"VISIONS ABOUT THE FUTURE OF BANKING"

by

Hans J. Blommestein
# TABLE OF CONTENTS

1. **Bankers on a roller coaster ride**  
   1.1. In the 1980s the banking industry started a roller coaster ride  
   1.2. Revolutionary forces shaping a rapidly evolving banking landscape  
   1.3. Urgent questions about the future of banks  
   1.4. All the answers are different!  

2. **Banking in a fast-forward modernising post-utopian society**  
   2.1. A global techno-market order is transforming our society  
   2.2. The emergence of post-utopian values and their impact on financial markets and institutions  

3. **Bankers as life-cycle engineers**  
   3.1. Increasing complexity of life-cycle planning needs  
   3.2. An increased demand for more sophisticated but simpler to understand financial products to control life-cycle risks  
   3.3. The challenge to deal with society's largest life-cycle risks  

4. **New banking architectures and business models**  
   4.1. Technology as key driver of changes in architecture and revisions of business models  
   4.2. The challenge of designing and implementing competency-based business models  
   4.3. The impact of the ongoing risk management revolution on banking  
   4.4. Why higher ethical standards are crucial  

5. **The direction of banking in the coming years**  
   5.1. Convergence of banking systems?  
   5.2. The emergence of large financial groups  
   5.3. The emergence of one-stop banking and bancassurance  
   5.4. The emergence of a new type of banking system  
   5.5. The search for new business strategies in an increasingly market-oriented banking system based on longer-term relationships  
   5.6. Critical questions about the business logic behind fully integrated financial groups  
   5.7. Is the business case behind the traditional bancassurance model still viable?  
   5.8. Focusing, unbundling and outsourcing in a rapidly changing financial landscape  
   5.9. Moving from one-stop banking to focused financial groups mark II  

6. The continued importance of M&As in banks' business models 45
   6.1. Consolidation and economies of scale 45
   6.2. The increasing importance of cross-border mergers 47
   6.3. The role of risk diversification in M&As 50
   6.4. Risk diversification gains from cross-border M&As in banking and insurance 54
7. Concluding remarks 57
8. Annexes:
   8.2. Annex B: Data 61
   8.3. Annex C: Covariance and correlation results 61
9. References 63
