Clark II and Ted Bradshaw
The Paradigm Shift: California’s Hydrogen Freeway 187

Frederic B. Jennings
A Horizontal Challenge to Orthodox Theory: Competition and Cooperation in Transportation Networks 207

Michael Pickhardt
Emil Sax on Transportation: An Overview 221
