Economic Development and The Evolution of Backyard Livestock Production:  
A Case Study of Hog Production in China

By

Jing Chen
B.S. (Nanjing Agricultural University, P.R. CHINA) 1990
M.S. (The Ohio State University) 1996

DISSERTATION
Submitted in partial satisfaction of the requirements for the degree of

DOCTOR OF PHILOSOPHY
in

AGRICULTURAL AND RESOURCE ECONOMICS
in the

OFFICE OF GRADUATE STUDIES
of the

UNIVERSITY OF CALIFORNIA
DAVIS

Approved:

Co-chair

Co-chair

Committee in Charge
2003

2998 MYOS
**TABLE OF CONTENTS**

**CHAPTER 1**
ECONOMIC DEVELOPMENT AND THE EVOLUTION OF BACKYARD LIVESTOCK PRODUCTION: A CASE STUDY OF HOG PRODUCTION IN CHINA ........................................... 1

1. INTRODUCTION ................................................................................. 1
   1.1. OVERVIEW .............................................................................. 1
   1.2. GOALS AND OBJECTIVES ....................................................... 2
   1.3. BACKYARD HOG PRODUCTION IN CHINA AS A CASE STUDY ..... 6

2. DATA ............................................................................................... 8

3. INCOME AND LIVESTOCK ............................................................... 12
   3.1. MEXICO AND KWAZULU ....................................................... 13
   3.2. PAPUA NEW GUINEA ............................................................ 14
   3.3. TAIWAN ................................................................................. 14
   3.4. THE INVERTED-U RELATIONSHIP IN CHINA ....................... 15

4. DETERMINANTS OF THE INVERTED U RELATIONSHIP ............ 19
   4.1. IMPERFECT MARKET CONSIDERATIONS ............................. 20
      4.1.1. Evidence of Imperfect Labor Markets in China ................. 21
      4.1.2. Evidence of Imperfect Grain and Feed Markets .............. 24
      4.1.3. Evidence of Imperfect Credit Markets ............................ 26
   4.2. RISK CONSIDERATIONS ......................................................... 27
   4.3. OTHER FACTORS .................................................................. 29
   4.4. CHANGES IN MAJOR FACTORS ALONG WITH ECONOMIC DEVELOPMENT .................................................. 31

5. SIMULATING THE EXPANSION AND CONTRACTIONS OF HOG PRODUCTION IN CHINA ................................................................. 33
   5.1. THE MULTIVARIATE EMPIRICAL MODEL AND RESULTS ....... 33
   5.2. SIMULATING LIVESTOCK PRODUCTIONS IN CHINA’S PROVINCES .......................................................... 37

6. SUMMARY ....................................................................................... 40

**CHAPTER 2**
THEORETICAL INVESTIGATION OF MARKET DEVELOPMENT AND THE EVOLUTION OF BACKYARD LIVESTOCK PRODUCTION ..................... 69

1. INTRODUCTION .............................................................................. 69
   1.1. OVERVIEW .............................................................................. 69
   1.2. GOALS AND OBJECTIVES ....................................................... 70

2. THE INVERTED-U RELATIONSHIP IN CHINA .................................. 73

3. THE HOUSEHOLD MODEL WITH PERFECT MARKETS ................. 76
### 4. THE FARM HOUSEHOLD MODEL WITH IMPERFECT MARKET(S)
- 4.1. Model with Missing Markets .......................................................... 83
- 4.2. Comparative Statics Analysis ............................................................ 84

### 5. COMPARATIVE STATICS OF A FARM HOUSEHOLD MODEL USING A GAMS SIMULATION
- 5.1. GAMS' PATH Solver to Mixed Complementarity Problem ......................... 90
- 5.2. Major Assumptions of the Farm Household Hog Production Model ........ 92
- 5.3. Simulation Results ................................................................. 93
- 5.4. Simulating the Inverted-U Hog Production ..................................... 98

### 6. SUMMARY AND TESTABLE HYPOTHESES
- 124

### CHAPTER 3
- MARKET EMERGENCE AND THE RISE AND FALL OF BACKYARD HOG PRODUCTION IN CHINA ................................................................. 124

#### 1. INTRODUCTION
- 124

#### 2. MARKET DEVELOPMENT AND LIVESTOCK PRODUCTION
- 128
  - 2.1. The Inverted-U in Household Livestock Production ......................... 128
  - 2.2. Household Hog Production and Market Development ......................... 130

#### 3. HOUSEHOLDS MODELS WITH IMPERFECT GRAIN AND LABOR MARKETS
- 134
  - 3.1. Transaction Costs and Market Development .................................. 135
  - 3.2. Farm Household Simulation Model ............................................. 137
  - 3.3. Simulation Results .............................................................. 140

#### 4. EMPIRICAL MODEL
- 144
  - 4.1. Basic Model and Variable Construction ....................................... 145
  - 4.2. Estimation Strategies .......................................................... 147
    - 4.2.1. Tobit Model ....................................................................... 147
    - 4.2.2. Unobserved Effects ......................................................... 148
  - 4.3. Estimation Results .............................................................. 151
  - 4.4. Market Development and Rise and Fall in Hog Production ............ 154

#### 5. SUMMARY OF FINDINGS AND FUTURE RESEARCH
- 156
